TECH'S "STARTING SIX" — Mainstay of the Red Raiders' efforts for a second straight Southwest Conference championship are these six players. Left to right are Sid Wall, Del Ray Mounts, Mac Percival, Bobby Gindorf, Roger Hennig and Harold Hudgens.

Loyalty Fund 41 Percent Over 1960

Total income for the Tech Ex-Student's Association hit \$49,427.87 during 1961, including \$35,006 to the Loyalty Fund, it was announced at the Feb. 17 Ex-Students board meeting on the Tech campus.

Wayne James, executive director of the Exes, who presented the financial report along with Haskell Taylor, said contributions to the Loyalty Fund were up 41% over last year (1960) and that the average gift increased from \$7.89 to \$10.28 in 1961.

"More and more exes are taking advantage of the tax deductible gifts to the Loyalty Fund and are making gifts of \$50, \$100 and larger amounts," James said.

The board, presided over by J. C. Chambers, new president, voted to change James' title from executive secretary to executive director.

"The board felt that the title of executive secretary was a little misleading because of the overall job responsibility; the position requires management responsibilities of all areas of the Association operations," Chambers pointed out. He added, "the board felt the title of executive director would more clearly define the position and the responsibilities associated with it."

In another move the board voted to hire a field secretary to assist James, who for two years has had no other assistant in the field. Vernon O. (Buddy) Barron of Lubbock was appointed chairman of a com-

mittee to interview applications for the job. Those interested may contact Barron at Caprock Investment Co., 1114 10th St., Lubbock, or see Wayne James.

In reaching a decision for a field man, Chambers said: "We have realized that for the past two years the Association has needed an additional staff person to work specifically as a field secretary."

Duties of the position will primarily include the organization of new chapters, working with existing chapters and assisting in their overall program, working in the area of student recruitment and public relations for the College and assisting in the overall fund raising for the Loyalty Fund.

In other board business several committees were appointed and others will be appointed in the near future. Those committees named and their chairmen are: Publications, Clint Formby; Century Club, Giles Dalby; Chapter Relations, Andy Behrends; Homecoming, Roy Grimes; Athletics, G. C. Dowell; Office Equipment and Organization, Vernon O. Barron; Nomination, Clint Formby; Projects, Rob Brown; Fund Raising, Don Anderson; Student Recruitment, Frank Calhoun, chairman, Haskell Taylor, vice chairman; Evaluation and Long Range Planning, Ralph Blodgett.

Exes interested in serving on any of these committees are encouraged to contact the chairmen or contact James

(Continued on page 2)

Hill, Shivers Head State Fund Raising

Sam Hill

Texas Tech will join with 33 other schools in the Austin and Abilene areas in a CLASP (College Loyalty Alumni Support Program) drive in a concerted campaign among their ex-students for financial support.

A Tech ex, Samuel S. Hill, vice president of the First State Bank of Abilene, will head up the overall drive for funds in that city. Thirteen schools will participate. The Abilene drive kicks off February 26 and ends March 9. Chairman of the Tech part of the Abilene drive will be Ex Sid McKinney, an insurance executive.

Former Texas governor Allan Shivers will be the overall chairman for the Austin CLASP, which will start March 19 and continue through March 30. Twenty Texas schools will participate in the Austin-headquartered drive. Tech Ex Pat Thurman is the volunteer chairman for the College's part in this drive.

Tech has approximately 175 exes in Abilene and 103 in Austin. The two CLASP chairmen are organizing workers to contact each of the exes personally.

There will be a kickoff dinner in each city to start the respective drives. The presidents of all participating colleges and universities will be present, as well as workers for the schools involved.

The purposes of CLASP are: (1) to dramatize to alumni and to the public the need for gift support of all institutions, (2) to increase greatly the number and percentage of alumni contributing to each participating institution. The program is aimed at achieving a high degree of civic interest through combined, aggressive, community-wide alumni promotion.

There are approximately 5,000 exes from the participating schools living in Abilene and 11,000 in Austin.

Hill was elected by the volunteer chairmen of each of the schools participating in the Abilene drive. He graduated from Tech in '38 with a BS in Ag, as a dairy manufacturing major.

Board Approves Aid To Students

A student loan fund program has been approved by the Association board and a committee to put it into effect has been appointed, it was announced at the last board meeting in February.

This marks the first time the Association has entered a loan fund program and is made possible by the increase in contributions to the Loyalty Fund.

The loans will be used for expenses directly related to school expenses, mainly tuition, fees, books and payment for room and board.

Chambers said of the loan program: "We are pleased that the contributions to the Loyalty Fund have reached a point that the Association can take forward steps in helping Texas Tech. One of these is the student loan fund program that the Board has voted to establish. A committee has been appointed to make the necessary arrangements and work out the details in setting this loan fund program up. We would like to express our thanks to those exes who are Loyalty Fund contributors who have made it possible to set this loan fund program up."

Honors Program Set For Select Freshmen

By RAY FINFER

With a handful of students and very little publicity, Texas Tech this year inaugurated an unofficial honors program for freshmen. The students involved in the program will gain a better understanding of classwork and will have an opportunity to advance more rapidly than in ordinary classes.

The carefully screened and selected students are placed in special honor classes and spend the entire year with this small group, receiving special attention and doing more advanced study.

The honors program has been in the planning and plotting stage for over eight years and was finally brought into being by Dr. S. M. Kennedy, dean of arts and sciences. With the help of the Honors Council, made up of leading Tech instructors, Kennedy has successfully put the honors program into operation.

"The Honors program is to aid students who are eager to have a fuller education by helping them realize their ambitions. The council was formed for the effective pursuance of a first-rate concept of the honors program," Dean Kennedy explained.

The unofficial program this year may possibly lay the groundwork for a formal college-wide setup in the near future.

All Freshmen

Students in the honors activities this year are all freshmen, but as they become sophomores, the program will be expanded to cover both freshmen and sophomore levels. Members of the program were selected on their desire to enter Texas Tech, their high school record, their scores on national tests and the results of a personal interview before school started.

"No students were required to enter the program; they were told of the system and the ideals and were given an opportunity to decide if they would like to try it," explained John C. Guilds, professor of English, and director of the arts and sciences honors program.

Approximately 150 students were eligible for the program and 97 entered it at fall registration. At the start of the

spring semester 95 students were in the program.

Freshmen in the program are allowed to major in the field of their choice, but must take at least half of their classes under the honors program. Classes in English, history, Spanish, German, physics, biology, chemistry and mathematics are available to honors freshmen. Liberal arts claimed 30 of these students while mathematics was close behind with 23.

Program Is Success

The success of the program was apparent when grades came out at semester. Thirty-eight of the 97 students in the program had grade points of over 2.00. Emily Croon, William Helms, Randall Jones, Stephan Magee and Nanneska Nall all ended the semester with 3.00 averages. David Pate, 2.76; Judy Scarborough, 2.73; Myrna Stephenson, 2.71; Stephen George, 2.59 and Linda Norris, 2.54 were the other top students in the program.

Honors freshmen with 2.00 or better were: Richard Banner, Don Doss, James Ellis, Richard Henry, Rollin Hill, Billy Hogan, Louis Irwin, Elizabeth Lyne, David McIlhenny, Leon Oliver, Barbara Owen, Jay Thornton, James Turley, Nell Anne Walter and Richard Ward.

Others were Betty Bell, Stanley Goodrich, Johnnetter Hassell, Stephen Henderson, Martha Lynne Jones, Sandra Keith, William Lomerson, Kenneth Sims, Mary Spence, Leta Stewart, Barbara Thompson, James Ward and Sandra Wood.

Ideals Upheld

The honors council sees that the ideals of the program are upheld. Students in honors activities are free to talk to members of the council about any problems they have encountered.

Members of the board include Dr. M. L. Dillion, history; Dr. Arthur L. Draper, chemistry; Dr. Sam Schulman, sociology; Dr. C. T. McCullen, English; Dr. C. L. Riggs, mathematics; Professor R. E. Schulz, speech; Professor A. E. Strehli, foreign languages; Dr. Robert P. Anderson, psychology; Dr. P. V. Prior, biology and Dr. Ivan Little, assistant dean of arts and sciences. Professor Guilds serves as an ex-officio member of the council and is "chief trouble-shooter" of the program.

Other freshmen in the honors program were: Sandra Baker, James Beck, Kitty Black, Jerry Boyer, Stephen Briggs, Albert Brown, Charles Burris, Vincent Butz, Barbara Carpenter, Michael Chamberlain, Tom Claiborne, Elizabeth Clark, Margaret Corzine, Larry Craig, Carolyn Crawford, Keitha Davis, James Dorman, Gary Essary, Carl Ezell, Arlene Funston, Melinda Glibreath, Karen Graham, Mary Ann Greene, Carol Gursky, Bronson Havard and Maurice Healy.

In the program also were Herbert Hoff, Howard Hoffman, Holly Hunt, Jacquelyn Kit Isbell, Janelle Jackson, Stephanie Johnson, Sharon Litton, Jane Loughmiller, Claudia Ludwig, Carolyn McAdams, James Marshall, Penny May, Linda Muncaster, Gerald Nelson, Gary Nored, Andy Payne, Walter Beck, Carmen Ray, James Rossi, Linda Salmon, Joseph Sambol, Judy Silven, William Wheeler, Lenore White and Paul Wurster.

"Tech Day"

The eighth annual "Texas Tech Day" has been set for Saturday, May 5, according to information received this week from Wayne James, Tech Ex-Students Association.

A world-wide, yet its purpose is to bring exes together for the common enjoyment of the traditions and heritage of Texas Technological College, James said.

On Tech Day all local chapters are encouraged to meet simultaneously in their respective communities. In cities and areas where no ex-student chapters exist, former students are requested to meet together anyway.

Those ex-students interested in organizing a meeting or chapter are requested to contact the Ex-Students Association on the Tech campus for additional information and help.

Since Tech Day falls on May 5, primary election day, a number of groups may meet on Friday, the preceding day.

Board Approves Private Telephones

Texas Tech will have private telephone service in every dormitory room beginning with the fall semester of 1962.

The Board of Directors unanimously approved the service at their meeting in December.

Bill Moser, Southwestern Bell spokesman, said that at the initial hookup in September, 1962, 2250 telephones will be in service in the dorms plus another 540 phones for administrative use. All the phones will work off a central switchboard which will be located in the current Doak Hall cafeteria.

The service will be intracampus and will eliminate the 13 master switchboards in the dormitories. When a student living in Thompson Hall, for example, calls a coed living in Knapp, he will pick up the phone in his room, dial a four-digit number (all telephone numbers will be four-digit without prefixes) and the phone will ring in the Knapp room.

Costs to the students for the new service will be \$1.50 per student a month. Everyone living in the dormitories will be required to pay this fee, and it will be added to the room and board fees each month. An official of the administration said that this would be required since to offer such service on a basis of individual choice would cost the students about \$6 a month. Students will be able to make calls outside of the dormitories by first dialing "9" and

then the Lubbock number.

Concerning long distance calls on the new telephones, Moser said that students would be asked to make calls collect or to use the pay phones which will remain in the lobbies of the dorms.

"LSU now has a similar telephone hookup," Moser said, "and we have found that over 99 per cent of the (LSU) students follow the no long distance rule. Of course, we have ways of checking any calls out."

This service will not be continued around the clock. Moser said that a certain time each evening (to be decided later by the administration) the chief operator at the master switchboard will cut off the phones with a master key. However, she will remain on duty at the switchboard in case of emergencies.

"One of the main advantages of the new service," the telephone company officials said, "will be to allow parents, for example, to call in case of emergencies, day or night, and get the party in his or her room."

As new dormitories and administrative offices are added to the campus, telephones will be installed. Over 400 will be put into the new woman's residence hall slated to be ready for occupancy in September, 1963.

Board . . .

(Continued from page 1)

who will pass on the information to the particular chairman.

The board passed a resolution expressing gratitude for all the assistance and help received in 1961 from the College and asked that copies be mailed to Dr. Goodwin and other members of the college administration.

A resolution was also passed, with copies mailed to Conner Cole, manager of the college bookstore, and Marshall Pennington, vice president and controller, expressing the Board's gratitude for financial assistance given the Association by the bookstore. The bookstore provided furniture for the Association offices in the new part of the student union.

James reported that five new chapters had been organized in the past four years in Oklahoma City, Bartlesville, Okla., Bakersfield, Calif., San Angelo and Four Corners, N. M. He said several other areas were in the process of organizing and that interest in chapters is at an all-time high.

Homecoming Oct. 26-27

The 1962 Homecoming was set for October 26-27, and the football game will be with SMU.

Floyd Read, Century Club chairman, reported 130 charter members in the organization. Read said a number of exes had already mailed in checks for renewal. He announced that Giles Dalby had accepted the chairmanship of the Century Club and that his committee had already had several meetings mapping out plans to expand the membership.

The board voted to continue the program of recruiting outstanding high school graduates to include the National Merit Scholarship semi-finalists. This latter group is composed of the top 1% of all high school graduating seniors in Texas. Last year the program was centered around the writing of personal, typed letters to each of the valedictorians and salutatorians in the state.

Grads Get Higher Pay

Texas Tech engineering graduates received six of the 125 top salary offers in the nation during fall, 1961, according to the College Placement Council's annual salary survey of 82 colleges and universities.

Mrs. Jean Jenkins, Tech Placement Service director, said the information was compiled from a survey based on data from placement offices.

Statistics include the average dollar value of almost 2,000 offers made thus far by business and industry to male bachelor degree candidates in the period from the beginning of the fall recruiting season to Dec. 16, 1961.

In the developing 1961-62 survey, beginning salary offers to college seniors in the aircraft field are edging out electrical engineering firms for the first time in recent years.

Line-Up Same

Leading curricula in terms of volume of offers remain essentially the same as a year ago. They are led by electrical engineering, followed by mechanical engineering, accounting, aeronautical engineering and general business.

The national monthly average for technical offers in all curricula is \$562 against \$543 a year ago, a 3.5 per cent increase, while non-technical graduates are receiving offers that average \$463 compared with \$444 in 1960-61, a 4.3 per cent gain. Accounting in the non-technical curriculum is attracting the highest offers with an average of \$474 per month.

The fields of employment showing the most activity in the current search for graduates are headed by aircraft and parts manufacturers both in volume and dollar value of offers. Electronics and instrument manufacturers both score high. These leaders are followed by public accounting, electrical machinery manufacturers and petroleum producers in terms of volume alone.

HALL OF FAME — It was a proud moment for Tech's former great athletic coach, Pete Cawthon, when he was named to the Texas Sports Hall of Fame recently in Dallas. Pete is shown here with some of his old friends. Left to right they are: Dell Morgan, former Austin College player

under Cawthon, later head coach at Texas Tech and now assistant coach at Rice; G. C. (Mule) Dowell, Lubbock; Cawthon; Henry Franka, San Antonio, former Austin College student under Pete; and Elmer Tarbox, former Texas Tech great, Big Spring.

Pete Cawthon In Hall Of Fame

One of Tech's former great athletic figures, Pete Cawthon, was honored by the entire state in December when he was enshrined in the Texas Sports Hall of Fame.

Along with three other famous Texas sports figures, Cawthon was presented the Hall of Fame award at a luncheon in the main ballroom of the Sheraton-Dallas hotel December 30.

Others honored were Bibb A. Falk, Monty Stratton and Clyde (Bulldog) Turner.

Many exes of the 30's will recall Cawthon as a coach of the Red Raiders from 1930-40. Cawthon played on a state championship high school football team in Houston five decades ago, became a four-sport star at Southwestern University and later a coach at Beaumont High, Rice, Terrell Prep in Dallas, Austin College and Texas Tech. He coached professional football and later served as athletic

director for the University of Alabama. He has operated boys' camps in recent years in Virginia and lives in Tuscaloosa, Ala.

Pete is remembered at Tech, among other things, for two innovations: coaching schools which drew top athletic figures from over the entire country, and air travel for Red Raider athletic teams.

Membership in the Texas Sports Hall of Fame, according to the constitution of the Texas Sports Writers Association, "shall be limited to those persons, male or female, living or dead, whose achievements in athletics have brought lasting fame and honor to Texas. Election to the Texas Sports Hall of Fame requires approval of 90% of those members voting on the nomination, with final selection based on the highest vote on a preferential ballot." Bibb A. Falk starred as a

major league outfielder for more than a decade with a lifetime batting average of .314. He has continued the tradition of great baseball coaching at Texas U. where he starred as a baseball and football player in his undergraduate days.

Monty Stratton, readers may recall, had the misfortune of losing a leg in a hunting accident just as he arrived at the threshold of a great major league pitching career. His courageous comeback efforts with an artificial limb inspired the movie, "The Monty Stratton Story," in 1949.

Clyde (Bulldog) Turner developed from a scrappy kid who couldn't make his high school football team into an All-American player at Hardin-Simmons and went on to all-pro recognition in eight of his eleven seasons in pro football.

Banquet Honors Retired Faculty

Eight faculty members who retired during the past year were signalled out for special honors at the first Annual Century Club banquet during homecoming, at which Lyndon B. Johnson, U. S. vice president, was principal speaker.

The retiring faculty members were presented certificates commemorating their service to Tech and expressing the appreciation of the Exes.

Other faculty honored were: Miss Lida B. May, assistant professor of mathematics, 22 years; Mrs. Annie E. McGuire, student health service staff, 10 years; Ray L. Chappelle, professor and head of agricultural education, 25 years; Dr. Fred W. Sparks, professor of mathematics, 34 years; Dr. Alan B. Strout, professor of English, 33 years; and W. H. Rogers, superintendent of the animal husbandry farms, 32 years.

Five other faculty members retired over the past year, but are remaining on a part-time teaching basis.

Association Space Will Increase When Office Moves To Union

The Association will move into its attractive and expanded quarters in the new student union addition about March 1st, it has been announced by Wayne James, Association director.

The new offices are on the first floor of the union addition, next to the main entrance.

Association space will be increased by 50%, and the office suite will be composed of two private offices, a reception room, a record room and an equipment-mail room. All furniture for the new space is being furnished by the college bookstore.

"This added space will enable the Association to perform additional services for the College and the Ex-Students,"

James said. "The officers and staff of the Association are deeply grateful for the opportunity to move into these new quarters, and to the bookstore for the purchase of the new furniture," he added.

"We hope that on their return to the campus the exes will stop by the offices for a visit. We want them to feel that this is their campus office and to use its facilities," James said.

Formal opening for the Union Building addition has not been announced. It includes a huge new ballroom on the first floor, a cafeteria, faculty dining area and club, lounge area for studying, offices, meeting rooms for campus organizations, and games area.

Tech Ex Hits Snag

Lynn Morris, a 1960 graduate of Texas Tech, attended her first Broadway "wake" recently when Morris West's courtroom drama, "Daughter of Silence," passed out of existence.

The Saturday night closing party was sad, but sadder still was the fact that Lynn never got to show her wares.

She played a villager in the play and understudied three other women: a murderess of 18 who went insane, a maid of you-name-it age, and a mayor's much-suffering wife of 45.

The insane murderess, okay. ("I took a course at Tech in adolescent psychology and it helped me to understand the girl"). The maid, all right. But a 23-year-old cutie in the guise of a 45-year-old sufferer?

"The producers said 'tut . . . tut' to that prospect, too," she said. "At understudy rehearsals, they had to pad me good and give me a hat with a long veil to cover my face."

Lynn, undaunted, will shop for a new show now to go with the new year.

She's been pointing for a theater career ever since she got wrapped up in the Tech Varsity Shows, which operated on a \$3,000 budget from the Student Union. Some friends tried to talk Lynn out of going to New York, but Dr. Bernard Landes, former head of the speech and hearing clinic who now is in California, and Dr. Gene Hemmle, head of the Tech Music Department, said Gotham wasn't wicked-wicked at all, and lent encouragement.

Records Checked

(Officials of the Tech registrar's office said records show Marilyn R. Morris, 23, believed to be the same girl, was graduated from the college in 1960 with a bachelor of arts degree in speech.

(She is the daughter of Air Force Lt. Col. R. L. Morris, San Antonio, and is a 1956 graduate of Big Spring High School. She also briefly attended Christian College, Columbia, Mo., the registrar's records revealed.

(Ronald E. Schulz, associate professor of speech at the college, said Miss Morris was in his stagecraft class and was "quite talented." He added that she preferred the musical aspect of the theater and had an eye on the professional stage.

(Dr. Hemmle said he recalled Miss Morris and had met her, along with several other former Tech students, about a year ago while visiting in New York).

Her \$100 graduation gift from uncle Glenn Mattox tucked away in a safe place, Lynn arrived in New York and promptly landed a job in the news department of NBC — to help defray costs of drama studies.

"I met such fascinating people on the job," Lynn recalls. "During the Cuban crisis I helped out over at the UN, but whenever I met anyone, I had to pull a friend off the side and ask, 'Who's that? Is he important?'"

Lynn, you see, although she majored in drama and speech and hearing therapy, also had enough credits to get a degree in psychology — and it shows in her intense interest in people.

Of celebrities, she says:

"If you've never met a star before, you expect him to have banners trailing behind him — and he doesn't."

Your former classmates would like to know and we would like to have information about you for "Bear Our Banners."

****Process of Address Change

ASSOCIATION DISTRICTS—Texas is broken into 29 Association districts, which follow county boundary lines, as indicated on the above map. The remainder of the United States is divided into Districts 30-36. DISTRICT 30 includes Oregon, Washington, Idaho, California, Nevada, Utah and Arizona. DISTRICT 31 is composed of the upper half of New Mexico, while the lower half is DISTRICT 32. Included in DISTRICT 33 are Colorado, Wyoming, Montana, North

and South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, and Illinois. DISTRICT 34 is composed of Oklahoma, Arkansas, and Louisiana. DISTRICT 35 includes Michigan, Indiana, Kentucky, Ohio, Virginia, Maryland, Delaware, New Jersey, Pennsylvania, Rhode Island, New York, Connecticut, Massachusetts, New Hampshire, Vermont, and Maine. The states of Florida, Alabama, Georgia, North and South Carolina, Mississippi, and Tennessee make up DISTRICT 36.

Raiders Capture Sportsmanship Trophy 2nd Time

Texas Tech has again proven its ability to support the Red Raider teams in the right way by capturing the Southwest Conference Traveling Sportsmanship Trophy for the second straight year.

The trophy was formally received by Carlyle Smith, Student Assn. president, during halftime activities at the Cotton Bowl game.

The winner is selected annually through voting of committees in all eight conference schools. The committees are made up of the school president, editor of the school paper, head cheerleader, an athletic representative and a junior representative.

The Sportsmanship Committee meets twice yearly to grade the schools in accordance with the Sportsmanship Code. This code outlines the principles of behavior for the competing teams as well as the spectators.

Each year there is a different "chairman school" to act as a coordinating element, and an executive secretary is chosen from this school to take care of correspondence among the conference members. Tech was the chairman school during the past year and Wayne Underwood held the job of executive secretary.

Underwood said he thought winning the trophy again has helped the stature of Tech in the Southwest Conference and that the trophy would probably be placed in the case at the entrance of the Ad Bldg.

Chambers Elected Ex-Student Prexy

With what was probably the most successful homecoming weekend in years now a matter of record, it's time for a run-down on just what happened over that hectic, fun-filled weekend, highlighted by the presence of Lyndon B. Johnson, vice president of the United States.

At the official meeting of the Ex-Students Association on Friday, November 3, J. C. Chambers was elected president of the organization, succeeding Clint Formby, who will remain in office until Jan. 1.

Chambers, '54, who has been serving as first vice president the past year, moves up to the top spot with experience behind him in helping run the large Tech Ex-Students organization.

Serving with Chambers will be Earl Fuson, Dallas, '32, as first vice president, and Floyd Read Jr., Lubbock, '48, as second vice president. Read had been serving as a trustee of the Loyalty Fund, but resigned that position in favor of the other office.

New Directors

New directors elected for three-year terms are Julian Simpson, Midland, Bob Brown, Throckmorton, and P. A. Lyon, Spearman, G. C. (Mule) Dowell was re-elected to a two-year term as ex-student representative to the Athletic Council.

New members of the Loyalty Fund Board of Trustees are Frank Calhoun, '55, an Abilene attorney, Andy Behrends, '51, Amarillo insurance man and president of the Amarillo Ex chapter, and Paul Haskins, '48, Midland independent oil man.

Ralph Blodgett, Spearman, was elected to fill the remaining two years of Floyd Read's term on the Loyalty Board following Read's resignation. Blodgett is a past president of the Association and a rancher and grain business operator at Spearman.

In business sessions the Ex-Student Council approved an amendment to the constitution changing the date for new officers to take office to January 1 each year instead of upon election, as has been the custom.

Amendment Passed

An amendment to make all past presidents of the Association members of the Council was passed. In addition to the past presidents, the Council consists of the chapter presidents, district representatives, Loyalty Fund trustees and members of the Executive Board.

A record-breaking budget of \$41,470 was proposed by Executive Secretary Wayne James, which was subsequently adopted. James, in giving the group a financial report, said the Association was completely solvent for the first time in many years, and had an unencumbered balance of \$7,000 in the bank.

President Clint Formby received a report from Roy Grimes on the action taken in the past two years relative to changing the name of the College. After a lengthy floor discussion of Grimes' report, a motion was made and passed that the Executive Board of the Association act as a committee to work on any further action concerning the name change.

Formby presented certificates of appreciation to Directors Rex Tynes, Robert Dean and Loyalty Fund Trustee Elmer Tarbox, whose terms on the Board expire December 31.

Near the close of the formal business session J. C. Chambers, president-elect was introduced. Chambers presented a certificate of appreciation to

President Clint Formby on behalf of the Association for his service to the group as a director for three years and as its president.

The homecoming activities were marred by one thing only — Tech's 42-7 loss to the not-to-be-denied Rice Owls. Despite all of Tech's efforts, they could do little to contain the fast Houston team who scored almost at will against the Red Raiders.

In pre-game ceremonies trophies were presented for the winning floats in the annual Homecoming Parade through downtown Lubbock and out Broadway to the College.

The parade theme was "Techs in Fantasy Land" and the floats showed much imagination and many hours of hard work.

With the famous story book phrase, "I think I can... I think I can," Sigma Kappa sorority's float captured the Sweepstakes award for the best overall float of the Homecoming Parade. A chugging red railroad engine was shown puffing up the Southwest Conference hill in hot pursuit of a fleeing Rice Owl.

In the Fraternity Division, Sigma Alpha Epsilon's "Tech Checkmate Rice" float won first place. On it "Yosemite Sam" commanded his genie to checkmate Rice. Phi Delta Theta won second place with the cartoon character "B.C." Goes to College.

Gamma Phi Beta won the Sorority Division. On their float Captain Hook, in the good ship "Peter Pan of Tech," was making the Rice Owl walk the plank with the ever-hungry crocodile waiting with open jaws. Second place went to Pi Beta Phi for their Baby Huey in Fantasy Land who was squeezing an Owl and exclaiming "Duh! Squash 'Em Raiders."

Members of the Cosmopolitan Club met with bad luck in launching their float. It was too large to come down from the loft of the barn where it was being built. When it did come down, it was in chunks and so could not be entered in the parade.

Winners of the best dormitory decorations were also announced. Winner in the Women's Division was Knapp Hall with its "Blue Whale." Bledsoe Hall won in the Men's Division with a cartoon strip.

The Raiders didn't win, but it wasn't the fault of the parade floats and their encouragement, for the Rice Owl was the victim of everything from locomotives to cannibals.

In the Independent Campus Division, first place went to the Baptist Student Union's "Little Engine That Could" with a Rice Owl on the cowcatcher. The American Society of Agriculture Engineers won second place with "Popeye Wins Again," a float showing Popeye standing victor over a Rice Owl with Olive Oil and Peewee looking on.

A humorous entry that didn't win but got its laughs was a small car rigged up like a bug with the sign "Bug 'Em Raiders." However the float receiving the most laughs was one which said "Rice's Only Bowl Bid" and it featured a "Big Bad John."

When apple slices are being added to a stuffing for duck or chicken, some cooks like to cook the fruit briefly before putting it in the dressing. This pre-cooking assures that the apple will be tender by the time the bird is cooked.

Homecoming Luncheon Honors Tech Ex-Student Presidents

Past presidents of the Texas Tech Ex-Students Association were honored at a special luncheon during Homecoming activities on the campus Nov. 3-4.

The men, representing 1927 through 1961, were presented special certificates testifying to their service by Clint Formby, outgoing president of the Ex-Students Association.

Those honored at the luncheon, and their addresses, were: E. W. Camp, Anderson, S. C.; E. M. Barnett, Dallas; C. W. Ratliff, Lubbock; Etheridge Eagan, Wichita, Kan.; J. W. Jackson, Lubbock; W. E. Street, College Station; John E. Spear, Amarillo; Mart Pederson, El Paso.

J. Doyle Settle, Dallas; Holmes Webb, Lubbock; Jason Gordon, Plainview; Fred Fairley, Marshall, Formby, '39, Plainview; Raymond Lee Jones, '40, Lubbock; Lloyd Croslin (deceased) '41, Lubbock; Royal Ferguson, '42-'46, Lubbock;

Elmer Tarbox, '46-'47, Big Spring; R. G. (Guy) Carter, '47, Dallas; Hurley Carpenter, '48, Lubbock; E. A. (Ed) McCullough, '49, Midland; W. B. Rushing, '50, Lubbock; Olaf Lodal, '51, San Antonio; D. M. McElroy, '52, Lubbock; Jack Maddox, '53, Hobbs N. M.; Hart Shoemaker, '54, Abilene; Ralph Blodgett, '56, Spearman, Texas; Culver Hill, '57, Lubbock; Curtis Sterling, '58, Brownfield, Texas; Warlick Carr, '59, Lubbock; Jack Hinchey, '60, Amarillo; and Clint Formby, '61, Hereford.

AND I WIN! — Tech's Guy Golden flashes a big smile as he breaks the tape to win the 600-yard dash in the recent indoor track meet in Municipal Coliseum. Two world records were tied in the meet.

CHECKING ADDRESSES — Student council members Jerry Avery, Sissy Fuller (standing) and Peggy Maloy look over addresses of Tech Ex-Student chapter presidents over the state so that information on the student council programs may be mailed to them.

Council Assists In Texas Tech Growth

Tech has changed! The phenomenal growth of Texas Tech in the past decade is apparent to all of you who have recently visited the campus. No longer is expansion restrained. At all times the physical plant of the institution presents a picture of new, intensive construction. The student and faculty population has increased almost 100 percent in 10 years. But these are the unimportant, material differences. The major transformation lies in the evidence of Tech's "acceptance". High school students, educational personnel, and even the state legislature now accept and recognize Texas Tech as the most rapidly developing and improving institution of higher learning in the state.

The most gratifying reaction to the trend toward improvement appears in the interest of the student body in progress as quickly and maturely as possible. No longer are population and construction strictly administrative problems, nor are educational standards solely a faculty worry. These have now become the concern of each and every student. As the natural medium of expression for this somewhat unique attitude, student government has initiated several programs designed to fulfill the undergraduates' desire to take an active part in Texas Tech's growth.

TRIAD PROGRAM

The first of a triad of such programs resulted in immediate success. The Athletic Recruiting Project, begun in the spring of 1961, proved to be a blessing to the Athletic Department in offering invaluable help in securing top-ranked high school ball players. Prospective varsity lettermen were assisted in their academic planning, entertained individually, and given a stimulating insight into Tech campus life. All of this was handled by students and student organizations and yielded tremendous influence through the medium of personal contact. It paid off! Tech rose in one se-

mester to a close second in the number of "blue chip" boys signed by schools in the Southwest Conference.

The second point of this three-pronged program of student participation was modeled after the idea of the first, but soon outstripped the earlier program in the range of its activity. The Academic Recruiting Project, started only this fall, has employed students' help in speaking to high schools, constructing film programs, hosting visiting chapters of the National Honor Society, and assisting all departments in handling the visiting high school students attracted by the various exhibits and shows. The main purpose of this project, as the name implies, is to assist the faculty and administration in bringing students of higher standards to our campus.

SUMMER EMPLOYMENT

Having entered the broad areas of academics and athletics, student government toned its last program to the remaining major classification of persons connected with the college — the Ex-Students. Strangely enough, the idea behind this project was brought to the attention of the Student Council through several interested alumni. The program is called the Summer Employment Project.

A great number of students are used by industry in formal summer employment programs for training and seeking prospective permanent employees. These programs are quite extensive and are becoming more and more a useful tool of industrial personnel departments. However, the majority of students are employed in and around their home towns on odd jobs. The object of the Summer Employment Project, then, becomes one of attempting to locate the individual jobs for students.

Many collegiates are handicapped in the quest for summer work since there is little time for them to leave the campus until the spring semester is

over. Unless they live in a nearby area, their chances for securing a substantial summer job are drastically reduced. Many students have been unable to return to school the following fall, because they were not able to find employment until late in their vacation and could not earn the necessary funds in so short a time.

STUDENTS AVAILABLE

The Summer Employment Project would provide a system through which prospective employers could contact students before they left the campus in the spring. If an interview was desired, the student could take a weekend trip, but it would not be a haphazard excursion that so many students experience late in the spring while searching for work. Chances are, that with previous planning and correspondence, most of the personal contacts would have positive results.

From the viewpoint of the employer, the program would open a new "market" of manpower from which it would be a simple process to draw. More important, the program would offer, we think, better help than could be secured anywhere else in the state. The program also aids in the recruiting of high school students to Tech, as such a project soon gains recognition throughout the state and adds to Tech's list of advantages for students. Another point, and a very unique one, is that of asking only to aid you as an alumni, rather than extending an open palm for funds. This is one program through which all participants would benefit equally.

NEED YOUR HELP

This is a short view of the work and thoughts of the Student Council during the fall semester. We have reached a point in this third program from which we cannot proceed without your help. Continuance of this project and its ultimate success now depends only upon your reaction as interested alumni. If you have need of this

Exes Offer Old Annuals

The Ex-Students Association has La Ventanas from 1947 and 1951 to 1957 for sale at \$1 each. The dollar charge is for the cost of mailing the annuals.

The 1959 annuals are also available through the Ex-Students office for \$5 each. Address your orders to: Ex-Students Association, Box 4009, Tech Station, Lubbock, Texas and they will be mailed to you promptly.

Formby Authors Book Describing Caprock History

The growth of Texas is not boom and bust, but a steady progress is the conviction of Marshall Formby, a Texas Tech graduate, and author of a new history of early Texas settlers in the Caprock Country, *These Are My People*.

Formby, a candidate for Governor of the State of Texas, brought out the book just as campaign time got under way.

In doing so he is following the lead of such well known politicians as Dwight Eisenhower, Lyndon Johnson and John Kennedy, to name a few. All of these men brought out books in periods in which they were pressing their political ambitions.

The book is about an area, Dickens County, which Formby knows well. It has to do with people with whom he was reared and for whom he served as a county judge, a state senator and later as chairman of the Texas Highway Commission.

The author writes in "an unusual individual style of down-to-earth people who have helped create the West Texas of today. Tech Exes — many of whom know of the Caprock Country and Marshall Formby, as well, will find *These Are My People* interesting reading.

Dedicated to the pioneers who struggled westward, *These Are My People*, was published in January by the Naylor Company of San Antonio and is on sale at \$4.50 a copy. Formby, a 1932 graduate of Texas Tech, is an attorney and farmer from Plainview and co-owner of four radio stations. He has a masters degree from the University of Texas and attended Baylor Law School.

WATCH THE POSTMARK

CAMBRIDGE, Mass. (AP) — A cautious robber relieved Joseph Tahmouh, liquor store owner, of \$28.

Tahmouh asked for his wallet back.

"Okay," said the robber, "but I'll have to mail it to you. There may be fingerprints on it."

TO TECH PARENTS

If your son or daughter was graduated from Texas Tech and this paper is coming to the home address, please send us the proper address so that the magazine will reach the proper person. Keeping in touch with their College is vital to graduates. You can help them realize more from their college experience by helping us to keep their correct whereabouts in our records.

EX-STUDENTS ASSOCIATION

TEXAS TECH COLLEGE

LUBBOCK, TEXAS

RECEIVES PORTRAIT — Dr. Gene Hemmle, Tech music department head, accepts a portrait of the late Prof. W. R. Waghorne, organizer of the Tech music department, from

Miss Mary Dunn. She is chairman of the Student Affiliate, South Plains Music Teachers Association.

Music Department Accepts Portrait

A picture of the late Prof. W. R. Waghorne, organizer of the Texas Tech music department, has been presented to the Tech music department by Mrs. Waghorne of San Antonio.

Dr. Gene Hemmle, Tech music department head, accepted the portrait from Miss Mary Dunn of Lubbock at a luncheon she gave for several people connected with Tech.

Miss Dunn is chairman of the Student Affiliate, South Plains Music Teachers Association.

The picture will be given a place of honor in the Tech Music Building, Dr. Hemmle said, after expressing his appreciation of the unselfish years Waghorne spent in gaining music a place on the Tech campus.

At the luncheon Mrs. Clifford B. Jones, wife of the college's third president, gave the invocation, followed by group singing of the college hymn, "O College Mother Beautiful." The song was written by Tech's first president, the late Dr. Paul W.

Horn.

Special guests included Mrs. Joseph F. Andrews of New York City, daughter of Dr. Horn, and Mrs. J. N. Michie of Dallas, former professor and head of the Foods and Nutrition department in the School of Home Economics.

Mrs. Andrews is the author of "The First Thirty Years," the history of Tech.

Professor Waghorne, who served as music department head from 1925-1934, died in 1942 at the home of his son, Art Waghorne of Lubbock. He was both a talented composer and organizer.

When he came to Tech in 1925, he was the only professor in the music department, organized the Students' Artists Course, the first campus band and directed an operetta, "The Rose Maiden," at the first commencement exercises in May, 1927.

BB Attendance Ranks Nationally

Those Tech exes who may have suspected Tech ranked high in basketball attendance figures last season had their suspicions borne out in a recent column by Joe Kelly, Lubbock Avalanche-Journal sports editor.

"Last season," Kelly said, "the Raiders drew 103,250 fans to 14 basketball games. That was good enough to place the Raiders fifth in the nation in total attendance."

Tech attendance for all games, including holiday doubleheaders last season, averaged 7,381 fans per game, which placed Tech eighth nationally in average attendance.

"It's a tremendous feat," Kelly pointed out.

HOLDS NIAGARA RECORD

NIAGARA FALLS N. Y. — Al Butler, a member of the New York Knickerbockers of the National Basketball Association, holds the Niagara University single-game scoring record — 49 against Western Ontario in the 1959-1960 season.

CLASP Activities Set For Capitol

(Continued from page 1)

He worked in the College creamery as a student, was president of the dairy industries Club and one of the originators of the annual Dairy Club breakfast.

Hill, born in Nocona, Montague County in 1914, went to work in 1938 for the Meyer Blanke Co. of Houston as a dairy equipment and supply salesman. In 1939 he moved to Abilene to establish a branch for Meyer Blanke and was branch manager and territory salesman for them until January '47 when, in partnership with Marvin Lewis he purchased the Longhorn Creamery, a milk and ice cream company that was sold to the Borden Co. in 1952. However, he remained as manager for Borden's until June, 1959 when he became associated with the First State Bank of Abilene as vice president and public relations officer, the job he presently holds.

He is married to the former Verna Lee Carson and they have three children; Joan, a junior at Baylor, Jean a Baylor freshman and Jimmie, a high school junior. Hill has held a number of civic and agricultural posts in Abilene.

The Tech chairman of the Abilene drive, Sidney McKinney, was born in Iowa Park, Texas and attended Tech from '38 through '41, majoring in Business Administration. He served in the Air Force with the 15th Air Force in Italy until October,

Pat H. Thurman

1945. He established a partnership with his father, N. E. McKinney that was known as McKinney-Clark Insurance Agency. He is now sole owner of the firm.

He and his wife, Iris, a teacher at Fannin Elementary School in Abilene, have two sons, Don, 11, and Mac, 15. McKinney is a member of the Abilene Kiwanis board of directors, past president of the Abilene Optimist Club, twice president of the Abilene Assoc. of Insurance Agents, past regional chairman of the Texas Assoc. of Insurance Agents and a member of the National Association of Insurance Agents.

Pat Thurman was reared in Lubbock and graduated from Lubbock High. He served in WWII and the Korean conflict and is a captain in the U. S. Army Reserve.

He graduated from Tech in '50 with a BBA in Management. At Tech he was a member of Phi Delta Theta, formerly the Silver Key Club, and a cheer leader in '49. He is a deacon of the University Christian Church of Austin, secretary-treasurer of the West Austin Optimist Club, past president of the Texas Tech Alumni Club of Austin, an avid supporter of the Red Raider Club and Tech's representative from Austin for the Cotton Bowl Advisory Council.

Thurman is a sales representative for Recordak Corp., a subsidiary of Eastman Kodak.

Sidney E. McKinney

TWIST COMES TO TECH—Chubby Checker's Peppermint Lounge has nothing on these Tech sorority girls who recently put on their own "Peppermint Twist" in the student

union ball room. Left is Clarie Adamson, Abilene and right, Myla Henderson, San Angelo.

You And The College

BECAUSE your Ex-Students Association is certain that you have a continuing interest in your Alma Mater's progress and problems, this newspaper is sent to you. To confirm that interest and at the same time contribute toward solving many of the College's immediate problems, you should become a member of the Texas Tech Ex-Students Association.

TEXAS TECHNOLOGICAL COLLEGE

LUBBOCK, TEXAS

OFFICE OF THE PRESIDENT

February 13, 1962

Texas Tech Alumni and Ex-Students
Wherever You May Be

Ladies and Gentlemen:

The time is near when this and all other State-supported colleges and universities must be formulating plans for the biennium, 1963-65. By that time the enrollments in all of these institutions will increase tremendously. Texas Tech could have some 14,000 students in those years.

It is also time for the citizens of Texas to realize the burden these increased enrollments will place upon the system of higher education in the State. During the past several years much has been done to provide the support these colleges need, but we are faced with a situation where we must run to keep from slipping backward and must run even faster to get ahead.

We wish all of you could see the progress which is being made at Texas Tech. The five cent ad valorem tax has provided funds for many additional academic buildings. Borrowed money has enabled us to build residence halls and remodel the stadium. But we still need other buildings and will need still more as our enrollment expands. New and modern equipment will be needed to supplement and replace older equipment which has been rendered obsolete by the rapid development of science and technology. But our greatest need will be for qualified faculty and staff. To obtain these we must compete with other colleges and universities both within and without the State as well as with industry. With their number dropping in comparison with the demand for them, it is becoming increasingly difficult to secure their services notwithstanding the considerable increases in salaries provided by the Legislature.

What is true of Texas Tech may likewise be said of other State-supported colleges. As ex-students, we need your help in bringing this situation to the citizens of Texas. We believe that Texans want to provide an adequate, first-class system of higher education for their sons and daughters but that they are not familiar with the needs of this system. You can bring to the attention of your friends and neighbors the necessity for their support of higher education. By so doing you will not only promote the development of Texas Tech and other State-supported colleges but will assure the youth of Texas an opportunity to secure an education of the first class within the boundaries of the State.

Sincerely yours,

R. C. Goodwin
President

Contributions to the Ex-Student Loyalty Fund in 1961 took a tremendous jump over the amount given in 1960, reflecting an increase of 41.39%, according to figures released recently by Wayne James, executive director of the Association.

A total of \$35,389.69 was raised in 1961, compared with \$24,714.89 in the preceding year of 1960, a final tabulation shows.

Other compilations reveal that the average gift in 1961 was \$10.29. In 1961, 18.4% of the Exes on file contributed, while only 17.2% did so in 1960. This compares to 16.4% contributing a total of \$23,382.86 in 1959.

The class of '50 led all classes for the seventh consecutive year in the number of contributors and the amount contributed. Thirteen classes gave over \$1,000 in 1961, while only six classes in 1960 topped this mark.

The number of contributors in '59 was 2,964; in '60, 3,138 and in 1961, 3,403, the figures showed.

District 7 (Lubbock) increased its contributions from \$6,151.46 to \$10,145.85 in '61 over 1960, but

130. Mr. and Mrs. Bruce Zorns, Brownfield, Texas.

dropped in the percentage of exes giving from 20.4% to 20%, James' tabulations showed.

District 21 led for the second straight year in the percentage of exes giving, with a total of 30%. A number of other districts, 12, 13, 20, 27, 30, 34, 35 and 36 all dropped below 1960 in percentage of exes giving, while all remaining districts improved their figures over 1960.

"Reserve Dorms Rooms Early" Burgess Reminds New Students

Tech exes planning to send sons or daughters to the College this fall had best get dorm applications in early if they want to assure the student a room, Hubert L. Burgess, director of Office of Room Reservations said this week.

"After June 1st we expect all dorms to be full, and we urge parents to send in applications at the earliest possible date," Burgess explained.

Applications for rooms are being received at a record rate in Burgess' office.

"Prospective applicants are being sent applications for their rooms but no room numbers can be given at this time, in order to allow present dorm residents first priority on selecting their room and roommate by April," Burgess said.

In April, present occupants will be allowed to sign a contract for next year. Any rooms left over will be filled by applicants.

Prospective Tech students who have a particular roommate in mind for a Tech dorm room are reminded to submit their application and that of the potential roommate (boy or girl) at the same time for a better chance of getting their room together, Burgess said.

The rooms are assigned by numerical order according to the date received, and assign-

ment will be made by early summer.

The Director of Room Reservations said that Tech's dorm situation will not improve until the new women's dorm now under construction is completed in the fall of '63. It will accommodate about 808 girls.

Tech's present dormitories hold 4,447 students.

King Announces Raider Changes

Texas Tech gained a letterman and lost another, while a red shirt who had been expected to be a starting guard passed his work, but enlisted in the Army, as a result of mid-term examinations, Coach J. T. King has announced.

The Red Raiders added a junior college player, but lost seven freshmen, five of them blue chippers.

Quarterback Richard Mahan of Snyder, a letterman as a sophomore in 1960, regained his eligibility. Junior Roy Blain, a reserve tackle from Midland, failed to pass enough hours, but has re-enrolled to establish eligibility for the 1963 season.

Joining the squad at mid-term was Ronnie Wallace, a halfback from Lubbock, who transferred from Tyler Junior College.

Lost in the mid-term postings were backs Donny Anderson of Stinnett, Max Gatlin of Lubbock and linemen Bill McLelland of Ennis, Marcell Dorethy of Denver City, Billy Belew of Sweetwater, Jerry Polson from Stanton and Bob Trice of Midland.

Anderson, Gatlin, McLelland, Dorethy and Trice have all re-enrolled in order to be eligible for the 1963 season if they pass their work for the next three semesters.

Belew and Polson, both of whom have dropped out of college, have told coaches that they will return in the fall in order to establish eligibility for the 1963 season.

Rex Little of Rankin became ineligible last June, but returned to Tech in the fall and passed all his work. He left college without saying anything to the coaches or other players. After a season as a red shirt, he had been counted on as a starting guard.

Tech also lost two freshman basketball players. Mac Cade of Hamlin withdrew to enter McMurry and Abbie Pierce of Midland also withdrew.

service, or know of those who might, please contact Mrs. Jean A. Jenkins, Director of Texas Tech Placement Service. Mrs. Jenkins and her staff are cooperating fully with the Council. We are all awaiting your early response. Further information on this program may be obtained from the President or officers of your local alumni chapter.

LITTLE BROTHER

TUCSON, Ariz. (A) — Joe Breck is one guy who is really playing basketball in the shadow of an older brother.

Joe, a high school junior, is a guard for the Catalina Trojans. Several years back, big brother Dan, now a University of Arizona Wildcat, was a center for the Trojans.

Dan is 6-feet-5. Little brother Joe is 5-feet-3.

HOUSTON IS HOME — Two Tech scholarship winners point out home to Clint Formby, immediate past president of the Texas

Tech Ex-Students Association. The girls are Linda Rae Clark, right, and Penny Ann May.

Tech Day Set For May 5

Plans are rapidly shaping up for one of the most successful Texas Tech Days in history, according to Wayne James, Executive Director of the Texas Tech Ex-Students Association.

(See related story on page 6)

The Eighth annual Texas Tech Day has been set for Saturday, May 5th, and a number of chapters and groups had announced their plans for observance of the day at press

time.

Texas Tech Day, is a worldwide observance, its purpose being to bring Exes and other friends of the College together for the common enjoyment of the traditions and heritage of Texas Technological College, James said.

On this particular day all local chapters and Exes are encouraged to meet simultaneously in their respective communities. In cities and areas where

no Ex-Student Chapters exist, former students are requested to meet together.

Those Ex-Students interested in organizing a meeting or chapter are requested to contact the Ex-Students Association for additional information and help.

Since Texas Tech Day falls on May 5th, primary election day in Texas, a number of groups have chosen to meet on days other than May 5.

Exes living in the areas

where the chapter activities are not announced in "Tex Talks" are requested to contact the Chapter President listed below: Austin, Bob Richards, 1505 Broadmore, Austin, Texas; Big Spring, W. D. Broughton, 1601 E. 6th, Big Spring, Texas; Crosby County, Ed Smith, Box 716, Lorenzo, Texas; Houston, President Charles M. Fugitt, Asst. Vice Pres., Bank of the Southwest, Houston 1, Texas

Odessa, Bobby J. Hawkins; Pecos, Fred Gipson, 508 S. Park, Pecos, Texas; Floyd Co., Sammy Hale, 809 W. Grover, Floydada, Texas; Tri Co., Donald G. Shipley, 425 Avenue K, Hereford, Texas; El Paso, Dale W. Cary, Vice Pres. Chelmont State Bank, P. O. Box 5304, El Paso; New Orleans, Jay Malby, 240 Diane, New Orleans 23, La.; Pampa, Gene Steel, 1727 Fir. (Continued on page 7)

J. C. Chambers

Chambers Cites Exes Growth...

In the short time I have been associated with our alumni organization I have been able to see the great potential available to our Association.

Texas Tech has made such strides in the short span of its life that it hardly seems believable to people not close to our college. For an educational institution to grow to the size, have gained national prominence in so many different areas, to have a physical plant second to none and an attitude and pride among its students and former students such as we have, does not seem believable.

Our Ex-Student Association even then at the time the struggle looked impossible, has maintained the pace set by the college and is also enjoying a place of prominence. Normally an Ex-Student Association is found in a position of lagging or is not even organized until the college or university has passed a half century of service. This places our association in the enviable position similar to that of a young man, who though short in years, has already been long in service with the same company and is well on his way to higher positions of leadership and happy with his job, but never content to say "I have done all that I can do."

Texas Tech is reaching the point now where it has graduated a large number. Many of its Exes have been in business long enough to have reached high levels of personal success and people at numerous other colleges and universities envy Tech because of the enthusiasm shown by its Exes for the College.

All of this is good, but it is not to say that we do not have a lot of hard work ahead of us. We have many problems to overcome.

My plea to each Ex is to "Look for an Avenue of Service." It is impossible for your district representative to give each of you a job specifically. Wayne James, our Executive Director, can not possibly assign a task to each individual, but this does mean that we do not need help, because we

Students Vote Change To Texas State University

Texas Tech students recently went to the polls and voted by a narrow margin in favor of changing the name of the College to Texas State University.

In the first election slightly over 50 per cent of the student body cast ballots on whether the name of the institution should be changed from College to University. The students voted more than 5 to 1 for a name change. Ten proposed names appeared on the ballot.

In a second election, 4,366 students cast ballots for their first and second preference for a proposed name change. Texas State University received 1,884 first choice votes and 887 named it their second choice. Texas Tech University received 1,734 first choice votes and 832 named it second choice. Texas State University of Arts, Sciences and Technology received 353 first place votes and 1,097 second place votes. Texas Technological

University received 395 first place votes and 1,458 second place votes.

Four Hundred and eleven ballots were declared void because they did not indicate a second choice.

Results of the popular vote was used by the Student Council as a basis for a complicated electoral vote to decide which name the students favored. The formula used gave Texas State University a narrow margin of 1.2 electoral votes over Texas Tech University, 11.53 to 10.33. Texas State University of Arts, Sciences and Technology received 5.62 and Texas Technological University 4.52 electoral votes. There were 32 electoral votes.

Numerous editorials in the Torexaur gave support of Texas State University, the name which numerous faculty members have promoted for several years. Some of the same editorials criticized heavily the Ex-Student Executive Board's choice of Texas Tech University.

The Council of the Ex-Student Association in its meeting at Homecoming 1959 decided that they would favor changing from college to university but in no way wanted to lose Texas Tech or the Double T.

In February, 1960, the Association Executive Board voted in favor of changing the name to Texas Tech University. Numer-

ous Torexaur editorials and various faculty members have criticized this choice by saying Tech is not a word. It was the thinking of the Executive Board that if Tech were not a word, that it would be a new word.

Since the February 1960 meeting (Continued on page 5)

Award Honors Dell Morgan

In honor of Texas Tech's football coach from 1940 through 1950, Athletic Director Polk Robison Saturday announced the formation of the Dell Morgan Memorial Award Fund.

The late Dell Morgan was head football coach at Tech for 10 years. He returned to Rice University, from where he had been called in 1940 to succeed Pete Cawthon at Tech, and was killed recently in an auto accident.

The award, which will be an annual one, will be in the form of a bronze plaque to be mounted in the lettermen's lounge of the athletic offices. It will be given to the athlete who most closely typifies some aspect of Coach Morgan.

"We haven't decided just exactly what specific aspect it will be," Coach Robison said.

Dr. Truman Camp

Camp Resigns As English Head

"After 16 years of battling the budgets, I've decided to go back to the classroom full time," Dr. Truman Camp of Texas Tech declared March 21.

With that simple and straightforward statement, Dr. Camp announced his resignation as head of Tech's English department, an administrative job that rivals the work of many college presidents in magnitude.

As English department head, Dr. Camp has kept up with more than 4,600 students this academic year. He has presided over the activities of 44 faculty members.

Dr. Camp's resignation as department head is effective at the end of the first summer term. He then will return to full-time teaching at Tech as a professor of English.

As one colleague said, "Truman often has expressed the desire to return to fulltime teaching, now he's realized it."

Dr. Camp, whose special interest is 18th Century English Literature, joined the Tech faculty in 1935, coming from New Haven, Conn., where he had obtained his doctor of philosophy.

Final details for the setting up of a Student Loan Fund Program are to be worked out. In its February meeting, the Board voted to establish the loan fund to provide aid to students in need of financial assistance to complete their college education who would otherwise have to drop out of school.

The Board will hear a report from Vernon O. "Buddy" Barron on Office equipment and Organization. Barron is chairman of a committee that has been studying those areas of the Association's operations since it moved into the new offices in the Student Union Building. His report is expected to include the recommendation of a person to be hired for the position of Field Secretary. At its last meeting Barron's committee was authorized to accept applications, interview applicants and recommend a person to be em-

(Continued on page 5)

FUTURE TECH STAR—Russ Wilkinson, smiling happily, signs a Southwest Conference basketball letter of intent as an even happier pair of Red Raiders coaches, Gene Gibson, left, and Charlie Lynch, look on. Wilkinson, a Monterey star and son of a former Texas Tech cage hero, Russell S. "Curly" Wilkinson, was one of four "blue chip" boys to sign with Tech coaches during the first day of recruiting, a great catch.

Top Rated Basketballers Plan To Attend Tech

Club Honors Tech Athletes

The Red Raider Club's annual All - Sports Banquet honoring all Texas Tech Athletes for 1962 is scheduled for Tuesday night, May 8th.

Pete W. Cawthon, former head coach at Texas Tech, will be the principal speaker for the evening. Cawthon, a nationally known sports personality, was inducted into the Texas Sports Hall of Fame last January. After leaving Texas Tech he served as coach of a professional football team and was athletic director at the University of Alabama.

The banquet is a family affair and dinner will be served from 6:30 p.m. to 7:00 p.m. in the Lubbock Municipal Coliseum. There will be free gifts for the ladies.

The dinner is open to the public. Reservations must be made by Saturday, May 5th by either calling the Red Raider Club office or writing Box 456, Lubbock, Texas. Tickets are \$2.50 per person.

Four "blue chip" high school basketball players have signed pre-enrollment letters of intent to attend Texas Tech in one of the greatest opening day coups in the history of the Southwest Conference.

In a series of driving, flying sorties, Coaches Gene Gibson and Charley Lynch inked all-stars Russ Wilkinson of Lubbock Monterey, Norman Reuther of Fort Worth Arlington Heights, Dub Malaise of Odessa and Seminole great Bob Measels.

Unanimous Choice

Reuther is a 6-6 prospect, Wilkinson stands 6-4, Measels is 6-2 and Malaise is 5-11. It gives Texas Tech one of the most outstanding collection of freshmen ever assembled, with others virtually assured of joining the group in succeeding days.

Wilkinson, one of the most heralded players ever to compete in basketball for Lubbock Monterey, was the only unanimous selection to the all-District

3-AAAA team last season. He also was a second-team all-state selection and grabbed a first team berth on the all-state tournament team by a near-unanimous vote of sports writers.

The 6-4, 160 pound senior scored 537 points in 35 games for a 15.4 average. He led the team in scoring and was fourth in the district, despite the point-balance on the Monterey team. Wilkinson earned two basketball letters for Monterey, and was on the starting lineup both as a junior and a senior.

Amazingly agile for his size, Wilkinson was hailed by district coaches as one of the best defensive players to compete in the league for several years.

Double Figure Scorer

Many of his points came after he had stolen the ball and driven the length of the court for a layup. In the fourth-overtime battle Monterey fought with Houston Davis in the state tournament opener, Wilkinson almost single-handedly put the game into its first extra period by stealing the ball from the Davis playmaker and laying it through the goal. He did this twice in less than 45 seconds during the last minute of play.

Wilkinson reached double figures in scoring in all 14 district games and in all four playoff games. Only twice during the 35-game season did he fail to reach the double digits, and both came in the practice season in games which Monterey won handily and Coach Myers benched Wilkinson in order to hold the score down.

In six games this season Wilkinson scored more than 20 points, and his high of the year was 23 against Amarillo in the district opener. In four playoff games, Wilkinson scored 65 points, an average of 16.3 per game.

Great 'Small' Man

The Monterey offense was not conducive to individual scoring honors. In fact, the team scoring was so balanced that all five starters were listed among the top 30 scorers in the conference.

Malaise, of course, was one of the most sought high school players and is probably the finest "small" man to emerge in the state in years.

He is a son of John Malaise, who has resigned as Odessa High School basketball coach after an outstanding record. The brilliant Malaise stands 5-11 and weighs a solid 160 pounds.

Malaise owns every District 2-AAAA scoring record, the most impressive mark being his career record of 1,864 points. This past season he scored 850 points in 33 games to lead the entire state. It was an average of 25.8 points a game.

Starred Against Monterey

The Broncho great stole the limelight in the playoffs. Against San Angelo he scored 34 points in leading Odessa into the district playoffs. He came back with 31 points against El Paso Austin in the bi-district game.

Then, in a losing cause against Monterey in regional competition, the Odessa sparkplug poured in 32 points. It was the greatest individual performance against the Plainsmen of the season. That 32-point output was only 10 points below the average for each Plainsman foe.

Measels earned the right to be acknowledged as one of Seminole's all-time greats with a remarkable career. The 6-2, 175-pounder averaged 20 points (Continued on page five)

Adams Signs Intent Letter

James Adams, 6-8, 215-pound post man for Midland High has signed a basketball letter-of-intent with Texas Tech, coach Gene Gibson has announced.

Adams played only one year of basketball at Midland after his sophomore year. That season, he led Wink to the state basketball tournament. He was not eligible his junior year because of the transfer rule, but did play B-team ball.

This past year, he was the leading scorer for the Bulldogs, who finished third in district play behind Odessa and San Angelo. He was one of the top scorers in the district.

For the full season, he averaged 20.1 points per game and averaged 16 rebounds.

Adams was born in Wichita Falls and is the son of Mr. and Mrs. Bunah Adams. His coaches at Midland were Harold Blackburn and Bob Todd.

He is the fifth basketball player to sign with Tech and the second from District 2-AAAA. The other is Dub Malaise of Odessa. Others to sign with Tech are Russ Wilkinson of Monterey, Norma Reuther of Fort Worth and Bobby Measels of Seminole.

Homecoming

October 26 and 27 are the dates for the 1962 Homecoming according to a recent announcement by Athletic Director Polk Robinson and Ex-Student Association Executive Director Wayne James.

Class and organization reunions, Exes luncheon, election of Ex - Student Association officers, pep rally, coronation of queen, parade and football game will highlight the busy weekend.

Special emphasis will be placed on the class reunions which are set for Friday night. The additional rooms in the Student Union will make possible separate class reunions this year. With this additional space, an all-out effort is being made to get more Exes to attend the reunions.

James said that a capacity crowd is expected to attend this year's Homecoming. He is encouraging out-of-town Exes to begin to make hotel and motel reservations to be sure of a place to stay.

Wooldridge Brothers Among First Red Raider Grid Heros

BY GALYN WILKINS

Star-Telegram Sports Writer
The Lubbock Fairgrounds, flooded by an eight-inch rain storm, were scarcely fit for a herd of cattle, much less football players. Nevertheless, the big Saturday game between Texas Tech and Schreiner went on.

The "field" was ankle deep in water and the grimy referees had to hold the ball between plays lest it float away. The teams played to a watery 0-0 tie.

That 1926 game was only the 11th in Texas Tech's short history and, despite the poor footing that day, a firm athletic foundation was abuilding.

Two youngsters who were helping construct a solid, nationally - known institution were two Dallas brothers, Charles and Floyd Wooldridge.

Since they left Tech as a pair of the school's earliest graduates, the Wooldridge boys have built a solid business foundation of their own.

Charles eventually made it back to his hometown as vice president of the vast Texas Power and Light Company.

Floyd went south - "where they still haven't heard of 'Texas Tech'" - and is now an administrative assistant with Lane Wells, a servicing company for the oil industry.

Busy With Civic Work

Both have become familiar in civic and church circles. Charles, now vice president of the Cotton Bowl Athletic Association, will become its president next year.

He served on the Texas Tech board of directors from 1947 to 1953. Brother Floyd is presently on the board.

In addition, Charles is a Dallas County Red Cross co-chairman and has been a Boy Scout leader for 20 years.

Charles, who never played a down of football until he went to Lubbock, was obviously tick-

ected early for leadership. He was president of the junior and senior classes at Tech, vice-president of the student body and business manager of the yearbook.

But for Coach E. Y. Freeland and Floyd's inventiveness, Charles never would have gone to college.

"It was sort of blackmail," he explained with a sly grin. "Floyd was a football and track star at Bryan Street High School here in Dallas and Freeland wanted him to go out to Tech with him."

Freeland, then an SMU assistant football and track coach, had been given the job as first football coach at the brand new Lubbock college.

"I hadn't even planned on going to college," Charles continued "but Floyd wanted me to go so he told Freeland he'd go if I could too."

Finished Third in Mile

Unlike his brother, Charles had unimpressive qualifications for an athletic scholarship.

"I'd boxed a little at the YMCA and tried to make the track team in high school," he says, "but I didn't earn a letter. In fact, the closest I ever came to winning anything was in our district track meet. I was third in the mile run."

But Freeland, anxious to get Floyd in football and track togs, agreed to get Charles a job at Lubbock.

"He got me a job waiting tables," said Charles. "That was great. Back in those days when they gave you a scholarship, it meant you got a job. I was just like any other athlete."

One of the Wooldridges' first duties when they arrived on the campus in September 1925 was to get the place ready for the first classes.

"We literally helped start the school," says Charles proudly. "We had to help take the scaffolding off the buildings so they could start classes."

Charles began concentrating on an engineering course, but Floyd went out for the football team right away.

"We were not hard pressed for players by any means," says Floyd. "We had 120 come out that first year and most had played college ball. We had a lot of transfer students. Some even came from A&M."

Floyd and one other frosh, a guard named Bruce Reed, made the team. Reed was a Matador captain in 1927.

"Floyd was a top-notch quarterback," remembers Charles, who followed the team closely. "He was kinda like Doak Walker, not real fast but shifty and smart."

The Matadors jumped into big-time football in their second season, 1926, playing Texas Christian in Fort Worth.

Frogs Had the Hossees

"It was supposed to be a real breather for TCU" remembers Floyd. "The Frogs had a good team - Rags Mathews, Herman Clark and that bunch."

The Tech men gave the Frogs fits, but lost, 28-16.

"We had almost as good a team," said Floyd, "but TCU just had more people. We just got worn down at the last and TCU kept sending in all these new guys."

Tech had some extra incentive to win. It came from a Fort Worth man, no less.

"Tech was playing its home games at the Fairgrounds," said Charles. "It didn't have a bit of grass on it. When we came down to Fort Worth, Mr. Amon Carter said he'd help us build a stadium if we won the game."

Tech didn't win the game, but the late Mr. Carter later helped Tech build a fine new stadium.

The Matadors had acquired a new head coach for the 1926 season - Grady (Big Hig) Higginbotham. He had come up as an (Continued on page five)

Student Union Is Complete

Unit Triples Union Size

If the Texas Tech English instructor who first conceived the idea of a Tech Union in March of 1928 were to walk onto the Tech campus today, no doubt he would sigh in disbelief.

From only a glint in the eye of that professor and a few more Tech promoters, the Tech Union has grown into one of the largest and busiest centers of activity on the sprawling Texas Technological College campus.

The main promoter of the student union building through the years has been W. C. Cole, manager of the Tech Bookstore.

It was Cole who in 1949 thought of and promoted the idea of issuing bonds to construct the first permanent building for the Tech Union. The bookstore manager proposed that the bonds be paid for by profits from the bookstore.

At that time there was an accumulated balance of nearly \$150,000 on the bookstore ledgers. So Cole, seeing that the balance was growing consistently, thought of pledging future profits from the bookstore.

The Ex-Students Association chipped in, and so did other organizations. The college appropriated \$50,000 for furniture and equipment. The building was completed and accepted on Feb. 12, 1953, and was opened officially a month later.

Before completion of the present addition, the structure contained a ballroom to accommodate 400 couples, a snack bar to seat 48, a lounge area, three meeting rooms and a student organizational workroom.

Over 1500 persons attended the formal open house in 1949.

AUTHORIZING FEE

In May of 1953 the Union received a shot in the arm from the Texas legislature. Legislators authorized regular fixed student fee for the operation, maintenance and improvement of the Tech Union. A year later, the board of directors approved the membership of the Union Board.

The big step for the new union addition was taken in the fall of 1957 when the board drafted plans for a million dollar expansion of the student union building.

The board accepted the report of the building committee saying it was feasible to issue reserve bonds to finance the addition to the building. Architects were authorized to proceed with preliminary work on the plans and specifications for the addition to the union.

Groundbreaking ceremonies for the addition to the building were Sept. 23, 1960.

The first union building to be constructed on the campus was built from two Army surplus buildings put together to form a recreation hall. Another connecting building became a cafeteria run by an off-campus agent.

In 1950 the Board of Directors approved plans for the first permanent unit of the Tech Union.

Over a million and a half dollars is invested in the present Tech Union, according to James Langley, Union director.

The much needed new space in the Union was built by Vickery and Nelson Construction Co. of Lubbock. The approximate cost of the new section was \$1,079,560. This means that every time a Tech student takes a step in the new union he is walking on about \$19.50.

UNION OPENS—Dr. R. C. Goodwin, Tech president, cuts the ribbon signifying the official opening of the addition to the Student Union and briefly addresses the large crowd of students, exes, faculty and townspeople who were on hand for the open house and a tour of the spacious Tech Union.

NATIONAL PURPOSE OF THE COLLEGE UNION

The Union is the community center of the college, for all members of the college family—students, faculty, administration, alumni, and guests. It is not just a building; it is also an organization and a program. Together they represent a well-considered plan for the community life of the college.

As the "living room" or the "hearthstone" of the college, the Union provides for the services, conveniences, and amenities the members of the college family need in their daily life on the campus and for getting to know and understand one another through informal association outside the classroom.

The Union is part of the educational program of the college. As the center of college community life, it serves as a laboratory of citizenship—training students in social responsibility and for leadership in our democracy. Through its various boards, committees, and staff, it provides a cultural, social, and recreational program, aiming to make free time activity a cooperative factor with study in education. Its goal is the development of persons as well as intellects.

The Union serves as a unifying force in the life of the college, cultivating enduring regard for the loyalty to the college.

—Adapted from National Association of Colleges Unions Conference Minutes

Spacious Game Room

Tech Union Adds Annex

With the addition of 55,000 square feet of space, the new Student Union Building will contain 85,000 square feet, the old section having somewhat over 30,000.

The Union itself works on a non-profit basis, in conjunction with the Bookstore. There are no state funds whatsoever behind the Union.

The Bookstore gives all of its profits to the Union. This amounts to about \$70,000 each year.

Money appropriated for the new building came from \$300,000 savings and a \$5 Student Union fee paid by each Tech student at the beginning of each semester.

This is approximately \$120,000 a year coming into the Union from the students and the Bookstore.

In the old section of the Union, there are nine rooms. Fourteen have been added to form the new addition.

Included among these are a faculty club, two lounges, two ballrooms, seven meeting rooms, cafeteria, reading room and game room.

Nearly all new equipment has been purchased for the game room, costing approximately \$15,000.

New shuffleboard and ping pong tables have been ordered along with new vending machines to allow students to have refreshments in the game room.

Also on the agenda for the game room are six new pool tables and five new billiards tables. Something new has been added with a Carom Bank Shot table. This table has no pockets and the game requires more skill than either pool or billiards.

The cost of playing pool or billiards will remain the same, one cent per minute.

The old tables in the game room will be sold to fraternities, sororities, residence halls or anyone else who is interested, to the highest bidder.

The game room of the Union will be open from 8:30 a.m. until 10:30 p.m. on weekdays and until 11:30 weekends.

There will be no change in Union fees.

Meeting hall, snack bar, newsstand and game room are only a few of the terms that describe the many features of the old Tech Union. Now, in addition to the new mammoth ballroom, the Union has another function—that of restaurant. More exactly, the latest improvement is the addition of a modern cafeteria.

A long, tiled corridor leads to the shiny new service area where a variety of meats, vegetables, salads and desserts will be appetizingly displayed. After the bill is paid, the patron will enter the spacious dining room with a seating capacity of 200.

April 2 marked the official opening of the cafeteria. Serving hours are tentatively set up for 8 a.m. through 2 p.m.

"Unless there is a demand for it, the cafeteria will not be open evenings or on Sunday night," Longley added.

The old eating area will remain a combination snack bar, meeting room and all around "goof-off" room.

With the large new kitchen, the Union Cafeteria can supply banquet service for larger groups and can be reserved by various groups desiring this service. The procedure for reserving the cafeteria will be the same as it is for reserving other areas now.

The Man and the Band - Dean Killion

Photos By Leo Waltz

Those impressive halftime shows we see in Jones Stadium on Saturdays during the fall don't just happen. It takes a lot of hard work and planning by both band members and the band director.

Since the band is usually in the spotlight and not the director, the Toreador decided to attempt to capture some behind the scenes action that involves the band director each and every week.

Leo Waltz, Toreador photographer, journeyed over to the drill field one afternoon and came back with the photos you see on this page.

The photos show Dean Killion in action from early in the day until the final note has died away over the campus.

It takes over a thousand sheets of music for each half-time performance. There is a great deal of time spent in planning the halftime shows, and then the real job starts, putting the show together.

The band has made great strides in the past few years. In our opinion, the majority of the credit must go to Dean Killion — THE MAN BEHIND THE BAND.

—Ralph W. Carpenter
—Toreador Editor

... Killion maps plans for band practice early in week.

... Offering encouragement—
"Lift Those Knees!"

Instructions must be given—
"Come on troops, get in line."

The practice gets underway—
"Alright, let's go!"

Surveying the situation—
"Looks pretty good, let's go."

There are those moments—
"Patterson!"

BILL MAC JONES, on leave from San Angelo Junior College, is surrounded by the 32 volumes of *Thwaites Early Western Travels*. The books are only a portion of Tech's Southwest Collection material Jones is using for research on his dissertation relating to persons who have settled in the Southwest area because of health reasons.

Collection Becomes Lab For Historians

In its years of operation, Tech's Southwest Collection has become the "laboratory" for history students and authors.

The majority of Tech's master's theses and doctoral dissertations in history now are a result of research in the collection's vast array of manuscripts, books and other materials, according to Dr. Seymour V. Conner, director.

Noted historians, from Lubbock and throughout Texas, have referred to the Southwest Collection when gathering information for publications on various phases of area history.

At the moment, two men are busy at work, utilizing every spare moment studying material from the collection, which is housed in West Texas Museum. They are Odie Faulk, a full-

time scholarship student from Fort Worth, and Bill Mac Jones, chairman of the social science department at San Angelo Junior College.

Faulk, 28, is a 1950 graduate of Fort Worth's Masonic Home High School. He served 5½ years in the Marines, and since that time he has been rapidly pursuing his education. He graduated from San Angelo Junior College in 1957 and received his BS degree from Texas Tech in 1958. He finished his four year undergraduate work in 2½ yrs. In 1960, Faulk finished his work on a Master's degree from Tech, and this August, he is scheduled to receive his Ph.D. from Tech.

Since the beginning of the spring semester, Faulk has spent eight hours a day scanning microfilms of the original Bexar archives. This material contains records and correspondence of officials in early Spanish government of Texas, from 1763 through 1836.

Faulk's dissertation will be titled "The Last Years of Spanish Texas, 1778-1821." The work will include governmental history, lives of the governors, military aspects, a summary of Indian relations, mission history, economics, social and cultural aspects and the penetration of Anglo-Americans.

"Much of the history in the later years of Spanish rule is pretty well covered," Faulk said. "I am trying to fill the gap prior to 1821."

The Southwest Collection had some of the material Faulk needed in his research. "but I knew the bulk of it was in Austin in the Bexar Archives. The collection financed the filming of the remainder of the archives, and these microfilms are now deposited in the Southwest Collection. This saves me three to four months of study in Austin."

Jones, 36, a 1943 graduate of San Angelo High School, received his bachelor's degree from Vanderbilt in 1950 and his MA degree from George Peabody College two years later. He started work on his Ph.D. at Vanderbilt in 1956, but dropped out to take a coaching job at Texas A and M. In 1959 he moved to San Angelo Junior College where he now is on leave of absence.

"I heard about the Southwest Collection at a junior college meeting from others who had studied here," Jones said. However, Jones must spend a few days in Austin going through the state medical archives.

Jones' dissertation will be "Health as a Factor in Settling the Southwest." From many books already written, from diaries and journals, travel accounts and other materials, Jones is able to compile a history of the men who moved to the Southwest for health reasons.

These accounts will vary from great men who settled to become government officials to "Doc" Holliday, the Georgia dentist who suffered from tuberculosis and became a legend as a gunfighter.

There were 10,212 students enrolled at Texas Tech this past fall an increase of 1,034 over 1960. The ratio of men to women is a bit less than two to one.

Fund Trustees... Top Players Sign at Tech

(Continued from page 1)

Duties of the Field Secretary will be to assist in the overall fund raising for the Loyalty Fund, to organize new chapters and work with the existing chapters and assist in their overall program, and also to assist the Executive Director in the Association operations. This position has been vacant for the past 2 years.

Andy Behrends, Amarillo, Chairman of the Chapter Relations Committee, will give a report on the organization of several new chapters and a proposed chapter officer's conference next fall. Behrends will also report on plans for the observance of the eighth annual Texas Tech Day which has been set for Saturday, May 5, 1962.

Giles Dalby, chairman of the Texas Tech Century Club, is expected to report on the organization's efforts to obtain new members and membership renewals of charter members. He will also report on efforts to obtain an outstanding speaker for the organization's annual dinner next fall at Homecoming.

Efforts to attract academically outstanding high school students to Tech will be reported on by Frank Calhoun, Abilene, and Haskell Taylor, Lubbock, chairmen of the Association's student recruitment program. The Association office has just completed writing personal letters to outstanding students throughout the Southwest. In addition, key Exes have been contacted and asked to help by personally visiting the students and talking to them about Tech.

Also to be on the agenda are reports on Fund Raising by Don Anderson, Crosbyton, new Projects by Rob Brown, Throckmorton, and a report by Executive Director Wayne James.

All members of the two boards are expected to attend. The group will adjourn shortly after a noon luncheon, at which the coaching staff will also be guests.

Name Change...

(Continued from page 1)

ing the Executive Board and a committee of the Board has met several times with faculty leaders to discuss the name change. It was in one of the meetings that the faculty representatives proposed the name of Texas State University of Arts, Sciences and Technology as a compromise name.

At the annual Ex-Students Council Meeting at Homecoming in 1961, the name change was discussed at length and it was decided that the Executive Board should continue to discuss the name change of the College with any interested group.

The indication is that the College Board will not consider any name change until the Ex-Students, faculty and students can all agree on the same thing.

(Continued from page two)

a game this past season. The Seminole star, who was overlooked in all-state selections, was all-district two years and all-regional tournament for two years. Seminole was co-champion of District 2-AAA this past season.

Fine Jump Shot

Measels, a fine ball handler, is a player with great natural ability. He currently is running sprints on the track team and this quickness and speed helps him in basketball, where he was recognized as an outstanding dribbler.

Measels, who has good movements on the basketball court, has a fine jump shot. He possesses a soft touch with the ball, but also is a good driver and fits especially well into the fast break game. His best shot is from 20 feet and out.

The 18-year-old senior also was recognized as a top performer in the stall game, dribbling for long periods, driving on the basket and then bringing the ball outside again.

Reuther, the fourth prospect to sign Sunday with the Raiders, already had been approached by virtually every major institution in the Southwest. He is considered one of the finest young players in the state.

The Fort Worth star stands 6-6 and weighs 190 pounds. As center on the Arlington Heights team he averaged 23 points a game this season. But he also can play outside and is accurate with his jump shots.

Has Southpaw Shot

Reuther broke every scoring record in Fort Worth this past season, which includes Dick O'Neil's before he went on to star at TCU and Hank Wendorf, who went to SMU this season.

Camp Returns

(Continued from page 1)

phy degree from Yale University.

A native of Newtonington, Conn., he also took his bachelor of arts degree at Yale and taught Latin and ancient history at Collegiate School in New Haven. He also taught later at Connecticut College of Commerce.

He came to Yale with intentions of majoring in journalism, but switched to teaching after he'd had an undergraduate sampling of the two fields. After teaching English at the University of Texas and taking his graduate work at Yale, he joined the Tech faculty.

In accepting Dr. Camp's resignation as department head and return to full-time teaching at Tech, President R. C. Goodwin said, "Those of us who love the classroom can appreciate Dr. Camp's feelings. We wish him well in his decision and look forward to continued association with him at Tech."

Wooldridge Bros. Early Grid Heros

(Continued from page two)

assistant in 1925 from A&M. "Hig was still in great shape," recalls Floyd. "He'd get out in practice and run plays with us. He's hit us hard and tell us to try to do better than he could. We tried, but we weren't as tough as Hig. It really helped us."

Floyd well remembers the old days at the Fairgrounds.

Rains Drench Stadium

"There was one little patch of grass, but that was way off in a corner," he said. "Before we played Schreiner it had rained for days. There was about six inches of water on the field and when the referee put the ball down, it would just float around. We had a real good time that day."

Floyd also played in 1927, but dropped out of school in 1928 to go to work. He later returned for another season of football and was graduated in 1931.

Meanwhile Charles was becoming an intramural football hero.

"We had a tough intramural league," he said. "I was on the engineering team and we had a math professor for a coach." The intramural league wasn't for the campus playboys. The teams scrounged equipment from the varsity and played "tackle." The league became sort of a farm system for the varsity.

"The varsity coaches always came to the games," recalled Charles. "Once in a while they would invite players to try out for the regular team."

Charles, a fullback, was talked into playing for the varsity by Higginbotham. Charles was in his third year, but he decided to give it a whirl.

"Believe me," he said, "the varsity wasn't any rougher than the intramural league."

The growing pains were catching up with Tech's football team, and after posting good records the first two years (the Matadors lost but two games), the grid fortunes began to wane.

"It just got to where we didn't have real good discipline," says Charles. "I remember one game I got away for a long run. The guy that caught me tackled me on the side that I was carrying the ball. I didn't even know enough to change the ball to my other hand and stiffarm him away."

Shin Splints for All

Charles also was on the track team, running the dashes. The Tech track, like the Fairgrounds, wasn't the easiest place to get around on.

"It was a hard old clay track," Charles remembers. "Everybody was running round with shin splints."

Charles retained his running talents long after he left school.

"He was district manager for Texas Power and Light at Palestine," Floyd tells. "He had two children by this time and the people there wanted to generate some interest in the baseball team (in the East Texas League). Palestine had an outfielder named Tony Criscola who was real fast. Well, Charles was talked into an exhibition race with Tony before one of the games. They raced down the right field line to home plate and Charles almost beat him. It was some race."

Still another Wooldridge brother, Elmer, now in the construction business in Fort Worth, was a crackerjack trackman at A&M.

"Elmer loved track," said Charles. "Once he wanted to come to the Stock Show meet at Fort Worth but the school decided not to send a team. So Elmer and Mule Wilson packed their shoes and came anyway. They won the University division by themselves."

Plays Under Cawthon

"They got this huge trophy and took it back to A&M. Elmer would keep it in his room a few days and Mule would keep it awhile."

Floyd went back to Tech for his last year in 1930. He played under Pete Cawthon, one of Tech's memorable coaches, who was inducted into the Texas Hall of Fame last year.

"Cawthon was just brimming over with fire and spirit," said Floyd. "Some of it just had to rub off on his players."

Charles had gone to seek his fortune the year before, ending a strange football saga at Tech. The Wooldridge brothers had gone to Tech the same year and both played football, but never on the same team.

"One of us was on the first six teams Texas Tech had," says Charles. "We look at that fine big school out there now and it makes us happy that, in a small way, we helped get it started."

Six Tech Exes Running For Office

Marshall Formby

Preston Smith

Waggoner Carr

Joe B. Phillips

John C. White

Six Texas Ex-Students are running for state wide offices and their names will appear on the May 5th primary election ballot.

The six comprise the largest number of Tech Alumni ever to run in one year, and the contests they are in include Governor, Lieutenant Governor, Attorney General, Congressman at

Large, Agriculture Commissioner and Justice of the State Supreme Court.

In the governor's race is Marshall Formby, Class of '32, of Plainview. Formby, an attorney-radio station owner, is a former State Highway Commissioner.

He was editor of The Tora-dor while at Tech and later ser-

ved as President of the Ex-Student's Association. He is currently a member of the Texas Tech Foundation.

Preston Smith, Lubbock, also graduated from Tech in 1932. Smith, a veteran member of the Legislature, served in both the

House and Senate. He resigned his Senate post to make the Lieutenant Governor's race.

He ran third in a field of 12 candidates for the same office in 1950.

Seeking the Attorney General's post is Lubbock's Waggoner Carr, class of 1940. Carr was a pre-law major and president of the Debate Club.

Carr is well known throughout the State. He served twice as speaker of the Texas House. Joe B. Phillips, Lubbock real-

tor, is seeking the Republican nomination for Congressman-at-Large. Phillips is the past president of the Texas Realtors' Association.

Incumbent Agriculture Commissioner John C. White is seeking another term in office. White was head cheerleader in 1945-46, a member of the Saddle Tramps and the Aggie Club and the College Club.

He received his BS degree in 1946.

(Continued on page 7)

Many Cities Make Tech Day Plans

ARLINGTON

Texas Tech Exes in Arlington will gather at 7 p.m. at Randol Mill Park for Texas Tech Day Observance. Chapter President Thurman Jasper is in charge of arrangements.

PLAINS - DENVER CITY
Plains and Denver City Exes are invited to a buffet dinner at the residence of Mr. and Mrs. Don Hancock at 301 8th Street and at the Plains Park in Plains. Dinner will be served at 8 p.m.

TULSA, OKLAHOMA

Tulsa Exes have scheduled a picnic at 4 p.m. May 5th at La Fortune Park at 57th and S. Yale in Tulsa. President J. R. Meyers has announced that facilities are available for those who care to swim.

AMARILLO

Amarillo area Ex - Students will have a dinner meeting on Friday, May 4, at 7:30 p.m. at the Empire Cafeteria in the Vaughn Building at 110 W. 4th in Amarillo.

Southwest Conference Championship Basketball Coach Gene Gibson and Texas Tech Vice President Marshall Pennington will speak to the approximately 200 Exes expected to attend. Texas Tech Exes from throughout the Panhandle are invited.

DALLAS

Dean of the School of Engineering Dr. John Bradford will be the featured speaker at the dinner meeting of Dallas area Exes on Saturday, May 5th at 7 p.m. at Lucas B and B Restaurant located at Oak Lawn and Lemon Avenue. Chapter President Kenneth P. Dowell said an all-out effort will be made to get the largest group of Exes ever to attend a Texas Tech Day observance out for this meeting.

FORT WORTH

A Dance and Breakfast is scheduled for Texas Tech Exes in Fort Worth on May 5th. Chapter President A. E. Hitt has announced that dancing will begin at 8:30 p.m. at the Fort Worth Quartermaster Depot, located at Felix and Hemphill Streets.

EAST TEXAS EXES

Texas Tech Football Coach J. T. King will speak at a dinner

meeting of East Texas Exes at Bell Lake House at Hitt's Lake near Tyler at 6 p.m., May 5th. J. T. Malone of Tyler is in charge of arrangements.

PECOS VALLEY, NEW MEX.

Officers of the Pecos Valley Chapter have planned a picnic for 5 p.m., at the Roswell Country Club. Chapter President Jack L. McCellan has announced that a picnic lunch will be provided and Exes are encouraged to bring their families.

MIDLAND

Midland Exes will observe Texas Tech Day with a dance beginning at 8 p.m. at the Ranchland Hill Country Club. The dance scheduled for Saturday, May 12, will be followed by an early breakfast.

Special guests will be Tech students Rondall Jones and Pamela Scheum, recipients of the Midland Chapter scholarships.

HOUSTON

Houston area Ex-Students will observe Texas Tech Day on Sunday afternoon May 6, with a Shamburger - Poolside Party at the Shamrock - Hilton Hotel, President Charles Fugitt has announced.

Shamburger is a name the Houston Exes call the delicious hamburgers the Shamrock - Hilton serves. The Shamburgers and all the trimmings will be served to those attending anytime between 2 p.m. and 6 p.m.

Those caring to swim can do so in the Shamrock - Hilton Hotel at no additional cost. Several television sets will be set up for those wanting to watch the local baseball team play.

There will be a very short business meeting to elect officers. Several distinguished guests from the Texas Tech Campus will be present to bring those present up to date on recent happenings at Tech.

Fugitt has announced that the chapter officers have tried to plan an afternoon that will appeal to all the Houston area Exes. There will be a \$2 per person charge, which will include the meal and swimming. Exes are encouraged to stop by anytime between 2 p.m. and 6 p.m.

College Faces Well In CLASP Drives

Texas Tech was among the three top schools in alumni participation at the close of the first two weeks of the College Loyalty Alumni Support Program in Austin.

Texas A & M led the 20 participating institutions with an amazing 95 percent of its former students making gifts during the campaign. Abilene Christian College trailed closely with 87 percent and Texas Tech had 64 percent.

Other schools reporting a high alumni participation score were Hardin - Simmons 58 percent, Mary Hardin-Baylor and Southwestern 55, and Texas Lutheran 52 percent.

Of 492 Austin Alumni, A & M College received gifts from 469 former students. ACC's figure is 197 individual gifts from 227 alumni solicited. Texas Tech had 57 gifts from 89 Exes solicited.

The two-week campaign involving 20 Texas Colleges and Universities was scheduled to end April 7. However, the campaign was extended 10 days to give several hundred volunteer workers additional time to complete their calls.

Pat Thurman '50, Chairman of Tech's solicitation program, said that practically all Tech Exes had been contacted during the regular two-week period. However, the extension would permit workers additional time to reach the few Tech Exes who had not been contacted.

The purposes of CLASP are: (1) to dramatize to alumni and to the public the need for gift support of all institutions, (2) to increase greatly the number and percentage of alumni contributing to each participating institution.

The program is aimed at achieving a high degree of civic interest through combined, aggressive, community-wide alumni promotion.

Lionie D. McCurray was vice chairman of Tech's part of CLASP. Other volunteer workers for Tech were, Mr. and Mrs.

John Nixon, Isom Hale, Arch Gainer, Glenn Ivy, Rex Jackson, Jack Polk, Phil Rapstine Irene Whately, Margaret Baker, Tom Burnham, Ray Weed, Sherman Eckols, and Jon Oden.

Forty-four percent of the Texas Tech Ex-Students in Abilene made gifts to the College during the two-week College Alumni Support Program in February.

Seventy-eight of the 177 Tech Exes in Abilene made gifts to the Loyalty Fund. Of the 5,140 Abilene alumni of the 13 participating schools, 43 percent made gifts to their alma mater during CLASP.

Sid McKinney '41, Chairman of Tech's part of Abilene CLASP pointed out that several Tech workers had not completed all their calls and that Tech's final percentage would probably be higher.

Highest Honor Given Student

The highest award a cadet can receive while in ROTC was bestowed upon a Texas Tech senior recently.

The Army and Navy Legion of Valor Bronze Cross was awarded Cadet Major Bobby Switzer, a business administration major from Monahans.

Major Richard McCaffrey, Commanding Officer of Fourth Army Headquarters Company and attached units at Ft. Sam Houston, made the presentation.

Originated last spring by the Department of the Army, the award is being presented for the first time this year. Only two medals can be presented this year in the Fourth U. S. Army area, which includes Texas, New Mexico, Oklahoma, Louisiana and Arkansas.

About 15 medals are presented in the U. S., which averages out to only one for each 1,000 ROTC seniors.

Tech Coed Makes Ag Judging Team

Most college girls, and even housewives, find it difficult to pick out the best cuts of meat at the local supermarket. And even after they make the choice many of them couldn't tell why.

But this is not the case with Sue Diller. In fact, she's not only able to accomplish this chore—she's so good at it that she's now a member of Texas Tech's meats judging team. And she does so well that coach Dale Zinn says she's actually leading the team in practice.

"She's particularly strong in writing reasons, a big part of the contest," Zinn said.

Sue is the first girl to make a Tech judging team, and one of few ever to compete on any meats judging team. She won the berth by placing in the top four in Tech's meats judging and grading course last semester.

The team's first competition was at the Southwestern Exposition and Fat Stock Show in Fort Worth in February.

Started In Zoology

Sue is a senior animal husbandry major, with emphasis on the animal science option.

"Even though the courses I wanted to take were in animal husbandry, I enrolled in zoology when I entered college," Sue explained. "Guess I was scared of all those boys in animal husbandry. There were just too many of them."

She is one of five girls majoring in animal husbandry at Tech.

Sue's interest in animal husbandry is not surprising. She was reared on a ranch near Albany and admits that she enjoyed it—and still does—very much.

Trilled Dad's Footsteps

"I always followed my father's footsteps," she recalls. "Naturally I saw quite a bit of the ranch."

"The ranch" includes a 960-acre spread near Albany and 3,470 acres at Deer Trail, Colo., about 60 miles east of Denver. "During the winter we keep the cattle on the ranch at Albany, then move them to Colorado for the summer," Sue explained. "This makes the climate better for our feeder calves."

Sue has four older sisters and a brother, but she's the only one to continue interest in a field related to ranching. One sister studied music, another mathematics, and her brother is a modern artist who teaches at Madison College, Harrisonburg, Va.

Likes To Hunt, Fish

Sue also has a hobby that most girls would consider somewhat unusual—hunting and fishing.

"I especially like to hunt predatory animals, such as wolves, bobcats, etc.," she said. "But I must admit that I'm a little afraid of them."

Sue has talents other than judging that come in mighty handy around Tech's animal husbandry department. For example, last year she edited the Block and Bridle Club's annual report covering the year's activities. The report won fifth place in the national contest, with more than 30 competing.

"It's a lot like a scrapbook, and boys just don't enjoy working on such things as much as girls," she said.

Sue isn't sure of her plans following graduation in May, but she's certain that her meats judging experience will help in whatever she does.

"I might use the training to work for the government in meat trading and inspection," she said. "But it also will be valuable to me as a housewife by helping me to get the most and the best for my money."

Sue said her fiancée is a cotton farmer near Slaton and "my experience will surely come in handy since it looks like I'll stay on the farm."

Calhoun, Taylor Head Recruiting Of Top Students

Frank Calhoun, '55, of Abilene and Haskell Taylor of Lubbock have been named Chairman and Vice-Chairman, respectively, of a committee of the Ex-Students Association to recruit outstanding academic students for the College.

Last year the Association office mailed personal letters to the Valedictorians and Salutatorians of all the high schools in the state. The letter congratulated the students on their academic achievement, extended them an invitation to visit the Campus and urged them to consider Tech when choosing a college or university to attend.

The results from last year's program were gratifying and a great number of the honor graduates sent letters entered Tech last fall, Calhoun pointed out. This year, we have decided to continue and expand the project to include other honor students in addition to the valedictorians and salutatorians.

Personally typed letters with maps and other information about Tech were mailed early this month by the Association office to honor students throughout the state. In addition, Tech Exes living in the area of the students are being asked to visit personally with the students about Texas Tech.

Tech's Original Bandmaster Reaches 100

Harry LeMaire Sr., who organized the first Texas Tech band and later wrote the Matarador Song, celebrated his 100th birthday at his home in Lubbock recently.

Members of the family and longtime friends dropped by during the day to help commemorate the occasion.

LeMaire has two sons, Harry Jr., Lubbock, and Bruce Little Rock, Ark., and three grandchildren. He and his wife have been married 38 years.

Still active, LeMaire does small chores. In November 1960 he directed the massed bands at Tech's annual Band Day festivities.

He was born April 5, 1862 in London. After coming to America he served in the Spanish-American War and World War I, retiring as Army band leader. LeMaire moved to Lubbock in 1925, the year Texas Tech opened its doors.

The story goes that one day LeMaire was walking across the Tech campus when he saw 14 students trying to organize a band. He stopped to help and later became the first band director, retiring in 1934.

The first band had but 20 members, but the number doubled by the end of the year.

Tech owned no instruments until 1934, and students used borrowed instruments and read music LeMaire borrowed from the National Guard armory.

UNUSUAL TALENT—Sue Diller of Albany confers with Henry Elliot, manager of the meats industry laboratory at Texas Tech, on advice in grading this piece of meat. Sue is the first girl to make a Tech judging team, and one of the few ever to compete on any meats judging team.

Cites Growth Of Tech Exes

(Continued from page 1)

do! If someone does not ask you specifically, then "Look for an Avenue of Service."

I would like to mention a few of the avenues that you might look to:

- (1) Our Association has undertaken a program of attempting to attract outstanding students who rank high in scholastics, student leaders and also helping the athletic department in recruiting athletes. Talk with these students in your area. Tell them about Texas Tech.
- (2) Take an active part in local chapter organization in your area. Attend Tech Day activities.
- (3) Send news items about Tech Exes in your area to the Ex-Students office.
- (4) Talk Texas Tech. Be a Chamber of Commerce for Tech all by yourself.
- (5) Encourage employment of Tech graduates and students.
- (6) Our organization is supported by Ex-Students of Texas Tech. The amount of good that we can do for Tech is determined by the services and the projects and these are limited only by the budget. May I therefore suggest as a last avenue of service that you support Texas Tech and your Ex-Students Association with your gift to the Texas Tech Loyalty Fund.

W. J. MILLER

W. J. Miller Dies; First Eng. Dean

William J. Miller, Texas Tech's first School of Engineering dean, died of a heart attack Tuesday night (March 20) in Kerrville.

The funeral is scheduled for Friday in Kerrville.

Miller served as dean from 1925-31. In 1931 he was the first of the pioneering deans to leave Tech.

Only 31-years-old when he became dean, he was responsible for establishing Tech's chapter of Tau Beta Pi, national honorary engineering fraternity.

He was an alumnus of the University of Texas and Massachusetts Institute of Technology.

"During the fall of 1931, Dean William J. Miller resigned, his resignation effective the following January. With sound vision and aggressive leadership, he had laid the foundation of engineering work at Texas Tech," Ruth Horn Andrews writes in Tech's "First Thirty Years."

"He could return to his chosen field, the teaching of electrical engineering, with the assurance that at Texas Tech he had built wisely, along sound and progressive lines," she continued.

Miller is survived by a sister, Mrs. C. V. Bullen of 2323 - 18th St. in Lubbock. Her husband, C. V. Bullen, became head of Tech's electrical engineering department following Miller. He is now retired and presently professor emeritus in that department.

Engineers Plan New Curriculum

Texas Tech will institute a new "core curriculum" in engineering next September.

The new curriculum, which covers freshmen and sophomore years, will intensify basic training on which engineering students later can build careers in specialized fields, Engineering Dean John R. Bradford said.

With this basic training, an engineering student will be better prepared to adapt to the rapid advances in science and technology and to lead in bringing such advances about, Dr. Bradford pointed out.

The new curriculum is a rearrangement of courses within Tech's current programs and degrees, Dr. Bradford explained. There are no new programs or degrees involved.

Next fall all Tech's beginning engineering students will be required to enroll in the core curriculum. After completing two years of the basic studies, each student will proceed to his major and receive intensified specialized study in it.

The core curriculum will emphasize the basic physical sciences, mathematics and the theoretical approach to engineering sciences.

"A new concept of mathematical study is involved," Dr. Bradford said. "No longer will the student pursue the basic subjects of algebra and trigonometry for an engineering degree."

"Instead he will embark on analytics and calculus under the assumption that he already understands algebra and trigonometry."

This move by Tech is being co-ordinated with the similar moves at all other state-supported institutions in Texas and Oklahoma in an effort to concentrate and extend the level of undergraduate training, Dean Bradford said.

He pointed out that the core curriculum will allow all engineering students two years in which to discover their special fields of interest.

It also will allow the engineering departments to concentrate their course offering and thus do a better job of specialized training.

There are 2,304,252 square feet of floor space at Tech that must be cleaned daily. This is equal to 52.9 acres.

Tech Named Seismological Observatory

Texas Tech has gotten an early start as one of 125 proposed observation stations in a world-wide seismological network sponsored by the U. S. Coast and Geodetic Survey.

Under the program, the Survey provides the highly sensitive equipment at carefully selected locations. The stations furnish the facilities, and copies of all records are returned to the Survey for study.

Deskin H. Shurbet Jr., professor of geology at Texas Tech, is in charge of the local seismological observatory. He is aided in the project by two student assistants, James Suggs, a senior from Odessa, and Charles Blumentritt, a senior from San Angelo.

"Tech is one of the earlier observatories in operation in the new network," Shurbet said. "We installed the equipment from September to December of last year, and since December we have been testing to determine at what sensitivity we can operate."

The equipment which detects ground motion is buried in a 10x15 foot underground room near the Tech observatory. Recording instruments are in the observatory.

Aim of the world network is to study earthquakes in an attempt to learn more of the physical structure and the history of the earth.

"By pooling the information received, the Geodetic Survey hopes to determine at least two things," Shurbet said. First is the total number of quakes in the world, and second is the distance one observatory can detect a small quake.

In explaining this, Shurbet said that present observatories can detect large earthquakes anywhere in the world. However, there are numerous small quakes that remain undetected. The network will close the gap between existing observatories to record these small quakes.

"We will detect perhaps more than 1,000 earthquakes a year," Shurbet said. "It will be a very rare day when we won't record a quake."

However, most of these are not noticeable to man.

Tech's equipment will be able to detect earthquakes on the other side of the world.

In fact, the equipment has sensitivity to magnify ground motion up to 50,000 times. This causes the graphs to detect heavy traffic on campus, especially when cars jam the area for sporting events.

The instruments also record the effects of weather conditions on ground movement. On March 10 and 11 when West Texas winds reached 60 mph, the graphs recorded movement caused by wind-blown trees and by buildings under wind pressure.

"It amazes most people to learn that the earth is never still," Shurbet said. This is obvious by studying the graphs which keep a 24-hour record every day. All lines show earth motion. There is never a straight line.

"This constant movement is always traced to a storm or normal motions of the sea," Shurbet said. "Week before last when the East Coast was hit by that big storm, our instruments reflected the results."

Shurbet makes a daily report of recorded earthquakes to the U. S. Coast and Geodetic Survey. Periodically, the daily graphs are sent to the Survey for study.

Only time will tell exactly what new information man may gain as a result of the world-wide seismological network.

TEXAS TECH UNDERGROUND—Prof. Deskin H. Shurbet, Jr. adjusts one of the super-sensitive instruments in Tech's new underground seismological observation station. It is part of a new world-wide network of 150 stations which will study earthquakes in an attempt to learn more of the physical structure and history of the earth.

Class Of '37 Seeks To Locate Missing Ones

An attempt is being made to work up a special directory of the members of this year's Silver Anniversary Class (1937) of Texas Tech College.

Listed below are the names of members of the class that the Association office has been unable to locate. Any information about these Ex-Students that anyone can supply the Association office will be appreciated.

1. Addison, Alice
2. Allen, Annabel
3. Alverson, Johnnie Vaughn
4. Appleton, Leonard Roald
5. Atchison, Carroll John
6. Bailey, H. Leon
7. Bain, Woodrow Wilson
8. Beasley, Juanita Jo
9. Black, Samuel Marvin, Jr.

Tech Enrollment Representative

Students from 221 of Texas's 254 counties registered at Texas Tech this past fall according to figures recently released by the registrar's office.

There were 457 students from states other than Texas. They represented 44 states. There were 52 students representing 26 foreign countries.

Dallas County continued to send the largest number of students to Tech, outside of Lubbock County. There were 664 students from Dallas County, an increase of 78 over 1960.

For the second straight year, Harris County was in second place. There were 454 students from Harris, an increase of 100 over 1960. Popularity of Tech in Harris County has been just the last few years. Eight years ago, in 1953, there were only 23 students enrolled from Harris County.

Other counties from which large numbers of students were enrolled at Tech are: Tarrant, 345; Hale 240; Potter 233; Mid-

Council Plans To Change Tech School Song

In an unexpected move recently an ambitious new plan for giving Texas Tech an official school song and for immortalizing zealous Techsians was announced by the Student Council Name Change Committee.

Wayne Underwood, Student Assn. vice president, declared in the announcement that "O, College Mother Beautiful" was Tech's official school song and not the Matador Song.

Explaining that neither song had won the support of the student body, Underwood said that the Council will embark on a campuswide project to find from among Techsians a song that will eventually become a popular school song.

Remarking that Tech has exactly three known songs which can be called its own, Underwood said the Council will ask Techsians to join in an effort to solve the song issue which developed into a controversy last semester.

According to the plan, the Council will urge Techsians to put into words some of their ideas about Tech and then submit them in verse form to the Council. The music department will cooperate with the Council by supplying the music and other technical help.

Each song submitted, after the music has been written, will be played at various Tech events. The most popular songs will eventually evolve as original Tech songs. Out of these songs will come the official school song.

The Techsian who supplies the words for a song will receive recognition and if his song is the most popular, it will become the official school song. "The student will become immortalized and his song will last as long as Tech," Underwood said. "I think this is a move and a start," he said in explaining the plan for finding real Tech songs.

About the official school song, "O, College Mother Beautiful," Underwood said that it was written in the early days of Tech and has since been forgotten.

Techsians "with words to a Tech song" are urged by Underwood to write them down and take them to the Council office in the Ad Bldg.

"Both the Student Council and the music department will give any help necessary—all we need is the words," Underwood commented.

The announcement resulted from weeks of study on the school songs by the Name Change Committee of the Council.

Dad's Day Slated Here on Nov. 17

November 17 will be the 1962 Dads Day on campus. That is the day the Red Raiders play Colorado University in football. Tech Dads might also note that Oct. 26-27 will be 1962 Tech Homecoming weekend, with the Red Raiders meeting Southern Methodist University that Saturday. The association has received its charter from the state, and will now become the Texas Tech Dads Association, Inc. Dads Pres. Rigidon Edwards of Sweetwater is setting up committees for a number of association projects.

land, 193; Ector, 172; Taylor, 154; Hockley, 153; Gray, 125; Lamb 110; and Bexar 102.

Of the 10,212 students enrolled last fall 6,799 of them were men and 3,413 of them women.

Dr. Davis Explains Need, Presents Newest Proposal

(Ed. Note: Dr. Davis' article is presented for informational purposes at the request of the Faculty Advisory Committee, to further explain to all groups why they feel there is a need for a name change, as well as to present their new proposal.)

At the recent graduation exercise at Texas Technological College, Commencement Speaker, Mr. Fred Moore (class of 1930) urged the importance of the characteristic of "Adaptation to Change." Pointing out the inevitability of change he warned against the fear of change and admonished the graduating seniors to adjust to changing needs and circumstances as occasion arose.

This admonition is particularly appropriate today to Texas Tech as an institution and to all of us personally in our attitudes toward the name of the institution. Times and circumstances seem to suggest that a name change is appropriate now, and I, for one, am ready to adjust to this need for change.

I doubt that there is any person who, over a long period of years, has been more active than I in "selling" the name of Texas Tech. For the twenty-five years that I have been associated with the institution I have attempted to push the name and prestige of Texas Tech at every opportunity. In academic, athletic and civic activities I have considered myself a salesman and promoter for Texas Tech — the name and the institution.

It is therefore understandable that I was not particularly interested in the early movement to change the name of our in-

stitution. I felt that I was so closely associated with that name that I could never adjust to a different name even though I could admit that it was not particularly descriptive of our present institution. I had developed a sentiment and attachment for the name as well as the institution, and the two seemed inseparable.

I have now changed my mind and have come to believe that a change of name is desirable for the changing role that our institution is now playing and is destined to play in the future. I have also come to accept the fact that the present name is something of a handicap, and that a name more descriptive of our activities and more suitable to our future goals would be advantageous.

I would like to present a two-fold proposal to the ex-students of Texas Tech: 1) the need for a change, and 2) an appropriate and, I hope acceptable name for the institution.

I am sure that the disadvantages and handicaps of the name "Texas Technological College" are more apparent to the faculty of the school than to students or ex-students. Our activities keep us constantly in touch with other institutions of similar size and objectives. We associate with professors from all over the country and we maintain contacts with other institutions for professional purposes and for the benefit of our students and ex-students.

We have found, especially in the last few years, that we as faculty members, and the reputation of the institution itself, suffer from our improper label.

To many persons, especially those away from this region, the name means what it says. The name "Technological College" is neither descriptive of nor flattering to our institution.

A college has limited purposes and functions, usually indicating a specialization in a particular academic field. A Technological College signifies a specialized school emphasizing engineering and technology. Frequently the designation includes reference to vocational type education and rarely ever does it embrace the idea of a large number of very different disciplines with the great common core of the Arts and Sciences.

Traditionally the term university has meant a community of scholars dedicated to the search for truth. More conventionally,

(Continued on page 4)

Dr. Davis

Doors Open On Library

The Last of Texas Tech's 517,000 books and other volumes

were moved in July 21, and the Tech library was "at home" in its new building.

FAC Call For Vote

Texas University of Arts, Sciences and Technology is the name now being proposed by the Faculty Advisory Committee as the new title for the College.

In a special meeting late in May FAC, which is the group of elected officers of the faculty, voted unanimously as favoring this name. The group decided to call for a vote of the entire faculty in early September on this new proposal. In a vote on the name change several years ago, the faculty voted in favor of Texas State University.

Last spring in a very close vote the student body voted to favor a change to Texas State University. In February, 1961, the Executive Board of the Ex-Students Association voted in favor of a name change to Texas Tech University. This name would include a new word, "Tech," and would not be an abbreviation of the word technological.

The adjoining article, by Dr. J. William Davis, explains why the faculty feels a need for a change, and why he prefers Texas University of Arts, Sciences and Technology.

FAC has expressed the hope that the Ex-Students Association Council will consider the new name at its annual Homecoming meeting, where a favorable vote by the Council would be required to change their recommendation. The Council consists of each chapter president, district representatives, members of the Executive Board, and all

(Continued on page 4)

Until completion of the move, students and faculty used card catalogues in the new building to find where the volumes they were seeking were located. The new library was open from 8 a. m. to 5 p. m. on weekdays, and the old library was on its regular summer hours, with both buildings closed on Sundays.

Now that the transfer is completed, library users have the advantage of open stacks, refrigerated air conditioning, excellent lighting, new facilities, and plenty of space in which to study.

Librarian Ray Janeway and his staff celebrated the end of the move July 20 with the cutting of a large white cake. Inscribed on it were the words "At long, long, long last." Above the inscription was a candy drawing of the new library.

Summer hours are now 7:10 a. m. to 10 p. m. Monday through Thursday, 7:10 a. m. to 5 p. m. Friday and Saturday, and closed on Sunday.

The contract for construction of the edifice was awarded by the Tech Board of Directors in May of 1961. Target for completion was originally the fall of 1961.

According to Tech's Public Information Office, formal dedication of the new building will be held later this fall, probably in October.

Exes Win Demo Primaries

Three Tech Exes were nominated in the Democratic primary for major state offices, and several other alumni were nominated for the Texas legislature in elections this summer.

Two Lubbockites, Preston Smith and Waggoner Carr, will be facing Republican opposition

in the November general election for the highest offices in the state next to the governorship. At the same time John C. White was nominated for another term as Agriculture Commissioner.

In addition, several Exes were nominated in the primary to represent their party in the general election for State Legislature. Among these were H. J. "Doc" Blanchard, Lubbock, for Senator; Bill Parsley and J. Collier Adams, both of Lubbock, for Representatives; Renal B. Rossom of Snyder; Wayne Gibbons of Breckinridge; Olen Petty of Levelland; and Randy Pendleton of Andrews, a government major now attending Tech.

Smith, nominated for Lt. Governor, graduated from Tech in 1932. A veteran member of the legislature, he served both in the House and Senate, from which he resigned to make the race this year. He ran third in a field of 12 candidates for the same office in 1950.

Carr, a 1940 graduate of Tech, was a pre-law major and president of the Debate Club. He served twice as speaker of the Texas House, and had made one previous attempt for the Attorney Generalship before his successful bid in June.

Incumbent John White was graduated in 1946 with a BS degree. He was head cheerleader in 1945-46, a member of the Saddle Tramps, the Aggie Club, and the College Club.

In the first primary three other Techsans sought election, but were defeated. They were Bill Street, for State Supreme Court Justice; Joe Phillips of Lubbock, running for Congressman at Large; and Marshall Formby of Plainview, who was an unsuccessful candidate for governor of Texas.

System Changed

Any Tech graduate who has filled out an application for employment in some other section of the country may have in the past had the experience of having his grade-point average appraised somewhat skeptically.

This was probably not due to his actual grades, but due to the fact that the majority of universities are on a four point grading system, and Tech has been on a three point system.

All this will be changed, however, when Tech converts to the four point system starting with the fall semester this September.

Dr. W. M. Pearce, Academic Vice President of Tech has announced the change, upon the recommendation of the Council of Deans with the approval of President R. C. Goodwin.

Beginning with the fall semester the grades of A, B, C and D will carry grade points of 4, 3, 2 and 1, respectively, for each semester hour of credit in the course in which a grade is earned. Previously Tech's system gave three points for A, two for B, one for C, and nothing for a D.

Dr. Pearce explained that the change was made so that the grade point averages earned by a student will more accurately reflect the grades received. Under the former system no distinction was made between the grades "D" and "F" in the matter of grade points.

The net effect on graduation requirements will be the raising by 1 the grade points necessary, so that students will be required to have a two-point average to graduate.

"Present students may graduate under the bulletin requirements they entered under, and where the student's grades will be affected by the change, the case will be handled individually to insure all fairness to him," Dr. Pearce said.

Students transferring credits from an non-accredited institution must validate all credits with a two-point grade average on the first 30 hours of residence at Texas Tech. The student may be dropped at any time he falls below a two-point during the first 30 semester hours.

At the option of the academic dean, transferred courses with a grade of D or equivalent may not be accepted as meeting degree requirements.

A former Tech student who has attended another college after leaving Tech must meet the appropriate quality requirements as indicated for transfer students.

According to Donald Renner of the Registrar's Office, the change to four point grading should have an effect on job interviewing favorable to the Tech graduate.

John C. White

Married Students' Housing Becomes Reality As Construction Continues

Construction has started on a housing project for Texas Tech married students available early this fall when first units open in the \$1.3 million apartment development just north of the campus.

In its initial state, the privately financed and operated project will include 200 apartments in seven buildings located between Detroit and Elgin Streets and Second and Third Place.

Developers are Howell Killgore and Michael C. Grinnell. Designer is Houston Miller.

The developers said the apartments will be exclusively for Texas Tech married students and the average rent for an apartment will be around \$80 per month, furnished and with utilities paid.

Each apartment will be air conditioned and will contain 600 square feet of floor space including a bedroom, living

room, combination kitchen-dining room, bathroom, and four closets plus linen storage.

The living room and bedroom will have wall-to-wall carpeting. Asphalt tile flooring will be used elsewhere. Furnishings will be of contemporary design and will include draperies.

Exterior walls of the two-story apartment buildings will be brick and stucco. Interior walls will be plaster. All construction

will be semi-fireproof.

Features of the new development will include a swimming pool and recreation room, laundry room, fenced play area for children and community patio areas among the buildings.

The initial stage of the new development is scheduled to be completed by next April. Further additions to it will depend on the success of the initial operation.

Tech Graduates Succeed In Finding Positions Fast

Around 60 per cent of Texas Tech's 1962 graduates have already been employed since their graduation, the Tech Placement Service reports.

In addition to this high employment record, Tech's January and June graduates are receiving salaries about \$20 higher than the national average. The results were found in the College Placement Salary Survey Report released this month to the 82 participating colleges.

The survey revealed that scientists and engineers continued to be sought in large numbers, but seniors in non-technical curricula raised their average in the 1961-62 recruiting season.

Salary offers to seniors in

the non-technical disciplines averaged \$24 higher this year than in 1960-61. The increase more than doubled the \$10 hike non-technical experienced from 1959-60 to 1960-61 and boosted the monthly dollar value of beginning offers from \$452 to \$476.

The most significant examples of Tech's leadership in beginning salaries are the offers made to electrical engineers by aircraft manufacturers.

Computation of the final results again found electrical engineers in the aircraft field as the leaders among employees in both dollar average and volume of offers, a position which they maintained throughout the year.

Peace Corps Accept Service Of Techsan, John Parrish

Four years of study at Texas Tech is providing the background for a recent graduate, who'll be leaving for a Peace Corps assignment in Liberia this month.

He is John Parrish of Kaufman, a government major who has wanted to enter the Peace Corps since its approval. He received notification of his assignment May 4.

Three Techsans Chosen
Parrish is one of three known Techsans chosen for the corps' training program this spring. Larry Caskey of Bryson, a horticulture major, is going to India

and Bobby Brick of Dallas, a secondary education major, is scheduled for an assignment on the Samoa Islands.

After finishing the rigorous physical training program and the orientation course, Parrish will teach basic social science courses in Liberia's secondary schools.

"I feel the real value of my being chosen, besides the traveling aspect, is the broadening of my outlook towards life and humanity," Parrish said.

George Mahon . . . receives honorary degree

Tech Graduates 995 In May, Exercises Sets Another Record

Texas Tech's largest graduating class — 995 strong — were honored with two days of activities as the institution observed its 36th annual spring commencement.

Dr. John W. Lancaster, pastor of Houston's First Presbyterian Church, preached the baccalaureate sermon in Lubbock Municipal Coliseum on the Tech campus.

Principal address at commencement exercises on May 28 in the Coliseum was delivered by Fred H. Moore of New York City, Mobil Oil Co. president and a Tech graduate.

An honorary Doctor of Laws degree was conferred on Cong. George Mahon at the ceremonies.

The Class of '62 came within a whisker of reaching the historic milestone of 1,000 graduates for a single commencement. A total of 1,052 filed as candidates for degrees but final exams and emergencies shaved the list five shy of that milestone.

Commencement activities began with a reception by Tech President and Mrs. R. C. Goodwin honoring graduates and

their families in the Tech Union Building.

The baccalaureate service included a procession by the graduating class and faculty and special music by the Tech Choir.

Thirty one Tech Army and Air Force cadets received commissions as second lieutenants in separate ceremonies.

The Rev. Dudley Strain of Lubbock's First Christian Church was main speaker at the Army ceremonies when eighteen cadets received their bars.

Thirteen Air Force cadets heard Col. Walter Kerbel, of Lackland AFB bring the principal address at their commissioning. Col. Kerbel formerly was stationed at Reese AFB here.

Two students received doctorates in the commencement ceremonies.

The doctor of philosophy degree in chemistry was conferred on William J. Heilman of Pittsburgh, Pa. Robert L. Clinton Jr. of Snyder received the doctor of education degree.

Fifty-eight students were awarded masters' degrees during the ceremonies.

Longtime Professors Retire

Four long-time faculty members at Texas Tech have retired this year, and one other has resigned to accept a new position.

O. C. Southall, James Murdough, Thomas F. Wiesen, and Mrs. Vivian Johnson Adams all have announced plans for retirement; and Stanley E. Anderson his resignation.

Anderson, associate professor of animal husbandry at Texas Tech, has resigned to accept a position with the American Angus Assn. at St. Joseph, Mo., effective Aug. 30.

While at Tech, Anderson has compiled an outstanding record as a livestock show judge, teacher and coach of winning livestock and meats judging teams.

Since 1959 he has been a judge in the Chicago International Livestock Expositions, one of two U. S. citizens selected for such a position since the Expositions were founded in 1900.

"After teaching animal husbandry at Texas Technological College for 14 years, it is with much reserve that I resign to accept a position with the American Angus Assn.," Anderson said.

"My family and I will miss Lubbock, Texas Tech, the Southwest and our many friends that we have known through these 14 years. I want to express our

great appreciation to the many people in this area for the influence they have had on our life, past — present and future."

Commenting on Anderson's resignation, Dr. Gerald Thomas, Tech agriculture dean, said, "It is with sincere regret that we accept the resignation of Prof. Stanley Anderson. Stanley has made many contributions to Texas Tech. His activities as a beef cattle judge at the Chicago International, his outstanding services as a coach and teacher, have helped the beef cattle industry and our college."

Southall, assistant professor of chemistry and chemical engineering at Texas Tech is retiring after 18 years of teaching here.

His retirement will become effective Friday, Dr. R. C. Goodwin, Tech president, said.

Southall came to Tech in 1944 after years of administrative duties in West Texas high schools and teaching in Tech's pre-cadet training program.

"It has been a very pleasant 18 years spent here in the chemistry department," Southall said. "I plan to do a little fishing and traveling now."

Southall received the bachelor of arts degree from Hardin-Simmons University and the master of arts from Tech. He has done additional graduate work at the University of Texas.

A native of McKinney, Southall is married to the former Natha McCoy. They have three children — Culver, McCoy Southall of Lamesa and Roger Lewis Southall and Mrs. Howard Branson, both of Lubbock.

He served as secretary of the Texas Certified Seed Growers' Assn. in 1954.

A woman who has given 34 years to training home economics teachers at Texas Tech will retire May 31 with the rank of professor emeritus.

She is Mrs. Vivian Johnson Adams, head of the home economics education department since 1937. She has served on the School of Home Economics' faculty longer than any other person.

Dr. R. C. Goodwin, Tech president, said in announcing her resignation: "As a faculty member since 1928, Mrs. Adams is one of the persons who have been influential in shaping Texas Tech's rapid growth. We are grateful to her for her leadership in this and for the training she has provided for hundreds of home economics teachers. Our best wishes go with her and Mr. Adams."

Mrs. Adams came to Tech in 1928 — three years after the college's founding in 1925. She was the seventh member of the home economics staff at that time and has seen the school's faculty expand to 31 present members.

During her tenure at Tech she pioneered the establishment of home economics student training centers in Texas, with the first one at Slaton.

"Without these teaching centers I feel the growth of home economics education would have been stifled," Mrs. Adams said. "Due to the cooperation, interest and willingness of our area schools, these centers became a reality."

As department head she helped establish the graduate program in home economics education in 1937. Forty-five graduate degrees have been awarded from that department since that time.

Mrs. Lila Kinchen, now associate professor of clothing and textiles at Tech, was the first master's candidate in that department.

Upon her retirement, Mrs. Adams said she plans to keep up with her professional organizations, spend some time with her family and friends and "do a little fishing and gardening."

She also plans some traveling with her semi-retired husband, Otto V. Adams, part-time professor emeritus in civil engineering who was Tech's engineering dean for 17 years.

Thomas F. Wiesen, chairman of the original committee to develop Texas Tech's School of Business Administration, will retire from teaching with the rank of professor emeritus May 31.

"Professor Wiesen has served well and faithfully," Tech President R. C. Goodwin said in announcing Wiesen's retirement. "We regret his leaving, but extend our best wishes for the future."

Wiesen came to Tech in 1940 as a member of the department of economics and business administration. Of his 22 years at Tech, he served 16 of those years (1942-58) as economics department head.

"After 22 years of meeting deadlines, I plan to travel and continue research in my favorite fields of international affairs and trade relations," Wiesen said. "I will never reach a point

where I don't have an interest in Tech since my roots were planted here so long ago," he said.

Wiesen served on the first committee which saw the economics and business administration department in the School of Arts and Sciences evolve into the present School of Business Administration. He also was one of only three instructors in the department who continued teaching during World War II.

One of the professor's greatest contributions has been his help in building the economics library to one of the best of its size for a non-doctoral program.

"He has been an ardent collector of the economics section since my coming to Tech," R. C. Janeway, library director, said. "He has built a collection of high quality with more than 2,500 volume requests in the past 10 years."

Wiesen received the B. S. degree from Texas A&M College in 1920 and shortly after his graduation began teaching at Boone University in Wuchang, China. While there he traveled extensively in China, Korea, Japan, the Philippines, Malaya, Ceylon, India, Egypt, France, Germany and England.

In 1932 he received the M.B.A. in foreign trade from Wharton School of Commerce and Finance. For three years he studied international economics at the University of Pennsylvania.

"The work of Professor Wiesen has immeasurably strengthened our department and school," Dr. Robert L. Rouse, economics department head said. "Largely through his efforts, we have an excellent library in economics."

James Harold Murdough, one of the three remaining original members of the Texas Tech faculty, will retire with emeritus rank May 31, Tech President R. C. Goodwin announced this Spring.

Dr. Goodwin also announced that Dr. Keith Marmion of Tech will succeed Murdough at the helm of the civil engineering department. Marmion will be acting head.

A Bostonian by birth and a graduate and faculty member at Massachusetts Institute of Technology, Murdough has been an ardent booster of Texas Tech and the Southwest ever since coming here.

"I would be ungrateful indeed if I did not express my appreciation for the great privilege which I have had of being a member of the faculty of Texas Technological College," Prof. Murdough said.

"For here I have been engaged for most of my mature life in work which I have enjoyed, have lived in a part of the country most congenial to me, and have worked and lived with the finest kind of people there are anywhere."

Murdough has headed the civil engineering department for 35 years. Symbolic of its spirit is the Murdough chapter of the American Society of Civil Engineers, which is sponsored by Prof. George Whetstone.

The group has been named the outstanding chapter in Texas for three straight years. It has received six commendation awards, more than any other chapter in Texas. It was the first Texas chapter to receive such an award.

In 1961, Murdough was named Engineer of the Year by the South Plains Chapter of the Texas Society of Professional Engineers.

Murdough holds a bachelor's degree from Massachusetts Insti-

stitute of Technology and a master's in civil engineering from the University of Michigan. He has been inspector for the Massachusetts Highway Commission, a draftsman in the U. S. Army field service, and aeronautical structural engineer for the U. S. Army Air Service, a sales engineer, and an instructor at MIT, Oklahoma State and Tech.

O. C. SOUTHALL

VIVIAN ADAMS

THOMAS WIESEN

JAMES MURDOUGH

Top Educator Commends Tech's NDEA Contributions

A leading educator and psychologist has commended Texas Tech for its contributions in four National Defense Education Act programs.

Dr. H. M. Kreitzer of Dallas, regional representative for the NDEA Higher Education Council, spent two days at Tech observing the NDEA-sponsored guidance and counseling institute conducted by the psychology and education departments this summer.

He said that Tech was one of the few institutions in his 180-school region who has participated in all four programs. Included are the student loan fund, language institute, graduate fellowship program, and counseling and guidance institute.

Dr. Kreitzer has visited Tech three times in the past two years to discuss and help prepare proposals for the Tech NDEA programs. He serves as a liaison officer between the Southwestern schools and the Washington office.

His five-state region includes accredited colleges and universities in Texas, Oklahoma, Arkansas, Louisiana and New Mexico.

Dr. Kreitzer said schools who are not accredited might participate in the NDEA programs if three other schools will accept their credits.

Commenting on Tech's guidance and counseling institute, he emphasized the excellent planning and organization of the course under Dr. Beatrix Cobb's leadership. Dr. Cobb is director

of Tech's Rehabilitation Counselor Training Program in the psychology department.

He also cited the good cross-section of the "able under-achieving" students selected for counseling. Tech's institute is being held June 18-July 27, with 30 public school counselors from the Southwest participating.

Dr. Kreitzer was formerly dean of Lebanon Valley College in Pennsylvania. He received the B. A. degree in psychology from Boonesville College, the M. A. from New York University and the Ph. D. from Temple University.

Faculty Returns

Several professors who have previously announced their retirement will be back at Tech this fall, teaching on a part-time basis.

Dr. A. L. Strout of the English department, who retired last year, will be returning to Tech, as will Dr. Ralph Underwood of the mathematics department, Dr. S. S. McKay and Dr. Kinchens of the history department, Dr. Barnett in Education, Morley Jennings in physical education and Wm. W. Merz in the physics department.

Dr. William Pearce, Academic Vice President, explained that the 57th Legislature passed an act last year permitting retired teachers 65 or older to teach on a part time basis, not to exceed six hours a semester or two hours in the summer session, on invitation by the department head.

"This enables our institution to utilize the knowledge and experience of our senior faculty members who might otherwise go into full retirement," Dr. Pearce said.

Officials Plan Andrews Meet

Members of the Coaching Staff and other College officials will be present to organize an Ex-Students chapter in Andrews the evening of August 14, when the exes living in that area will get together.

In charge of arrangements for the meeting will be Marshall Pharr, LaDoyce Lambert, Brode Hutcherson and Joe Albright.

Rec Hall Bows To Progress

Memories, Good Times . . .
come down with Rec Hall

Dr. Davis Explains Stand

(Continued from page 1)

a university has come to include a number of academic disciplines united under one administration and name, with colleges or schools as subordinate parts of the whole. (See President Goodwin's description of Texas Tech in "Report to the Board," *The Texas Techsan*, June 1962). Texas Tech has always been more of a universi-

ty type institution than a technological college. In recent years this anomaly has increased. We are now, and have long been, a university including schools of Agriculture, Arts and Sciences, Business Administration, Engineering, Home Economics, and a Graduate School. The fastest growing school is that of Arts and Sciences, which not only has 17 departments offering majors in their own right, but which also serves as the great common core of liberal education for the entire institution, providing 2/3 of all the instruction. This is not a "technological college" pattern.

The Graduate School is growing in numbers and in stature. Each of the five regular schools has graduate programs channeling through the Graduate School. Thirty-six departments now offer masters degrees and six departments award the doctoral degree. Plans are under way for several more doctoral offerings in the immediate future. The existing doctoral programs are all in the Arts and Sciences School as will be most of the additions. The Board of Directors is studying the prospects of a law school, a medical school and a pharmacy school for the future. This is not a "technological college" program.

As Texas Tech has grown and expanded its programs serious problems in securing faculty have been experienced. No school is better than its faculty and we want the best professors possible in accord with our aspirations for higher standards and goals. We want persons excellently educated from the

best universities of the country. We want them to join our faculty and stay with us to build for the future. It is difficult to attract talent to our school with the name that we now have. We are young and our reputation has not become established nationally. When an offer is made from a "technological college" to a professor in the social sciences or humanities he naturally views it with some skepticism. This is a "buyers market" in the faculty field, and almost any young Ph.D. will have offers from several institutions. We can understand their reluctance to go to a "technological college" in West Texas when there are opportunities to go to "universities" in other areas. It is very difficult to persuade a prospect that this "technological college" is larger and better than many of the so-called "universities."

What's in a name? Shakespeare asked. We have come to realize that there is a great deal that is important in a name and that many people, rightly or wrongly, judge an institution, at least partially, by its name. It has become difficult for this great thriving university on the south plains of Texas to continue to make the kind of progress we desire under the name of a "technological college."

I propose that the name of our institution be changed to that of a university — that we be given university status at a time when status is of great significance in the academic world, and that a name more descriptive of our activities and more commensurate with our educational goals be selected.

Now for the second part of this proposal — a name which will be realistic and acceptable. I propose that the official name of the institution be "Texas University of Arts, Sciences and Technology."

One will notice immediately that the first and last words of the title retain the association with Texas Tech. The double T would naturally remain the symbol of the institution and the term "Texas Tech" would continue to be used just as it is now. It has been interesting to note throughout the discussion of a name change that the proper name, "Texas Technological

The beginning of one of Texas Tech's most popular projects has come to an end.

Approved in 1928 and made a reality in 1947, the Tech Recreation Hall has been torn down to provide a scenic setting for the present Union Building area.

The old Rec Hall stood behind the present Union Building. A patio on the east wing of the \$1 million Union annex will overlook the area to be landscaped.

The former war-surplus building formed the beginning of the movement to materialize later as the Student Union. The inspiration for this movement came from a young English instructor at that time, who is now Tech's dean of student life.

Dean James G. Allen was chairman of the Committee on Social Affairs and read the following statement to the faculty on March 6, 1928, to start the recreation movement:

"It may be suggested that perhaps the one thing that would go farthest toward improving social affairs would be a student union or recreation hall."

The recommendation was approved in principle but 19 years passed before the abstract became concrete. In 1947 the Rec Hall was finally made possible by a gift of three army surplus buildings from the federal government. Two of the buildings were joined for a recreational area and the other was turned into a cafeteria.

The makeshift hall was neither luxurious nor beautiful, but it filled a gap of social life at Tech. The students danced on flooring that had been taken from a dining room of a women's dormitory and they played table tennis, chess, card, and just talked as they had pre-

viously tried to do in a crowded corner of the old bookstore.

College" is rarely used. Those who oppose a change speak of keeping the name "Texas Tech" and the Double T. (See "Letters From our Exes" in the June, 1962 *Texas Techsan*). We all constantly refer to "Texas Tech" as if that were the name.

The name I am proposing is too long and awkward to be used in common reference to the institution. We would still call it "Texas Tech" in everyday language and I feel that the full new name would rarely be used except for official or formal purposes.

The Double T would continue to be our athletic and institutional symbol, and if desirable, we could carry the words "Texas Tech" in quotations as a sort of a sub-title on our stationery and bulletins of the institution.

Here is a name that might be accepted by all interested groups and individuals. If we unite and agree on this proposition it can become a reality in the very near future. If faculty, students, and ex-students will all concede something and pull together for this name we can take one more step toward becoming the great university that we all envision.

After the Union Building was completed in 1952, the Rec Hall became known as the Campus Club, a facility for faculty and staff.

With the passing of the old structure, Tech now operates an 86,000 square-foot Union building, one of the finest in the nation.

Only scattered boards of the old building remained standing until this week, but many memories of the past 15 years lie in the area between the Music Building and the Administration Building.

1225 Wait On Room

Texas Tech's growth, which increases every year, is exemplified by the latest report from the office of Room Reservations.

At the last count 1225 names were on the paid waiting list to get into dorms this fall. This is above the capacity of the college, when added to those who have already been accepted.

According to Hubert L. Burgess, Supervisor of Room Reservations, reservations for women were shut off June 25 with a waiting list of 475. Boys' reservations were shut off June 25 with a waiting list of 475.

Approximately 400 potential students have had to be turned down so far. Mr. Burgess expressed the opinion that they will be able to accommodate the boys waiting list by August 15, but feels that there will be a number of girls they will be unable to accommodate.

Replacements for cancellations are being made in strict numerical order from the waiting list, with no deviation. Mr. Burgess has announced that August 15 is the deadline for applicants who have received room assignments to make cancellations and get their \$400 deposit returned.

Arrangements for the overflow are being made in as many cases as possible for in-town housing through the Deans of Men and Women.

Mr. Burgess pointed out that the college has under construction at this time a modern, air-conditioned hall with a housing capacity of 800 women. This hall will be ready for occupancy in September of 1963.

Also, the Board of Directors has recently authorized a loan application for another hall for women and one for men to be completed in September of 1964.

FAC...

(Continued from page 1)
past presidents of the Association.

Several representatives of FAC have declared that they believe this new proposal is the only name that the three groups might be able to agree on at this time, and hope to see the faculty, students, and Ex-Students unite behind this latest change. Indications are that the College Board will not consider any name change until there is agreement among the three groups.

A name change for the institution would take an act of the Legislature. The Legislature meets in January 1963, and will not meet again until 1965. Indications are that the Legislature would consider a name change only if it were recommended by the College Board of Directors.

Ex-Students, Officials Plan Homecoming

Planning is already underway for the 1962 Homecoming it has been announced by Ex-Student Association Executive Director Wayne James.

The annual Homecoming, which is scheduled for October 26 and 27, is expected to attract the largest crowds ever to attend a Homecoming celebration.

Special emphasis is being placed on the class reunions this year according to James. Classes from 1925 to 1945 will have their meeting and dance in the Caprock Hotel on Friday night. All other classes will also meet on Friday night at the newly enlarged Student Union Building. Special honor classes will be the classes of 1927, 32, 37, 42, 47, 52 and 57.

Also scheduled for Friday night is the Century Club Dinner, the Pep Rally and the Coronation of the Homecoming Queen.

Friday will be the time set aside for official meetings of the Ex-Student Association. The Executive Board will meet Friday morning and the Association Council will meet that afternoon. Main item of business on the Council agenda will be the election of officers for the Ex-Students Association.

Saturday morning will feature the annual Homecoming Parade. Theme of the parade will be "Red Raider Sernade". Floats will depict song titles.

Immediately following the parade will be the Ex-Student Luncheon.

The Red Raider football team will be host to the SMU Mustangs at 2:00 p.m. in Jones

Stadium in the annual Homecoming Football grid battle.

Saturday morning and night will also include numerous departmental, organizational and club open houses, coffees and receptions. Exes planning to attend Homecoming are encouraged by James to make their Hotel and Motel reservations as soon as possible, as many of the most popular places are booked up well in advance of Homecoming.

Shown above are this year's Red Raider Club officers, including Verlon Bigham, president; B. E. Rushing Jr., first vice president; Loyd Lanotte, second vice president; Frank Junell, third vice president; L. Edwin Smith, secretary-treasurer; and Robert J. Walker, past president.

IN TICKET BUYING

Polk Asks Haste

By Polk Robison, Athletic Director

We in athletics tend to shy away from making predictions, but here's a forecast I can safely make:

Some Texas Tech alumni who has tickets on the 10-yard line for the game with University of Texas here September 29 will discover that Longhorn fans are sitting on the 40-yard line.

A week later a Texas A&M former student will learn with just as much indignation that while he is sitting on the 10-yard line at Kyle Field for the Texas Tech-Texas A&M contest, there is a large group of Red Raider backers in 40-yard line seats.

All this stems from the contracts or agreements concerning seating at college football games. At practically every university the visiting school is allotted a bloc of tickets, generally on the east side, starting at midfield.

How, then, does a fan obtain "good" tickets to his own team's games?

Most obvious answer is to buy them on the east side, where the visitors do not have priority. But even on the east side, single game admissions are generally not available closer to midfield than the 10- or 15-yard line.

Since season tickets are sold first each year, it boils down to the fact that the person with the best chance at the best

seats is the season ticket purchaser.

We all must give priority to the season ticket buyers because they represent the nucleus of our financing. We must plan our expenditures according to the money on hand.

Our income, therefore, depends heavily on the sale of game admissions. And since season tickets to football and basketball games account for the biggest share of our proceeds, we must do everything we can to encourage the sale of season tickets.

Our primary incentive to the season ticket purchaser is the assurance of the best available seat to all games. So, until September 1 we fill nothing but season ticket orders. Beginning September 1, we start filling individual game requests, in the order received from the fans during the summer.

Visiting schools don't take all the east stand tickets (in advance, of course, we reserve the south portion of the east stands for our students), so there will be some tickets for the east stands sold here for Texas Tech fans. By the same token, we'll sometimes sell tickets in the west stands to the visiting school's fans, but those orders are just among those whose priority is determined by the date received here.

To the advice given above on

obtaining the best possible seats must be added a third and best method:

Purchase a stadium option.

Upon an option payment the fan is permitted to buy in a choice location the same seat year after year. In the \$300 and \$200 option areas the seats are of the comfortable folding variety. Other good locations are available in the \$100 area.

Regular season tickets this season are \$20. Season tickets also may be bought in the option areas — without a guaranteed renewal possibility for next year — for \$22.50 (\$100 area), \$25 (\$200 area), and \$30 (\$300 area).

This is a good year to begin season ticket purchases. On our home schedule are West Texas State, University of Texas, Southern Methodist, University of Colorado, and University of Arkansas. Other home schedules here will be comparable.

Tickets are available at the Texas Tech Athletic office on an individual game basis to these games as well as to our five road games — Texas A&M, Texas Christian, Baylor, Rice, and Boston College. They may be bought for \$4 each, plus a 25-cent mail order fee.

Requests for tickets or ticket information should be addressed to Mrs. Jim Wright, ticket manager, Texas Tech Athletic Office.

Raider Club Elects New '62 Officers

An increase in membership to almost double from its size in 1958 was announced by the Red Raider Club for 1961-62. In '57-'58 there were 574 members; in '61-'62 there were 1,132 members.

Officers for the club are Verlon Bigham, '39, president; B. E. Rushing Jr., '40, 1st vice president; Loyd Lanotte, 2nd vice president; Frank Junell, 3rd vice president; L. Edwin Smith, '38, secretary-treasurer; and Robert J. Walker, '34, past president. Leete Jackson is Executive Vice President, with offices located in the Lubbock National Bank Bldg.

The 25-members of the Executive Board, as well as the officers, reside in Lubbock. Twenty-eight Associate Directors live in towns throughout Texas and Eastern New Mexico. There are Red Raider Clubs in 18 cities, which usually hold an-

nual meetings in June and July.

Among the activities of the Red Raider Club are the annual "All Sports Banquet," held each spring in honor of all Tech athletes; and the special noon luncheon each Monday during football season at which time members of the Tech coaching staff speak.

Persons contributing over \$60 a year receive a special plaque. Three years ago the award of a special gold plaque was initiated for those giving \$1,000. Money for these plaques, available to individual businessmen and Red Raider Clubs, is used to provide scholarships for athletes with grade point averages higher than that of the overall student body. Last year 50 of these plaques were sold, providing room, board, books and tuition at \$1,000 per athlete.

Membership in the Red Raider Club is open to anyone interested in supporting Texas Tech athletics. No minimum amount is required for membership. Gifts should be made payable to the Texas Tech Foundation and mailed to Box 456, Lubbock. Gifts over \$10 are tax deductible. Anyone joining the Club receives a membership card, a decal for his car, and a coaches' letter each week during football season.

The first president of the Red Raider Club was Spencer Wells in 1929. Other presidents have been R. C. Smith, deceased; Parker Prouty; E. J. Parsons; H. DeWitt Landis of Dallas; Paul Cates; C. I. Wall of Amarillo; Homer Maxey, '31; L. E. Davis; Vernon Thompson, '38; Wayne Prather, '38; Allen Benton; and Robert J. Walker, '34.

All Stars Collide

Texas Tech will be the site of the Texas Coaching School All-Star games August 10 and 11.

High School All-Star Cagers from the Northern part of the state will meet the All-Star Cagers from the South in the Coliseum at 7:45 p.m. Friday, August 10, and the football All-Star teams will collide in Jones Stadium at 7:45 p.m. Saturday August 11.

"It would be quite a feather in Texas Tech's cap for us to set attendance records at both games," points out Polk Robison, Athletic Director. Texas Tech still holds the basketball attendance mark of 5,936, set in 1956, although San Antonio came close, with 5,900 last summer. A crowd of 12,114 witnessed the football game here in 1956, seventh among the 27 turnouts but more than 8,000 behind the record of 20,408 established in Houston in 1958.

Texas Tech's Athletic Department is handling ticket sales for the games. Reserved football tickets are \$2.50 and basketball, \$2.00 and \$1.50.

Future Red Raiders will be in the two games.

Football All-Stars signing letters of intent with Texas Tech are backs Jan Crews, son of Tech Ex Alvin Crews, of Anton; Johnny Agan of Albany; Tommy Ledbetter of Dalhart; Jerry Lovelace, brother of Tech's present quarterback Johnny Lovelace, of Farwell; Mike Sutherland of Ysleta; guard Edwin Hall of Eden; tackle David Graves of Plano; and end Pat Campbell of Levelland.

EX-STUDENT APPLICATION FOR 1962 FOOTBALL TICKETS

Regular price game tickets will be available on the East and West side of the stadium. Game ticket will also be available on the West side in the option areas at a surcharge of 50¢ in the \$100 area — \$1 in the \$200 area. The \$100 area is located in the old part of the stadium between the 20 and 40 yard lines on the west side of the field. The \$200 area is in the new part of the stadium between the 20 and 30 yard lines on each end. The new part of the stadium is the lower section of seats around the field. A check including 25¢ mailing charge must accompany all ticket orders. To assure best seats available, place your orders early. Individual game ticket orders will be filled AFTER season tickets are filled. Indicate the number of tickets desired for each game in the space provided. Tickets will be mailed after September 1.

HOME GAMES	No. of Tickets	\$4.00	\$4.50	\$5.00	TOTAL
Sept. 22 West Texas State (N)					
Sept. 29 Univ. of Texas (N)					
Oct. 27 SMU (Homecoming)					
Nov. 17 Univ. of Colo. (Dads Day)					
Nov. 24 Arkansas					
OUT OF TOWN GAMES					
Red Raider fans will probably receive better choice of tickets to out of town games when ordering from Tech than when obtaining them from the host school. Southwest Conference agreements require each host school to allot preferential seats to all visiting teams.					
Oct. 6 Texas A & M (N)		\$4.00			
Oct. 13 TCU (N)		\$4.00			
Oct. 20 Baylor (N)		\$4.00			
Nov. 3 Rice		\$4.00			
Nov. 10 Boston College		\$4.00			
Mailing Charges					.25
TOTAL					\$

Be sure to enclose check or money order plus 25¢ mailing charge with all orders. No tickets will be reserved unless check is sent in with application. Make all checks payable to TEXAS TECH COLLEGE. Mail application to:

Chapters Reflect Activity

CHOICES OF MIDLAND EXES — The Midland chapter of the Texas Tech Ex-Students Association has elected new officers for the ensuing year. Left to right, standing are Eldon Akins, secretary-treasurer; Charles Snure, third vice president; Keith Anderson, second vice president; and Ted Ferguson, first vice president. Seated, in the same order,

are L. A. (Ish) Curry, president, and Billie Louise Berry, reporter. The new officers were elected at the fourth annual Spring dance in the Ranchland Hill Country Club. Jim Lindsey of Midland, member of the Tech Board of directors, was the featured speaker, discussing the college's growth and future plans.

Exes Seek More In Century Club

Memberships for 1962 are now being accepted in the Texas Tech Century Club, it has been announced by Ex-Student Association President J. C. Chambers.

The Texas Tech Century Club is an organization of Ex-Students and friends of the College, which was founded in May, 1961, to aid and support the College in its program for its students, Ex-Students and the State.

Membership in the Texas Tech Century Club is based upon financial support of at least \$100 per year through the Texas Tech Loyalty Fund. All gifts are tax-deductible.

Giles Dalby, '54, of Lubbock, is the 1962 Chairman of the Century Club. Roy K. Furr, Jr. is Vice Chairman.

There were 130 Charter Members of the Texas Tech Century Club in 1961. Already most of the

Charter members have renewed their memberships and nine other persons have joined. Chairman Dalby has announced. December 31 is the deadline for membership in 1962.

Persons interested in additional information about the Century Club are requested to contact either Dalby, Furr or the Ex-Students Association Office.

Furr has announced that the annual dinner meeting of the membership of the Texas Tech Century Club will be held on Friday, October 26, which will coincide with the annual Homecoming celebration. An effort is being made to schedule a nationally known person as speaker.

New Members of the Texas Tech Century Club for 1962 are: Mr. and Mrs. Max Tidmore Lubbock, Texas; Mr. and Mrs. Owen Hamilton Lubbock, Texas; Mr. and Mrs. Jack L. Carlson Brownwood, Texas; Mr. and Mrs. L. E. Griffin Lubbock, Texas; Mr. and Mrs. Thomas J. Rollins Lubbock, Texas; Mr. and Mrs. John Charles Whitfield Lubbock, Texas; Mr. and Mrs. Elton Plowman Lubbock, Texas; Mr. and Mrs. Frank Kerr Lubbock, Texas; Mr. and Mrs. R. W. Blake Lubbock, Texas.

Officers Set Fall Conference

Plans for a special conference for Ex-Student Chapter Officers has been announced by Ex-Student officials.

The First Annual Chapter Officers Conference is scheduled for Saturday, September 29th in the Student Union Building. The Conference is officially scheduled to begin with a joint noon luncheon with the Executive Board of the Ex-Students Association. Andy Behrends, '51, is Conference Chairman.

Tech Sorority Wins Trophy

After winning three times in a row, Pi Beta Phi sorority has retired the Panhellenic Scholarship Trophy at Texas Tech.

Grades released by the Offices of the Dean of Women and the Dean of Men showed that the grade point averages of sorority and fraternity members last spring were above the undergraduate average for the college.

Board Names A. W. Gustwick

A. W. "Tony" Gustwick was recently named Field Secretary of the Ex-Students Association.

Gustwick, who is scheduled to graduate from Tech this month (May), will assume his duties on June 1. He will be in charge of certain aspects of fund raising and assist in chapter activities.

The Field Secretary position is not a new one. It has been vacant since April, 1960.

Oklahoma City Chapter - New officers of the Oklahoma City Chapter are: President, Richard Ligon '58 employed by Wilson & Company Inc.; Vice-President, Bob Broyles '51, employed by Pan American Oil Company in Oklahoma City; Secretary, Mrs. Kenneth (Alice) Whittington '56; Reporter, Mrs. Pat (Mary) Blount '45. Board Members, Mr. D. N. Pope '50, President of the National Foundation Life Insurance Company. Directors, D. J. Cook '48, with Pan American Petroleum Corp. & Mr. Herbert Boles '50, with British American Oil Company. The Oklahoma City meeting was on May 26 at the Pan American Petroleum Corporation park in Oklahoma City. Athletic Director, Polk Robinson, was the speaker and the group was served a genuine West Texas barbecue with all the trimmings. Approximately 30 exes attended the meeting. Mr. Bob Broyles '51, former Red Raider Guard, was the chief chef.

Arlington Chapter - The Arlington Chapter met on Tech Day, May 6. The Arlington Chapter had a picnic at which Mr. G. E. Smith '33 was elected president of the chapter. Mr. Smith is Assistant Dean of Engineering at Arlington State College. Also elected were: Vice-President, Dr. Gene Nowling '48; Secretary, Barbara Wright Hawks '46; Reporter, Jack K. Noyes '49, who is with Bell Helicopter Corp.

Amarillo Chapter - At a meeting held May 4, with 64 exes present the following officers were elected: President, Mr. Robert N. Carnahan '50, an attorney in Amarillo; First Vice-President, Herman Northrup '59, who is with Northrup Seed Company in Amarillo; Secretary, Shawn Dudley '60, who is a teacher in Sam Houston School; Reporter, Ron Still, who is personnel assistant with South-Western Investment Company; Second Vice-President, Tom Gilley '41, basketball coach at Pala Duro High School in Amarillo. Vice-President and Comptroller, Marshall L. Pennington spoke to the group on the current building program at the college and plans for the future in all phases of the college activities. Head basketball coach, Gene Gibson,

Paul Haskins, '48 Midland, Texas.

also spoke to the group on athletics. Also present at the meeting was Executive Director, Wayne James and Field Secretary, Tony Gustwick.

Tulsa Oklahoma Chapter - The exes in Tulsa met for a picnic on observance of Texas Tech Day. President of the Tulsa Chapter is Johnny Meyers '55.

Farmington, New Mexico Chapter - The Farmington Chapter met May 5, and elected the following officers: President, Jim D. Baucum '51, Vice-President, Joe W. Dilli '56, who is an engineer with Schlumberger; Secretary, Mrs. Charles "Luan" Loveland '50; Reporter, Mrs. J. A. (Anna) May '48. The Farmington Chapter had a barbecue at the home of Dave Thomas '54. Thomas was the chapter president of the chapter.

Austin Chapter - The Austin Tech Exes held their Tech Day May 7 at the Zelker Park with all families invited sharing a picnic lunch. Some 37 exes attended. Officers elected were: President, John Nixon '50; Vice-President, Lt. Col. Lonnie D. McCurry '41; Secretary-Treasurer, Billie Nixon; Reporter, Phillip Rapstine, '60; Directors, Arch Gainer '31, Pat Thurman '50, and Tom Bunnell '49. Immediate Past-President is Bob Richards '57.

Tri-County Chapter - Tri-County Chapter held their annual Tech Day observance in Friona. Those elected were: President, Martell LeVeque of Friona, and Secretary-Treasurer, Ruby Nell Bruns. They will be replacing Mr. and Mrs. Donald Shipley '53 of Hereford, who have served in these offices for the past year. The Tri-County Chapter includes the Deaf Smith, Farmer, and Castro Counties.

Dallas Chapter - Tom Cone land '39 was elected President of the Dallas Chapter of the Texas Tech Ex-Students Association. Ken Cummings '60 and M. G. Davis '46 were elected Vice - Presidents and Charles Joplin '52 was elected Secretary-Treasurer. Dean of Engineering, Dr. John R. Bradford, spoke to the group on development in engineering at Texas Tech. The meeting was held May 6, in Dallas. Also present at the Dallas meeting were: President of the Ex-Students Association, J. C. Chambers, and Executive Director, Wayne James, both of Lubbock. Immediate Past-President is the Dallas Chapter is Mr. Kenneth Dowell '44.

Top of Texas Chapter - Top of Texas Chapter held its annual Tech Day observance May 6, at the Don Morrison Ranch north of Pampa. The group had a covered dish supper. Vice-President, Ed Knox '57 presided at the brief business meeting.

Hale County Chapter - The Hale County Chapter had a picnic and fellowship May 5 in Plainview. Chapter president, Bill Sylvester, '51, of Plainview was in charge of arrangements.

Houston Chapter - The Houston Chapter of the Ex-Students Association held their annual Tech Day May 6, at the Shamrock Hilton Hotel poolside. Mr. Troy Davidson '47 was elected president of the group. Charles Fugitt '44 is immediate past-president. Mr. J. C. Chambers, President of the Ex - Students Association and Wayne James, Executive Director of the Association, both of Lubbock, spoke to the group.

East Texas Chapter - Head football coach, J. T. King, was the guest speaker at the annual Texas Tech day observance May 5, at Belle's Lake House. (Continued on page 7)

and breakfast at the Ft. Worth Quartermast Depot. Special guest was head basketball coach, Gene Gibson. Plans were made for a Dutch Buffet supper at Pete Brewer's Entertainment Room August 6. All Ft. Worth's exes are invited to attend the special August 6 buffet and supper.

Pecos Valley Chapter - Mr. Kent Shannon '57 was elected president of the Pecos Valley chapter at a meeting held in Roswell, New Mexico, May 5, at the Roswell Country Club. Also elected were Jack Trice, Vice-President and Ralph "Bubba" Martin, Secretary-Treasurer. Approximately 60 exes were present. Immediate past-President is Jack L. McClellan.

Plains-Denver City Chapter - Plains and Denver City exes met for a buffet dinner at the residence of Don Hancock '53, in Plains on Tech Day.

Albuquerque, New Mexico - The Albuquerque chapter held a picnic in May and elected officers. They named Alan G. Elsik as president, M. G. Young, '49, as vice president, and Kay Lofley Faulkner, secretary. Elsik is employed by the Atomic Energy Commission, Young is with Sandia Corp., and Mrs. Faulkner teaches at Eubank School in Albuquerque.

Professors Collaborate On

Officials surveying task . . .
Of installing phones

Company Installs Phones In Dorms

The massive job of installing and hooking up 2,100 miles of wire for Texas Tech's new dial telephone system is expected to be completed the first part of September.

The centralized dial network will provide 2,400 telephones in dormitory rooms and 500 telephones for administration offices. It also does away with the 60 telephone listings for Tech in the Lubek telephone directory and 15 separate

switchboards now being operated on the Tech campus.

The Tech administration and students will be able to call any other campus telephone by dialing a four digit number. The administration phone system will be placed in operation Sept. 8 and the students system by Sept. 17, according to Moser.

New Telephone Number

A new telephone number will be assigned to Tech and then each telephone on the campus will be shown in a campus telephone directory to be published the first part of September.

The new system also is expected to speed up the completion of emergency calls made by parents of Tech students. In the past, considerable delay has been experienced in completing the calls but with the new system, the Tech operator will be able to connect the call into the rooms of students living on campus at any hour of the day or night.

Jim Lindsey Resigns As Director

Jim Lindsey, Midland, a member of the Texas Tech board of directors since 1937, will become director of information at Texas A&M College Aug. 1, it was announced Thursday.

Lindsey has resigned his position on the Tech board effective immediately, he said Thursday morning. He also has resigned as managing editor of The Midland Reporter-Telegram a post he has held 10 years.

Succeeds Duwall

Lindsey, a Tech graduate, was appointed to the board in December, 1957, by the then Gov. Allan Shivers.

His appointment was to serve the unexpired term of the late William H. Francis of Houston. Lindsey was re-appointed to a full six-year term as Tech board member in 1959 by Gov. Price Daniel. This term would have expired in Feb. 1965.

Lindsey has served as vice chairman of the Tech board two years and presently was chairman of the public relations and legislative committee. He formerly had been chairman of the athletic committee.

Texas A & M President Earl Ludder announced the appointment of Lindsey at the College tation school Thursday. He will succeed L. A. Duwall, who died May 2.

Supervises Publications

Lindsey has 20 years experience as a newspaperman. He was managing editor of the San Angelo Standard-Times; assistant editor of the San Antonio Express News, before moving to Midland in 1952.

He will supervise Texas A&M students publications along with its informational supervisory duties.

Exes Hear Goodwin Talk

Dr. R. C. Goodwin, President of Texas Tech, will speak to the Ex-Students living in Wilbarger, Hardeman and Ford Counties in Vernon at 6:30 p. m. Aug. 21.

Dr. Goodwin's speech will come at a dinner meeting in Vernon's Wilbarger Auditorium.

R. D. Brown, '49, was recently elected temporary chairman of this Greenbelt chapter of the Tech Ex-Students Association. Other members of the organizational committee are Joe Meador, '49, Orin Brewer, '49, Edd Orr, '49 and Joe Garrison, '49.

Also planning to attend the meeting will be Wayne James, Executive Director of the Ex-Students Association.

"All Ex-Students and their wives or husbands living in the area are invited to attend the meeting," James said.

Office Aids Ex In Finding Ring

Notice: To the man who called the Ex-Students Office wanting them to discover what information they could about a lost Tech ring initialed "PJD '59, BA."

The ring was found at Lake Thomas, and is being kept at the Sportsman's Paradise.

OFFICIAL BALLOT

Note: Representatives from the Association's even-numbered districts shall be elected from the ballot below, according to the ex-students population in each district. Odd-numbered districts will elect representatives in 1963. VOTE FOR THE REPRESENTATIVE IN YOUR ASSOCIATION DISTRICT ONLY. If you are in doubt as to your district number, please check the maps. The persons whose names appear below have been nominated by the nominating committee in each district, but a write-in ballot is provided at the bottom of the page so that you may vote otherwise if you wish. Write clearly your name and address and year of graduation, or year scheduled to graduate. If you use the write-in ballot, place no other mark by his or her name. The name of the candidate appears beside the number of his district.

RETURN BALLOT TO BOX 4009, TECH STATION
LUBBOCK, TEXAS, BY SEPTEMBER 5, 1962

Exes Submit Fuson, Read

Earl Fuson, '32, of Dallas has been nominated for President of the Ex-Students Association in action taken by the nominating committee July 14 in their meeting at the Tech Union. At the same time the committee nominated Floyd Read, '48, of Lubbock as first vice president, and Frank Calhoun, '56, of Abilene as second vice president. The committee also made nominations to the even-numbered districts, as shown on the ballot on this page.

Nominations were made for three directors with terms of three years for the Ex-Students Association. Bill Bales, '53, of Tyler; A. J. Kemp, '41, of Dimmitt; and Donnell Echols, '59, of Lamesa, were the director nominees submitted by the committee.

These nominees, for Association office and directors, will be elected at the Homecoming meeting of the Council, a portion of whose membership is being voted on in this issue.

The Council, composed of the district representatives, chapter presidents, all past presidents of the Association, and members of the Executive Board, will accept other nominations from the floor at this fall meeting.

Association president J. C. Chambers had previously ap-

pointed a nominating committee. Those present for the meeting were Clint Formby, chairman, Walker Nichols, Donnell Echols, Hart Shoemaker, Rex Tynes, Ned Bradley, Marshall Pharr, Mrs. Ben Hutchinson, Warlick Carr, W. B. Rushing, L. Edwin Smith, Kenneth Reast, Chambers, and Wayne James, Tony Gustwick and Mrs. Sandra Turner of the Ex-Students office.

Chambers Warns Exes On Importance Of Vote

EX-STUDENTS ASSOCIATION

I sincerely hope that every Ex-Student of Texas Tech will take the opportunity to exercise their right to vote for the district representative for their area. Our association is moving forward in many areas and the importance of this vote actually is becoming more and more important.

Many people have asked me who will make the final decision in certain areas such as the proposed name change. Of course, the State Legislature will make this decision, but the opinion of the Ex-Students Association will come from the Ex-Students Council meeting. The council is composed of the district representatives with each of these people having a vote.

My plea is to take an active interest in who represents your area. Exercise your right to vote. There is a ballot included in this paper and a map of the various districts.

Our constitution provides that one-half of these representatives are elected each year, so if you live in an even numbered district, as indicated by the map, cast your ballot by returning it to our Ex-Stude

It is important that the voices of all Ex-Students are heard!!

J. C. Chambers '54
President
Ex-Students Association

Homecoming, Election Set

A. J. Kemp

Homecoming Oct. 26-27

Starting with a board meeting of the Ex-Student's Association and end with the Tech-SMU football game, there will be a lot of activity in between for everyone at the 1962 Homecoming October 26-27.

One of the highlights of the annual homecoming will be the speech by General David M. Shoup, commandant of the United States Marine Corps since Jan. 1, 1960. Last year during homecoming Vice President Lyndon B. Johnson addressed the first meeting of The Texas Tech Century Club, a group made up of those ex-students and friends of the College whose contributions during the year amount to \$100 or more.

Kicking off the homecoming business and festivities will be the 10 a. m. meeting Friday of the Association Board and the Loyalty Fund Trustees Meeting. At 1:30 p. m. that day there will be a meeting of the Ex-Students Association Council and the election of officers for 1962-63. This meeting will be in the Student Union ballroom and all exes are invited to attend. The officers who have been nominated for office and other details of the meeting are included in another story in this issue.

At 6 p. m. Century Club members and invited guests will dine in the Student Union at the second such annual dinner. Speaker for the event will be General Shoup. Immediately after the Century Club dinner, at 7:30 p. m., a giant pep rally will be conducted on the campus. Thousands of students are expected to attend the rally and bonfire, prepared to gloat over the coming defeat of SMU. For the east Texas school, incidentally, this game will be their annual school trip, so hundreds of the Methodists are expected to attend the game.

Following the pep rally the crowd will move to the front of the Science Building in the old library parking lot to witness the crowning of the homecoming queen. Her identity will not be revealed until the actual coronation ceremonies, when she is crowned by General Shoup.

Classes of 1945-62 will hold their reunions in the Student Union building at 9 p. m. following the queen coronation, and at 9:30 p. m. the classes of 1925-45 will meet in the Caprock Hotel in downtown Lubbock for a gettogether. All members of these classes are urged to attend their reunions

Tech Second Only To Univ. Of Texas

As final registration figures for the fall semester roll in, it appears that Tech is still the second largest state-supported college in Texas.

The final registration figure, released from the office of the registrar, Dr. Floyd D. Boze, reveals that 11,181 students are

enrolled at Texas Tech this fall.

This places Tech second only to the University of Texas in total enrollment. The projected figure for UT was estimated to reach 21,400.

Tech's new total of 11,181 is an increase of about nine per

(Continued on page 2)

Association Adds Two New Chapters — Vernon, Andrews

Two new chapters have been organized at Vernon and Andrews, Ex-Student officers and board members were told during their meeting on the Tech campus Sept. 29.

In other business discussed at the meeting Clint Formby, chairman of the publications committee, reported that advertising rates for the Texas Techian had been raised to be more in line with production costs and rates of similar publications.

J. C. Chambers, Ex-Student president, gave the Century Club report for Century Club chairman Giles Dalby, who was

absent. Chambers said that 94 of the 130 charter members had already renewed their membership and that 11 new persons had joined the Club.

Roy Grimes reported that he and James had met with College representatives and set up an Ex-Student Assoc., loan fund, money for which is coming from contributions to the Loyalty Fund.

The Loan Fund was set up to help needy and deserving students complete their college education at Tech. Grimes said a number of loans have already been made from the fund.

Don Anderson, chairman of the Fund Raising Committee, said contributions to the Texas Tech Loyalty Fund are approximately \$3,700 more than at the same period last year. He pointed out that each year more and more exes are taking advantage of the Matching Gift Program, whereby some employers match their employee's gift to his college. The classes of 1950 and 1940 were first and second respectively among all classes in the number of exes giving and also in the amount given to the Loyalty Fund in 1961. Anderson said that 226 members of the 1950 class made gifts last year.

Dr. J. William Davis, head of was a guest and spoke briefly the government department, on the name change proposals.

Notes on Homecoming

All Ex - Students who were members of musical organizations are invited to a reception in the Music Building immediately after the homecoming game on Saturday, Oct. 27.

Former KoShari Club members and their husbands are invited to a reception from 5 - 7 p. m. following the homecoming game at the home of Dr. and Mrs. David H. Kelley, 3507-20th St., Lubbock. Those planning to

6 Nominated For Offices

Six men have been nominated for positions on the Ex-Students board, including two for directorships for three-year terms. The nominations were made by a nominating committee which met in July.

Additional nominations may be made from the floor at the annual Council meeting Friday, October 26 at 1:30 p. m. in the Student Union upstairs ballroom, according to J. C. Chambers, Ex-Student president.

Members of the Association Council are district representatives, chapter presidents, past presidents of the Association and members of the Executive Board.

Earl Fuson, who attended Tech in 1929 and who is presently first vice-president of the Association, has been nominated for president of the Ex-Students Association. He is also a past president of both the Fort Worth and Dallas Ex-Student chapters and has served as second vice-president and director on the Executive Board of the

Builders Construct Married Housing

Started this month is a project designed to benefit the students of Texas Tech — a 1.3 million dollar married student housing development.

Howell G. Killgore and Michael Grinnell, Lubbock builders are erecting Tech Village Inc., a seven-building, 200-unit project one block north of the National Guard Armory.

Tech Village is a private corporation belonging to Killgore, Grinnell, and David Grinnell, all local men. The mortgage and financing for the corporation was secured through Hurlbut and Holder Real Estate and Loans representing The Connecticut Mutual Life Insurance Co. The project was designed by Houston Miller, also of Lubbock.

WHEN COMPLETED, the project will have seven two-story brick and steel buildings. Four of the buildings will have 32 apartments and three will have 24 each. Each unit will comprise 600 sq. ft. of floor space.

Between the buildings will be lawns, patio areas and a play area 120 by 240 ft. with sand-box, tunnels, swings, etc. In the southeast corner of the project a 30 by 60 ft. swimming pool surrounded by a lawn will invite attention in the summer.

In the center of the development a combination laundry-mat-club room will be open for the convenience of tenants. Washing machines and dryers will be the standard coin operated type.

PARKING LOTS will surround the whole development.

The apartments themselves will be arrangements of one bedroom, bath, living room, and a kitchen-dinning room combination. Six closets will be placed throughout the apartment.

Complete modern furnishings will be provided along with wall-to-wall carpeting in bedroom and living room. A refrigerator, built-in range, oven, and disposal-all will be in each kitchen. Every apartment will have year-round temperature control by General Electric.

The walls between apartments will be insulated with sand so that no sounds will escape the apartment.

The southeast corner building is scheduled for completion sometime in December and its 32 apartments will be rented as soon as it reaches that stage.

Each apartment will rent for a maximum of \$80 a month with all bills paid. The entire development should be complete by spring and will be ready for summer school, according to Killgore.

EACH BUILDING will be rented at its completion.

If the project is successful, land is available for an additional 200-unit development adjacent to the one now being built.

Only married Tech students will be allowed to rent the apartments.

Exes Add . . .

(Continued from page 1)

In other reports Rob Brown told the group that the Projects Committee is working on a special ex-student deal.

Jack Maguire, executive director of the University of Texas Ex-Students Assoc., was a guest at the meeting and spoke to the board members on the University's Association. He complimented the group on the tremendous progress made by the Texas Tech Ex-Student's Assoc. in the last two years.

James reported on the operations of the Ex-Student office, personnel, homecoming and a program to create better relations with the faculty. He mentioned that he had been invited to speak at the Lubbock Rotary Club before Homecoming and that he was trying to get other civic clubs to schedule programs about the College in the week before Homecoming.

Next meeting of the board will be on Friday morning, Oct. 26, day before homecoming.

Want Old Annual? Just Write To Us

The Ex-Students Office has several copies of old La Ventanas from 1947, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1959, 1960 and 1961.

They are available at \$1 each for mailing costs. Due to the small number of copies, the 1960 and 1961 annuals are available at \$5 each.

Requests for these books, with the year desired, should be mailed to Box 4009, Texas Tech College, Lubbock Texas.

Chas. W. Wooldridge

Former Raider New Bowl Boss

Charles W. Wooldridge, a former athletic hero at Texas Tech, has been named president of the Cotton Bowl Association for a two-year term. He succeeds Harry Shuford, former SMU star and Dallas banker who resigned recently to accept the presidency of the Federal Reserve Bank in St. Louis, Mo.

Re-elected as chairman of the board at the special meeting of the board of directors was J. B. (Jack) Lowe, who served as president, 1958-60. Other officers elected were James H. Stewart, of Dallas, first vice president, and Jay W. Dickey of Pine Bluff, Ark., second vice president. Howard Grubbs, executive secretary of the Southwest Conference, continues as secretary-treasurer of the CBAA by virtue of the office he holds with the conference.

Wooldridge, first vice president for the past 18 months, is vice president of Texas Power and Light Co. He has been associated with this organization since his graduation from Texas Tech in engineering in 1930.

As a performer in football and track in the early days of Texas Tech, Wooldridge distinguished himself in both sports.

For six years, 1947-53, he served his alma mater as a member of its board of regents.

Prominent in Dallas civic and church affairs, he served the Dallas Rotary Club as president in 1947-48 and is an elder in the Skillman Avenue Church of Christ. Active in Red Cross campaigns and in Boy Scout activities for many years, he has been associated with the Cotton Bowl Athletic Assn. since 1957.

Two Athletics Up For Hall Of Honor

Two persons will be inducted into the Texas Tech Athletic Hall of Honor on Saturday, November 17th.

To be inducted are: Harley Carpenter '28, Lubbock, assistant general manager of Texas, New Mexico and Oklahoma Bus Line. He lettered four years at tackle and also in track. He was captain of the football team in '26 and started every game that Tech played the first four years, except the last one, when injuries sidelined him. He had the nickname of "Red" and has been quite active in civic affairs in Lubbock. He served as president of the Ex-Students Association in 1948.

Marsh Farmer, '40, brought nationwide recognition for himself and Texas Tech by the many national records which he broke as a track star at Texas Tech.

Marsh won the high hurdles at the National AAU meet in Lincoln, Nebraska in 1939. He held records in both the low hurdles and high hurdles in the Border Conference for years.

While wearing the scarlet and black, he set a number of records in the hurdles which have never been broken at Texas Tech. He was considered the best hurdle runner in the nation at that time. He is now a real estate developer in Fort Worth.

The Texas Tech Dad's Association are sponsors of the Hall of Honor. To be eligible to receive the award, the recipient shall possess or shall have possessed, in addition to outstanding ability in a sport or sports, other qualification such as sportsmanship, character, integrity and be a person who has brought distinction to Texas Tech or served the school with distinction in its athletic program.

Candidates, if being former athletes, must have been out of Texas Tech for at least five years prior to election. Not more than two candidates shall receive the award after the first year.

A picture inscribed with the accomplishments of the honorees will be hung in the Texas Tech Athletic Building and a plaque will be given each honoree.

Last year, its first year, five persons were inducted as members. They were:

Ransom Walker (deceased)-letterman in football, basket-

ball, and track and Texas Tech's first East-West Shrine Game selection (1929).

Elmer Tarbox -letterman in basketball, football, track (1935-39) and named the outstanding back in the 1939 Cotton Bowl Game.

Pete Cawthon -Athletic Director and head football coach (1930-40) known for innovations including team air travel and coaching clinics.

Walter Schlunkman -letterman in football and track (1942-46). Tech rushing record holder, an East-West Shrine selection (1946) and the school's first Chicago Tribune All-Star representative (1945).

Dean W. L. Stangel former dean of the school of agriculture, who served as Tech's faculty chairman of athletics from 1925-1948.

Tech Second . . .

(Continued from page 1)

cent over last year's 10,212 figure.

This semester's record enrollment shows the men of Tech are in a definite majority. Male students numbered 7,354, while the women could only muster 3,827 members for their ranks.

The population in the School of Arts and Sciences more than doubled its closest competitor.

Final total for that school was 4,624, a figure greater than the total enrollment of eight state-subsidized colleges in Texas.

The School of Business Administration was a distant second with 2,208, and is closely followed by the School of Engineering, which boasted 2,110 students. These three schools are followed by: Agriculture, 901; Graduate School, 756; and Home Economics, 582.

NOTICE

The Houston chapter will be hosts to a reception in the Shamrock Hotel in Houston for all Tech Exes in the morning before the Tech-Rice game on Saturday, Nov. 3. Chapter president Troy Davidson encourages all exes to attend.

FOR MARRIED TECHSANS — This drawing is a preview of the new housing project for married students which is now beginning construction

north of the National Guard Armory. The plan is a private undertaking, but only Texas Tech couples will be allowed to rent the apartments

First unit completion is due in December.

Dr. F. Alton Wade

South Pole 'Old Hat' To Tech Geologist

By BILL KALB
Avalanche - Journal Oil Editor

Whes Dr. F. Alton Wade, Texas Tech geoscience department head, lands near the South Pole at the foot of the Shackleton glacier in late October, it won't be his first trip to the polar regions.

In addition to two trips with Admiral Richard E. Byrd in 1933-35 and 1939-41, the geologist also led a team that explored the ice-bound interior of Greenland in 1943-44.

His only northern Polar venture was to establish weather stations and find suitable sites for emergency landing strips for aircraft in trouble. Apparently, the suveyors didn't find too many sites. "I wouldn't land there unless I had to," the six-foot two-inch polar pioneer commented.

Wade, along with two other Tech geoscientists, V. L. Yeats and David Greenlee, will go first to New Zealand, then to McMurdo Sound base on the Ross Ice shelf, and thence to the glacier where they will do their geological exploration.

The 59-year old Doctor Wade expects to see quite a few changes after a 20-year absence.

Changes Expected

The biggest change is the regular airplane traffic which makes "wintering" in Antarctica unnecessary. When Wade went with Byrd they stayed through the winter under snow.

The Tech professor says the hardest part of the stay was unloading after arrival by ship. The expedition personnel, 56 in the 1933-35 stay and 33 in 1939-40, had to tote all their supplies from the boat to the base for the coming year, plus enough for a second year in case the boat couldn't make it back.

The stores were stacked up to form the walls of the tunnels between the buildings at the Little America base. Tunnel roofs were made with tarps or bamboo.

The buildings were ventilated, but most of the fresh air came from the surface down through the snow. As the base was buried under many feet of snow, sometimes as much as 50 feet, the snow aged. It formed coarse crystals. The gales on the surface, which reach over 100 mph in blizzards, would push the air down through the snow to the underground expedition.

Plenty To Eat

Getting plenty to eat was apparently no problem. "When you wanted a can of tomatoes," Wade related, "you went out and found a box labeled tomatoes, cut the end off and took out a can." The box and the rest of the cans were left to hold up the tunnel. The expedition also had dry rations, similar to the trail rations the Tech trip will eat while spending 10 weeks trying to solve a few secrets of Antarctic geology.

Trail rations are chiefly a meat bar which can be mixed with water to form a "Hash" stew, special "biscuits," oatmeal, chocolate and special bullion cubes.

Reminiscing about his trip south with the late Admiral Byrd, Wade commented on some of the peculiarities of Antarctic living. The cold allows no germs to live. During the stays on the seventh continent, the men gradually lost their immunity to colds and related respiratory diseases.

"Everytime a ship came in, we all had colds," he said. The weather also allows no corrosion to occur.

Digging Up A Plane

On the 1939-40 expedition, the men wintered at Little America III. They dug up the tri-motor airplane left from the previous expedition. From old records, Wade recollected, the group knew it had a faulty magneto. They replaced it, warmed the plane up, and it started. No corrosion was found in the engine which spent six years encased in ice.

Byrd was a fanatic about the use of the aircraft for polar exploration, an idea which since has been proved right too. The glacier and rock outcrops the Tech team

(Continued on page 8)

Austin Group to Meet

Austin Chapter will have a meeting on Friday, October 19 at 8 p. m. in the Citizens National Bank in Capitol Plaza Shopping Center. Wayne James, executive director, will be present to whip up the Tech spirit prior to the Tech-Baylor game the following night. He will show some colored slides of recent developments on the Campus and discuss plans for the College within the next few years. John Nixon is chapter president.

Senior Ag Major 1962 Red Raider

With a flash of light a cloud of dust and a thunder of hooves, a tall horseman wearing a mask and a red cape has become a symbol of Texas Tech — the Red Raider.

Throughout the Southwest, the masked rider has led the Tech football team onto the gridiron.

The 1962 Red Raider is Bill Durley, a red-haired Tech senior who has been an equestrian most of his life. Durley was selected by Dr. Ralph Durham, head of the animal husbandry department, on the basis of horsemanship, character and scholastic eligibility.

"I though Durley was as good a horseman as I ever saw," said Durham.

Born on a farm and ranch in Wellington, Durley was vice president of his high school FFA chapter and the radio broadcaster for FFA teams. He received the DeKalb Award in agriculture and a Sears Foundation scholarship to Tech upon graduating from Wellington High School.

With a sister at McMurtry College and another a North Texas State University graduate, Durley was asked why he came to Tech.

"Tech is the best school in Texas as far as I'm concerned," he replied.

An animal husbandry major, Durley is a member of the Tech Rodeo Association and the Block and Bridle Club. He was a member of the Tech meats judging team last year that competed in Chicago and Fort Worth.

Facelifting For Library

Scores of workers have invaded the old library building to begin the vast job of remodeling, which will put it back once again into a serviceable addition.

Remodeling will make room for the Southwest Collection, now in the West Texas Museum, several new class rooms and Air Force and Army ROTC units.

The Southwest Collection is set up for the acquisition and preservation of books and material concerning the history of the southwest.

Twelve class rooms will be created, two of which will have a seating capacity of more than 200 along with room for the Extension Service and the audiovisual service.

Government, history and sociology offices will be moved to the building, and an estimated 30 to 40 faculty offices con-

15 Attend First Chapter Parley For Ex-Members

Officers from 15 of the Association's chapters attended the Chapter Officer's Conference Saturday, Sept. 29th.

Registration for the Conference began at 11:30 a. m., followed by a luncheon at noon. Dr. B. C. Goodwin, College President, spoke at the luncheon, which members of the Executive Board of the Association also attended. A total of 60 persons attended.

Andy Behrends, '51, of Amarillo was Conference Chairman. Sessions and their titles were: Chapter Organization and Mechanics-Andy Behrends, '51; Projects - Frank Calhoun, '56; Publicity - Clint Formby, '49; Membership and Attendance - Tony Gustwick, '62; Program-Wayne James, '57.

J. C. Chambers, '54, president of the Ex-Students Association, spoke briefly on "What the Association Can Do For You and What You Can Do For the Association and Texas Tech."

One of the highlights of the Conference was the distribution of a new Chapter Officer's Manual, edited by Wayne James. The 55-page manual is designed to be of help to each chapter officer and individuals interested in organizing a new chapter.

Some of the English faculty will also occupy the new offices.

DORM RESERVATIONS

Reservation for dormitory space for the 1963-64 school year are now being taken by the Room Reservations Office.

Reservations with a deposit of \$40 should be mailed to the Office of Room Reservation. Those making reservations have until August 15 to cancel reservations and still get their deposit back.

Last spring more than 1,600 names were on the waiting list for dorm space when the waiting list was cut-off.

All Exes who will have children planning to enroll at Tech next fall are urged to make dorm reservations immediately while there is still space available.

Meet Your Staff

Five fulltime employees and several parttime workers staff the Ex-Student office in the new wing of the Student Union. Upper left is Wayne James, executive director and pictured opposite him is Mrs. Sandra Turner, administrative assistant. Shown below Mrs. Turner is A. W. (Tony) Gustwick, field secretary. In lower left corner is Fran Schultz and Lois Arrington. Photo middle left shows part of attractive reception area in the new office.

PRESIDENT
R. C. GOODWIN

Goodwin Stresses Exes' Potential

(Editors Note: This speech was delivered by Tech President R. C. Goodwin on the occasion of the First Annual Ex-Students Association Chapter Officers Conference on Sept. 29 in Lubbock. What Dr. Goodwin had to say should be of real interest to our readers.)

I welcome this opportunity to discuss with you the future of Texas Tech and how, in my opinion, the Ex-Students Association may be of the greatest help to the College. At the very beginning I would like to emphasize your potential. Tech has conferred 25,234 degrees. In addition, it is estimated that some 200,000 students have attended Tech at one time or another. Though they are scattered all over the world, it is reasonable to assume that a good majority of them live in Texas. Thus in human strength and resources you have a considerable potential.

But this will remain but a potential until you are organized and dedicated to achieving the goals that the Association may decide upon. Hence your first step must be the organization of active, working chapters in as many places as possible, but right now I am particularly interested in chapters in Texas. I know that you are perfecting this organization and I congratulate you upon your progress. Your second step must be the adoption of a program which will be supported by all the chapters. This is where you will play a most important part. You are the ones who must decide on what the Association will strive to do. The third step must be to sell the individual chapters on your program. This involves at least two aspects. You, yourselves, must be thoroughly convinced that the program is the best for the Association and the College. Then all possible means of communication must be developed whereby the chapters may be informed of the program and induced to follow it wholeheartedly. This can be done by personal visitation and by greater emphasis on the program through your printed materials from your central office. Your Executive Secretary will print only those things which you, the officers and directors, will advocate.

Your Association has done and is doing many things which

benefit the College. I would not have you discontinue any of your worthwhile projects. I would like to discuss with you at least one activity upon which I trust you will be willing to concentrate. To do this I will need to give you some data of which you will be partially familiar.

The Legislature meets next January and during its session it will approve an appropriation bill for all the institutions which are State-supported for the biennium, 1963-65. Last July, these institutions presented to the various budget offices in Austin their requests for that biennium. As you have probably seen in the papers, the total of these requests exceeded the actual appropriations for the current biennium by some 67 million dollars. Our request for Texas Tech amounted to \$6,240,660 more than the appropriated funds for the current biennium. Seventy-two per cent of the total request of \$17,470,266 is based upon so-called formula items which are applicable to all the State-supported colleges and universities. The remaining 28 per cent is arrived at by studying our projected needs and which were kept to a minimum.

A good portion of the 72 per cent is based upon enrollments for the present year. Insufficient allowance is made for growth. In other words, the enrollment of the year 1962-1963 is used as a base of calculations for our needs for 1963-64 and 1964-65. No one can say just what those needs will be, but we can make some estimates. Let us see what has happened in the public schools by comparing enrollment data for the years 1947-49 with 1960-61. High school graduates increased 61 per cent; enrollment in the ninth grade increased 77 per cent; and enrollment in the eighth grade increased 120 per cent. The ninth graders of 1960 will reach college in 1964-65 and the eighth graders will be ready for college in 1965-66.

These figures apply to all Texas high schools and might be expected to apply to all State-supported colleges, but other factors must be considered in the case of Texas Tech. The 1947-48 class of eighth graders presumably reached college in 1952-53. In the fall of that year Tech enrolled 5, (Continued on page 8)

YOU and the COLLEGE

Because your Ex-Students Association is certain that you have a continuing interest in your Alma Mater's progress and problems, this newspaper is sent to you. To confirm that interest and at the same time contribute toward solving many of the College's immediate problems, you should become an active member of the Texas Tech Ex-Students Association.

Frosh Begin New Slime Cap Colors

This year's freshman class may not know it, but one of Texas Tech's oldest traditions is being chunked out the windows in their favor.

For the first time since the bells first tolled at Tech, freshmen beanies (alias, "slime caps") have been solid green with red numerals, but this year there've been some changes made.

Following the pattern of school colors, the beanies from now on will have alternating red and black sections, with a red bill.

The change was approved March 13 by the Student Council, and the only reason the revision wasn't made earlier is because nobody happened to think about it.

James G. Allen, dean of student life, submitted the proposal to the council after a student came to him in January wondering why the caps were green instead of the school colors.

"As far back as I can remember, the caps have been green," Dean Allen told the TORA-DOR. "I guess it's because we've always considered the freshmen to be 'green.' But the more I thought about it the more I liked the idea, and everyone else I talked to was in favor of it."

The student whose suggestion got the color change movement going is Ralph McClure, junior business administration major from Pampa. He checked around other Southwest Conference schools and found at least four others that use their school colors on their beanies.

It was discovered that the red and black caps would be no more expensive or troublesome for the stores to handle or buy, and the change was ordered.

"In certain ways this typifies the good spirit of this campus," Dean Allen offered. "When a student gets an idea that he thinks will help the school, he keeps plugging away until he makes a reality of it. I think this is one of the best attitudes Tech can boast of."

Tech Preparing For TV Station

Information recently released by D. M. McElroy, assistant comptroller, has verified that Texas Tech has received the permission of the Federal Communications Commission to ready its new educational TV station for operation.

McElroy, who is in charge of construction, has disclosed that the authorization permits the station to telecast over Channel 5 and use the call letters KTX-TV. Channel 5 is a conventional VHF channel which can be received on local television sets without adapters. The telecasting radius of KTX-TV will be approximately 45 to 50 miles. According to television engineers, an outside antenna will only be necessary for good reception in the fringe areas. This fact is also true with ordinary commercial stations.

The studio and transmitter rooms are located on the west side of the campus where the beef cattle pavilion was formerly situated. The cattle facilities have recently been placed on the college farm.

KTX-TV will be a non-commercial station offering only systematic courses for college credit. While the program can be viewed by anyone turning his set to Channel 5, college credit can only be received by those who enroll in the courses.

McElroy has not released definite schedules and programs but it is estimated that actual programming will begin before Nov. 1.

The recent authorization from the Federal Communications Commission is a modification of the original construction permit, and was necessitated by a change in the type of equipment to be installed. The original construction permit was granted in 1958, but lack of funds and equipment has deterred construction until recently. State funds cannot be used for the construction of television facilities other than of a closed circuit type. Therefore, it has become necessary to secure equipment from commercial stations throughout Texas, and adapting this equipment for college use, required modification of the original permit.

With the completion of KTX-TV, Texas Tech will have in operation, in addition to this facility, KTX-TV-FM radio and closed circuit television that will be utilized for instruction in engineering courses.

Instructional courses to be offered for college credit will be handled by the department of extension. This is due to the fact the facilities could not be completed in time for fall registration and residence credit, which requires registration at the outset of the semester. The department of extension is now preparing information relative to enrolling and the nature of the courses to be offered.

McElroy said, "We regard

this new station as an important phase of Tech's continuing development."

Tech Television

Toreador Daily For First Time

Tuesday, Wednesday, Thursday, Friday, Saturday...

These are some of the days of the week all right, and on each of these days there's going to be a TOREADOR.

Daily is daily, and for the new TOREADOR staff it's going to be an entirely new experience.

But it will all mean more thorough and timely reporting of all news on campus.

The daily was given the go-ahead April 23 by the allocation committee on the TOREADOR'S budget, after first being approved by Tech's board of directors and the publications committee.

The big step of going daily, coupled with renovation of the Journalism Bldg., will put the Journalism department in a position to give better and more efficient service than ever before.

More and more Texas Technological College must depend upon a strong, active Ex-Student Association for securing the recognition this College should expect. Your support of the Ex-Students Association is needed for it to have this necessary strength and vitality.

May I urge each of you to participate in the activities of the Association, not only by your contributions, but also by willingness to work for its betterment as well as that of the College. As Texas Tech advances so does your prestige in being a Tech Ex.

Dr. R. C. Goodwin
President
Texas Technological College

Bootsie Has Special Interest In Red Sox

It's no big secret, but few Texas Tech students know why "Bootsie" Higgins has more than just a casual interest in baseball.

Bootsie (her real name is Hazen Elizabeth) is an attractive 19-year-old math major from Dallas, now beginning her fourth semester at Tech.

She spent the summer (as well as many previous summers) in Boston, attending all home games of the Red Sox, her favorite team. She also spent a lot of time with the Red Sox helmsman, Mike (Pinky) Higgins, her favorite manager.

You guessed it, Pinky Higgins is her father.

Oddly enough, Higgins' other daughter, married in June, also is a Lubbock resident. She is Mrs. J. W. Dryden Jr., whose husband, a lieutenant in the Air Force, is stationed at Reese AFB.

Having a father who is well-known in baseball circles contributes to "a different life," says Bootsie. How many other girls (or boys, for that matter) have the chance to spend summers and spring vacations in the surroundings of major league baseball? And how many college students are on speaking terms with Ted Williams, Pete Runnels and other stars?

Higgins, a collegiate star at the University of Texas, was a major league third baseman for 17 years, playing for the Red Sox, Kansas City and Detroit. Then for eight years he managed Red Sox farm clubs before moving up to the helm in Boston in 1954. The following year he was named American League manager of the year.

"It's not generally known on campus who my father is," Bootsie said. "I want to make friends on my own, I don't want to meet people just on my father's fame."

As a rule, Bootsie doesn't tell dates of her father, but once she told a boy, who in turn told a friend who is from Boston and attending Texas Tech. Naturally, being a Red Sox fan, the boy wanted to meet Bootsie and discuss mutual interests.

Bootsie has lived in Dallas all her life. "In baseball you never know where you'll be next year, and my parents wanted us to go all the way through one school system." She was graduated from Highland Park High School in January, 1961, and immediately enrolled in Texas Tech.

Why Tech? "I had a lot of friends here," Bootsie said. "I had seen the campus and liked it very much." But being more objective, she added that since she wanted to major in math, she reasoned that Tech, "with a lot of engineering majors," would have a good math program.

Each summer the Higgins girls, Mrs. Higgins and the two daughters, have moved to Boston to be with the head of the Red Sox and of their family. And during Bootsie's spring vacation, she spends a week at Scottsdale, Ariz., at the Red Sox spring training camp.

With the 1962 season just about wrapped up, Higgins will soon be joining his family in Dallas. "When he comes home, he forgets about baseball and relaxes," Bootsie said. "He goes hunting and fishing and takes it easy until spring training."

The Red Sox finished in the (Continued on page 7)

TECH'S "MISS BASEBALL" — A coed from Dallas is surely one of Texas Tech's most avid baseball fans. She's Elizabeth (Bootsie) Higgins, 19, who leaves no doubt in your mind that her favorite team is the Boston Red Sox. Her father is the team manager!

Campus Landscape Thrives Under Elo

Way back when Texas Tech was a brand new college — in the late 1920's — there were no parking problems, no drainage problems, no dormitory problems.

In fact, there wasn't much in the way of a college. But the years have passed and with them the college has grown and so have its problems.

Texas Tech, second largest campus in the world, has 1,844 acres of land. In 1949 the campus consisted of a series of buildings held together by dirt roads and a few winding foot paths leading to dormitories and classrooms overgrown by weeds and willowy pampas grass.

That was the year E. J. Urbanovsky arrived on campus to become the college landscape architect. He began slowly, paving some of the major routes was first on his list.

Next came a beautification program and the planning and planting of shrubs, flowers and trees. Every year saw new additions, and each new building fit into a master plan.

The campus was designed to grow and expand into a network of administrative offices, class buildings, dormitories and student affairs buildings — all one cohesive scheme, providing the best in efficient campus arrangement.

In the basement of the traffic control division is a model of the Tech campus — as it is today — and as it will be tomorrow. With the use of a periscope, one may view the Texas Tech of 1972 in perspective.

There are two new women's dormitories and two for men. A wide highway skirts the campus from Flint Avenue and 19th

Street all the way around to Jones Stadium.

The Speech Bldg. has been extended again. The psychology department has a new addition. Traffic flows in an organized and convenient pattern. The library stands as the hub of a majestic campus.

Urbanovsky, head of the department of horticulture and park management, is proud of the direction Tech is taking in its building program.

He hasn't much sympathy for students who complain about parking problems, remembering when tow trucks were standard college equipment, used after a rain to clear cars from the muddy avenues.

He knows there is a drainage problem on campus — principally behind the new library and on Boston Avenue. He has a solution to this. It's rather ambitious, but practical.

He plans to raise the terrain of the southwest campus so that water will flow into a series of carry-offs to storm sewers located on 19th Street and around Jones Stadium.

Notes...

(Continued from page 1)

attend, please notify Korothy Rylander, 1808 14th St., Lubbock.

All Ex-Students from the School of Agriculture are invited to attend the annual Aggie Breakfast on Saturday, October 27. The dutch breakfast, sponsored by the Aggie Club, will be in the Judging Pavilion. Breakfast will be served from 7-7:30 a.m.

Tech Board Post Filled

Charles Mathews, 49-year-old Dallas attorney, has been named by Gov. Price Daniel to the Texas Tech board of directors to replace Jim Lindsey, Midland, who resigned recently.

Mathews, a former resident of Floydada, will serve the remainder of Lindsey's term which expires Feb. 19, 1965.

Mathews is a former first assistant attorney general of Texas, having served for six years during the administration of Daniel while he was the attorney general.

The new board member currently is vice president and general counsel for Redball Motor Freight, Inc., Dallas.

The company operates in nine states.

Mathews practiced law in Lubbock for a brief period after his graduation with highest honors from the University of Texas Law School in 1937.

Was War Crimes Prosecutor

He served in World War II in Europe and was a prosecutor at the war crimes trials in Dachau when former German S. S. troops were on trial.

In 1947, Mathews was appointed executive assistant attorney general by Daniel, and in 1950 he was made first assistant attorney general.

Mathews went into private law practice in Austin in 1943 and remained there until he moved to Dallas in 1961.

He held many high honors while at the University of Texas and was president of the senior law class in 1937.

Currently, Mathews is a member of the Administrative Law and Anti-Trust Sections of the American Bar Assn. He also is a member of the Motor Carrier Lawyers Assn.

Mathews and his wife have a 14-year-old daughter.

Lindsey resigned to become director of public information at Texas A&M College.

Library Dedication Set For Oct. 21

Dedication ceremonies for the new Texas Tech library completed this summer will be conducted Sunday, October 21, starting with an open house from 1-6 p. m. that day.

At 2 p. m. the actual dedication will take place with Dean R. M. Lumiansky, Tulane University, giving the dedicatory address at 3:30 p. m. in the Ballroom of the Student Union. Following this there will be a Tech Choir concert at 4:45 p. m. in the Ballroom.

MEAT REQUIREMENT

The estimated meat requirement at Texas Tech in 1961-62 stood at 1,125,000 pounds, the equivalent of a herd of 1,125 steers, each weighing 1,000 pounds.

This newspaper is mailed to each Ex-Student, whose name and address appears in the Ex-Student Association files. Cost of its publication and mailing charges are paid by contributions to the Texas Tech Loyalty Fund.

Are you a current contributor to the Loyalty Fund or are you depending on some other Ex-Student to make a gift thereby making it possible for you to receive this newspaper?

Charles D. Mathews

Board Okays Sale Of Land For Greeks

Tech's board of directors has given approval to the sale of 10 acres of the campus land for use in the development of a lodge area.

College fraternities and sororities can build lodges for meetings on the tract located on the west side of the college farm.

The sale of campus land must also be approved by the Texas legislature. The board authorized the administrative officers of the college to get a bill introduced in both houses of the Fifty-eighth Legislature at its regular session in 1963.

If the legislature approves the sale, it will be made at the going rate at the time of the sale.

The board further provided that no fraternity or sorority houses will be allowed, either on or off the campus, without first securing board approval.

PAPER PLENTIFUL

At Texas Tech 3,194,000 sheets of paper were used by the Mimeograph Service during 1960-61, enough to cover 47.6 acres. In addition, the Texas Tech Press used approximately 153,675 pounds of paper, an equivalent of 30,000 reams. The Press also printed 682,000 envelopes, weighing about four-and-a-half tons. These amounts do not include the paper duplicated in other places on the campus.

FOOD, FOOD, FOOD

A freight train with 170 average-sized cars would be needed to haul the estimated 8,544,897 pounds of food purchased by Texas Tech during the 1961-62 fiscal year.

5 UNDERGRADUATE SCHOOLS

The School of Arts and Sciences is one of five undergraduate schools at Texas Tech and is composed of 18 departments.

COST PER STUDENT

The average full-time student at Texas Tech in 1961-62 paid \$162, or 25.3 per cent, of the \$640.28 cost for his educational and general funds.

'61-'62 Gifts, Grants Placed At \$604,834

Texas Tech received gifts and grants totaling \$604,834 during the 1961-62 fiscal year, which closed last August 31, W. T. Butterfield, Tech vice-president for development has announced.

Speaking at the fall meeting of the Texas Tech Foundation Board, held on the campus, Butterfield summarized the projects carried on through the Foundation.

He pointed out that the largest sum designated by donors for any purpose during the past year was \$140,305 in contributions to the Library Building Fund.

\$100,000 Largest Gift

This fund supplements state appropriations in meeting construction costs of the new library. It is part of total gift pledges of \$226,250 to the Library Building Fund, which has been a major development project during the past two years.

The largest single gift of the past fiscal year was \$100,000 from the Killgore Foundation, Amarillo. This sum was the first installment of a \$500,000 grant to be paid through the Texas Tech Foundation for construction of the Killgore Beef Cattle Center at the Texas Tech Research Farm, Pantex.

The new facilities will be completed in 1963 as a memorial to the late Florence Lee and C. L. Killgore, pioneers in Texas Panhandle ranching.

All-Time High Set

Grants for research projects designated by the donors amounted to \$89,787, with an additional \$17,220 contributed to the Institute of Science and Engineering for support of promising research in these fields.

Gifts for scholarships, fellowships, and student loans amounted to \$79,743, while those for athletic dormitories and scholarships totaled to \$79,107.

The latter project is carried on through the Red Raider Club, which conducts its own solicitations each year and reports gift receipts through the Texas Tech Foundation.

Total support from private sources during the 1961-62 fiscal year reached an all-time "high" for any twelve-month period at Tech, Butterfield said.

Goodwin Speaks Briefly

Butterfield predicted that total gift support for the 1962 calendar year will range between \$650,000 and \$700,000 by Dec. 31. Such an amount will far exceed

any previous total at Tech for gift receipts during a single calendar year.

Tech President R. C. Goodwin spoke briefly, emphasizing the importance of the entire state-supported program of higher education in Texas.

"The quality of the educational facilities our state provides for its young men and women," he said, "will be a big factor in the progress of Texas during the years ahead, and in its total contribution to the leadership of our nation."

Building Boom Hits Entire Tech Campus

Texas Tech is growing, growing, growing.

Never before has such a building boom hit Tech. With a major construction project not yet half finished, Tech's board of directors recently approved the construction of three new buildings at a cost of \$7-7.5 million.

A budget for the 1964-65 biennium amounting to over \$10.5 million was also approved.

The board gave its approval for a second new women's dormitory and a new men's residence hall to house 1,000. The new halls are scheduled to be ready for occupancy in the summer of 1964. The men's hall will be eight stories high and the women's hall will house 808 coeds. The architecture of both halls will be similar to the present new halls.

A psychology and speech building costing \$750,000 is to be constructed by 1963.

The women's dorm now under construction near the new library is approximately 70 days ahead of schedule. It will open in the fall of 1963.

Tech's farm at Kilgore will get a new \$500,000 beef cattle center. Construction has begun on this project.

Tow remodeling projects are also underway. Remodeling of the Journalism Bldg. is finished and the old library should be ready late this fall.

Improvements to the Journalism Bldg. have cost about \$67,000. The basement now consists of new photographic laboratories, classrooms and a new studio.

The first floor has remodeled journalism department offices and new Toreador, advertising and public information offices. New research, seminar and classrooms are also included.

The second floor remains much the same with minor improvements to the several classrooms.

The ground floor of the old library will have six new classrooms, 16 offices and a reference reading room for the military science departments and Extension Division.

The ROTC units will have permanent facilities in the building. The wooden barracks will be removed from the campus.

The first floor will consist of six classrooms and six new offices, in addition to the six existing offices. The Southwest Collection will be housed on that floor and will use all but one of the library stacks.

On second floor there will be four new classrooms and nine offices, in addition to the six existing offices. A 2,679 square foot lecture room, which will hold 240 students, will be added.

The cost of remodeling the old library building is set at \$119,296.

The construction of the new buildings will increase the value of Tech's physical plant to more than \$80 million.

Bootsie ...

(Continued from page 6)

second division this year, but Bootsie attributes this to a young ball club and "too many one-run decisions."

Bootsie is quite opinionated on baseball. She feels that expansion of the league has hurt the game. "There are not enough of the Ted Williams type of players to go around to all the teams," she said. "And there is such a demand for players, the rookies don't stay

TECH EX-STUDENTS MEET — Leaders of Texas Tech's Ex-Students Assn. met on the Tech campus recently for an executive board meeting and the first chapter officers conference ever held by the Association. Looking over the new Chapter Officers Manual are Chapter Presidents Kent Shannon, Roswell, and Troy Davidson, Houston.

Pioneer's Records Given To College

The business records of the late Louis Hamilton Hill, longtime West Texas entrepreneur, have been presented to Texas Tech's Southwest Collection.

The Hill Collection includes 400 bound volumes of letterpress books, cash books and other volumes reflecting the life and activities of the West Texas businessman.

The collection was presented to Tech by Mrs. J. Carter King Sr., daughter of Hill, and her son, J. Carter King Jr. of Albany.

Detailed Study Underway

A detailed inspection of each volume is being made by Tech archivists, and the collection is being catalogued for future use

by students and scholars of West Texas history.

"The Hill Collection is the beginning of a stepped-up campaign to add business and personal records of West Texans to our program," said Dr. Seymour V. Connor, director of the Southwest Collection.

Hill, who came to Texas in 1870 from Alabama, began working as a sheepherder, rail-splitter and cowhand. He later took a job with the D. F. York and Co. of Fort Griffin, a frontier merchandising firm.

After the successful merchandising venture, he moved to Albany where he began a long career as a businessman. His business associates were such men as R. E. Watts, L. W. Campbell, W. G. Webb, Sam Webb, G. C. King, J. A. Matthew and Hill's son, Williams Louis Hill Jr.

It was said at the time of Hill's death that the Hill Co. had sold nearly every tract of land in Shackelford County that had changed hands since 1883. He dealt not only in land, but in insurance, livestock, loans and collecting.

Another highlight in Hill's successful business career was his purchase of the Goethe and Fuchs ranch where he and Webb opened rock quarries on the Clear Fork of the Brazos River and laid out the town of Luaders. They then helped get the right-of-way for the Texas Central Railway, which was extended from Albany to Stamford.

Organized Oil Company

Hill also was one of the organizers of the Oriental Oil Co. of Dallas, serving as a director at the time of his death, director of Republic Fire Insurance Co. of Dallas, and owner of large mining and silver fox farming interests in Duluth, Minn.

The company first was known as the Watts-Campbell-Hill Co., but at the time of Hill's death in 1932, it was known as the Hill and Hill Co.

In the collection, much information can be found on Sam Webb, the longtime business associate of Hill. Webb, a native Texan, was a banker, rancher and real estate promoter. The two men were active in Masonic activities, having been members of the Hella Shrine Temple of Dallas.

PART OF RECORD CROWD — Shown above, looking toward the east stands of Jones Stadium, is a portion of the record 42,000 persons who turned out for the Texas Tech-University of Texas SWC opener. On the field, spelling

out the college name is the 230-piece Tech band. The crowd was the largest ever to see a game in West Texas.

6 Nominated For Association Jobs

(Continued from page 1)

Presently Southwest Division Manager of the Williams Wallace Co., with headquarters in Dallas. Earl and his wife have two children, Nancy, who attended Tech two years and is now a junior at University of Texas, and George who attends Hillcrest High School in Dallas.

Fuson attended Simmons University in Abilene in the fall of 1928 and the spring of 1929, before it was Hardin-Simmons. He transferred to Tech in 1929 and studied electrical engineering. He lettered on the first football team Simmons U. had and played Tech as a freshman in Lubbock in 1928.

The presidential nominee is a member of the Hemphill Heights Masonic Blue Lodge, also of the Chapter and Council and the Dallas Commandry, a member of the Dallas Sales Executives Club, Glen Garden Golf and Country Club of Fort Worth, member of Dallas Athletic Club, director in the West Texas Golf Assn., and a member of the Guild of Ancient Suppliers, and a member of the Park Cities Baptist Church.

Floyd Read, currently second vice president of the Association, is nominated for first vice president. Floyd was chairman of the Century Club in its charter year and has served as a member of the Texas Tech Loyalty Fund Trustees. He received his BBA in '48 at Tech, where he was senior class president, president of Kemas, Mens Inter-Club Council, was in Whos Who on the Campus, Commander of the Tech War Veterans. He played freshman football and basketball and one year of varsity football before entering the service in the spring of 1943. He also served during the Korean conflict.

Floyd and Ruth Read have four children, Johnny, 18, Tech freshman, Skippy, 14, Meg, 10, and Rocky, 5. Mrs. Read was class of '45 at Tech and a member of San Souci.

Born in Texas, Floyd was reared in Oklahoma but has lived in Lubbock since enrolling at Tech. He is president and owner of Geolog, Inc., an oil field mud logging service. He has been associated with the firm eight years.

He is currently vice president of Southwest Lubbock Rotary Club and an active member of Lubbock View Christian Church. He has served on the board of both groups.

Read is also a member of numerous geological societies in West Texas and New Mexico, a member of the Lubbock County Club, Midland Club and Lubbock Ski Club.

Nominated for second vice president, Frank W. Calhoun graduated from Tech in '56 with a BA degree. He is presently a trustee of the Texas Tech Loyalty Fund and secretary of the Abilene Red Raider Club.

Calhoun is now associated with the law firm of Byrd, Shaw, Weeks & Calhoun, of which he became a partner Jan. 1, 1961 after working with the firm two years. He graduated from University of Texas School of Law in 1959 and is a member of the Texas, American, and Abilene Bar Associations.

At Tech he was president of Sigma Alpha Epsilon, and of the Iner-Fraternity council, a student council representative, named to Who's Who, Board of

Student Organizations, Saddle Tramps, and to several other offices. He is married to the former Doris Wampler who was a Kappa Kappa Gamma at Tech. She graduated from University of Texas in 1957 with a BBA degree. The couple has two sons, Michael, 3, and David, 1.

Calhoun, who graduated from Moody, Tex., high school in 1950, is presently member of the official board of St. Paul Methodist Church in Abilene, director of the Southwest Abilene Rotary Club besides his Ex-Student duties.

He served in the U. S. Navy during the Korean Conflict.

Donnell Echols has been nominated for a directorship carrying a three year term. Echols graduated from Tech in '59 with a BA in Ag. Economics. In college he was president of the student council, Phi Gamma Delta, the Inter-fraternity Council, director of the Rodeo Assn., member of Aggie Club and Saddle Tramps.

The young farmer - rancher from Lamesa, Texas is currently president of Area II Young Farmers, of the Lamesa Cotton Grower Assn., a director of the Dawson County Farm Bureau and Dawson County Fair, a member of the Community Chest Committee, Chamber of Commerce and First Baptist Church.

He and his wife, the former Sharla Pepper, '59, Elem. Ed., and former Tech cheerleader, have two children, Pepper Alyson, 2, and Gloria Paige, three months.

A. J. Kemp, Dimmitt, Texas, has also been nominated for a three-year directorship. Kemp graduated from Tech in '42 with a BA in Journalism. At Tech he was editor of the 1940-41 La Ventana and also in '41-42. He was also a member of Silver Keys, Saddle Tramps, Who's Who in American Colleges and Universities and President of

Bill Bales

the Press Club.

Kemp served in the Air Force during World War II. He is married to the former Jeanette Graham and they have three children: Andy, 8, Camille, 6, and Carla, 5. He is on the board of the Dimmitt Independent School District, a member of the First Baptist Church and a member of Phi Delta Theta fraternity.

He has lived in Dimmitt since 1945 and is engaged in farming, ranching, and associated with the Texas Livestock Marketing Association as a cattle order buyer.

The third man nominated for director is Bill Bales, '53, BS in Pet. Geo. Bales is a landman for Humble Oil and Refining Co. and is assigned to the Exploration Department, Tyler District of the Dallas area.

He is married to the former Peggy Floyd of Andrews who attended the University of Mississippi in 1952-53. She attended Tech in 1953-54. The couple live in Tyler.

At Tech Bales had many honors, some of which were All College Recognition for Leadership, Who's Who on the Campus, Mr. Texas Tech, president of junior and senior classes and of Kappa Sigma fraternity, Saddle Tramps, manager, geology department for engineering show, Sigma Gamma Epsilon, and a member of a number of other committees and organizations.

Bales is past president and director of the East Texas Chapter of Ex - Students Association, a member of several Masonic groups and the Mervin Methodist Church.

South Pole 'Old Hat'...

will explore were discovered on a flight in 1940 by the Byrd team in the same plane earlier dug up.

Byrd was quite a leader, but given to telling tall stories, the graying Tech teacher relates. "He was a fine guy to work for. He always considered the welfare of his men."

Byrd's concern for his men's welfare may have shortened his life. The Admiral spent a winter at a weather station 135 miles out from the main base. He was alone. A faulty generator caused carbon monoxide poisoning. Although the group knew Byrd was sick, Wade said, they couldn't get to him. It was two months later when they finally relieved him after Byrd had stuck it out, taking the meteorological readings he had wanted so much to get.

Running Water

However, Wade said, the prolonged poisoning had an effect on his body such that Byrd never really recovered.

"Now they've even got running water and flush toilets," the Tech geologist commented, "McMurdo Sound is like a small city." The Antarctic continent also has had a population explosion. Several thousand scientists now operate out of 35 active bases. McMurdo Sound base runs off a small nuclear reactor.

Why go to the polar continent?

For Mr. Wade, it may be his last chance to gather information where he made a reputation as a pioneer.

To others it holds the key to many problems: the world's weather, proof of the 140-year-old continental drift theory, life in the oceans, why the Southern hemisphere is the opposite, and the extent of its vast mineral resources.

The primary reason many are eager to explore the coldest most inhospitable region on earth is probably the same one given by mountain climbers, "because it is there."

GoodwinStresses...

(Continued from page 5)

160 students. In the fall of 1961, 10,212 students were enrolled — an increase of 98 per cent. So we have already exceeded the increase we would expect in 1965 based upon high school enrollments, but that swelling number of high school graduates is still to come. So though Tech has been growing at a rapid rate these last several years, we are really just beginning to grow. We anticipate between 20 and 24 thousand students by 1970.

To some degree this same expansion faces all the State-supported colleges. Some of you will have children in college during these coming years. How will they be taken care of? Faculty, staff and physical facilities will be needed. They can not be secured on short notice. We must plan now and be able to execute these plans shortly if we are to be prepared for

Operating expenses come your sons and daughters.

from appropriations. Our dormitories are built on borrowed federal money and must be self-liquidating. Our academic buildings are presently provided by a 5-cent ad valorem tax. In 1966 we estimate we will have another 1 3/4 million from that source. In 1968, we may secure another 12 million provided present legislation is not reversed. Please note that these funds will come after the great influx of students has begun.

The provision for operation and for academic buildings is a function of the Legislature which must, in turn, depend largely on taxes which come out of our pockets. None of us likes to pay taxes, but few of us strenuously object if we believe the money is spent for a worthy cause. I believe that the Legislature will make the necessary appropriations, with their accompanying increases in taxes, if they believe their constituencies want them to.

Hence my plea to you is simply this. We must convince the people of Texas that higher education is both a worthy and necessary cause. In this you need not operate alone. I do not believe that Texas Tech can secure adequate appropriations unless all the State-supported colleges are treated similarly. Hence you can join with the ex-students of all the State-supported colleges in the common endeavor of informing all Texans of the importance of higher education. You have had some experience in this your CLASP program. I am suggesting an enlarged program of a somewhat similar nature.

I do not know how many of you or of the citizens of Texas would consider my next statement sound. But in a way, financing of higher education may be considered as a loan. It has frequently been said that a college education increases the earning potential of the average graduate from \$100,000 to \$250,000 during his lifetime. If this be true, then the increased taxes collected from this increased revenue would more than offset the rising costs of higher education. It has even been suggested that a State-supported college could be a device used by the State to produce high tax - paying citizens.

Be that as it may, our present task is to secure the financial support needed by our colleges to provide for the flood of students at our doors.

But so far we have been talking largely about numbers. Equally, if not more important, is the quality of our institutions of higher education. May I quote from a report dated Summer, 1962 made by Governor Terry

Sanford of North Carolina, Chairman of the Southern Regional Education Board, of which Texas is a member.

"In 1957 no Southern university was included in the list of the nation's top 20 institutions."

"We must understand that whoever is first in the Southern region is not necessarily even in the swim by national criteria of recognition and achievement."

"This year, of 5,470 fellowships awarded by the nation's four top fellowship programs, some 800, or 15 per cent went to students attending Southern institutions. The sad part, however, is that 62 per cent of these fellowship students will attend outside universities and only two per cent of the students from other regions will choose to use their fellowships in Southern schools."

I could give numerous other instances which indicate a lack of the excellence of Southern colleges we would desire. Hence, to remedy our situation in both quantity and quality, Texas Tech and Texas colleges in general need strong financial support. To convince the people of Texas of this will not be an easy task and we have but a few months in which to get the job done. But if this Association is really looking for something which will test its potential, I challenge you to accept this "selling job" as your goal and be prepared to start now and keep going until we attain that objective.

Homecoming...

(Continued from page 1) and great old friends and school mates.

The annual Homecoming parade, always an extremely colorful event, will usher in the Saturday homecoming activities. The parade will start at 10 a. m. in downtown Lubbock and progress out Broadway, finally breaking up at the campus entrance on that street. College fraternities, sororities and organizations will provide floats for the parade.

Theme for the Homecoming parade will be "Red Raider Serenade", with floats depicting different song titles. The Cline Trailer Co. of Lubbock has donated approximately 30 trailers for use of the student organizations in the parade. In addition the local International Harvester Co. is providing trucks to pull the floats.

First and second place winners in each of the three divisions—fraternity, sorority and all-campus—will be presented trophies by Lucian Thomas of Thomas Jewelry. In addition Thomas will present a large trophy for the most outstanding float in the parade.

Three Lubbock business firms will be hosts to a huge Ex-Student luncheon at 12 noon in the Municipal Coliseum, providing lunch for those Exes and their families who wish to attend. Sponsoring merchants are Furr Super Markets, Dunlaps, and Frontier Stores.

Climax of the day will be the meeting of Texas Tech and SMU on the gridiron of Jones Field at 2 p. m. This will be the third home game for Tech, and the first afternoon tilt, the previous two having been held at night.

All Exes are asked to register in the Student Union or at one of the downtown hotels. By so doing they will be given a complete schedule of all homecoming activities, including those of the Greek organizations and other private groups.
